Evidence relating solely to compensatory damages shall not be admissible until the trier of fact has determined that the defendant is liable. The same trier of fact that tries the issues relating to liability shall try the issues relating to damages.

In that event, the court shall, on its own motion, transfer that portion of the action challenging the validity of the act of the General Assembly to the Superior Court of Wake County for resolution by a three-judge panel if, after all other matters in the action have been resolved, a determination as to the facial validity of an act of the General Assembly must be made in order to completely resolve any matters in the case. The court in which the action originated shall maintain jurisdiction over all matters other than the challenge to the act’s facial
validity and shall stay all matters that are contingent upon the outcome of the challenge to the act's facial validity pending a ruling on that challenge and until all appeal rights are exhausted. Once the three-judge panel has ruled and all appeal rights have been exhausted, the matter shall be transferred or remanded to the three-judge panel or the trial court in which the action originated for resolution of any outstanding matters, as appropriate."

For purposes of this subdivision, any surviving entity that is not a corporation shall include in the amendment a requirement that the approval of the shareholders of the holding company be obtained for any act or transaction by or involving the surviving entity, other than the election or removal of directors or managers, managing members, or other members of the governing body of the surviving entity, which would require the approval of the shareholders of the surviving entity if the surviving entity were a corporation subject to this Chapter.

The plan so adopted and certified shall then be filed and become effective, in accordance with G.S. 55-11-05. That filing is a representation by the person who executes the agreement that the facts stated in the certificate remain true immediately prior to the filing.

(5) The judgment creditor has 10 days from the date served with a motion and schedule of assets or from the date of a hearing to claim exemptions to file an objection to the judgment debtor's schedule of exemptions.

(6) If the judgment creditor files no objection to the schedule filed by the judgment debtor or claimed at the requested hearing, the clerk must enter an order designating the property allowed by law and scheduled by the judgment debtor as exempt property. Upon request of the judgment creditor, the clerk shall issue an execution or writ of possession except for exempt property.

(7) If the judgment creditor objects to the schedule filed or claimed by the judgment debtor, the clerk must place the motion for hearing by the district court judge, without a jury, at the next civil session.

(8) The district court judge must determine the value of the property. The district court judge or the clerk, upon order of the judge, may appoint a qualified person to examine the property and report its value to the judge. Compensation of that person must be advanced by the person requesting the valuation and is a court cost having priority over the claims.

(9) The district court judge must enter an order designating exempt property. Supplemental reports and orders may be filed and entered as necessary to implement the order.

(10) Where the order designating exemptions indicates excess value in exempt property, the clerk, in an execution, may order the sale of property having excess value and appropriate distribution of the proceeds.

(11) The clerk or district court judge may permit a particular item of property having value in excess of the allowable exemption to be retained by the judgment debtor upon his the debtor's making available to judgment creditors money or property not otherwise available to them in an amount equivalent to the excess value. Priorities of judgment creditors are the same in the substituted property as they were in the original property.

(12) Appeal from a designation of exempt property by the clerk is to the district court judge. A party has 10 days from the date of entry of an order to appeal. Appeal from a designation of exempt property by a district court judge is to the Court of Appeals. Decisions of the Court of Appeals with regard to questions of valuation of property are final as provided in G.S. 7A-28. Other questions may be appealed as provided in G.S. 7A-30 and 7A-31.

(f) Notation of Order on Judgment Docket. – A notation of the order setting aside exempt property must be entered by the clerk of court on the judgment docket opposite the judgment that was the subject of the enforcement proceeding. If real property located in a county other than the county in which the judgment was rendered is designated as exempt and
Session Laws-2014

S.L. 2014-107

the judgment has already been docketed in that county, the clerk must send a notice of the designation of exempt property to the county where the property is located. The clerk of the county where the land is located shall enter a notation of the designation of exempt property on the judgment docket. If a judgment is docketed in a county where real property is located after that real property has been designated as exempt, the transcript of judgment must indicate that the exemptions have been designated. The clerk in the county receiving the transcript must enter the notation of designation of exempt property as well as docket the judgment.

(g) Modification. – The judge's exemption may be modified by motion in the original exemption proceeding by anyone who did not receive notice of the exemption hearing. Also, the debtor's exemption may be modified upon a change of circumstances, by motion in the original exemption proceeding, made by the debtor or anyone interested. A substantial change in value may constitute changed circumstances. Modification may include the substitution of different property for the exempt property.

(h) Repealed by Session Laws 1981 (Regular Session, 1982), c. 1224, s. 14."

SECTION 3.2. This Part becomes effective October 1, 2014. This Part does not affect any debtor's statements issued before that date.

PART IV. CLARIFY TIME FRAME FOR SUBSTITUTION OF PERSONAL REPRESENTATIVE

SECTION 4.1. G.S. 28A-19-1(c) reads as rewritten:

"(c) In an action pending against the decedent at the time of the decedent's death, which action survives at law, the court may order the substitution of the personal representative or collector for the decedent on motion therefor and that motion will constitute the presentation of a claim, provided that substitution occurs within the time specified for the presentation of claims under G.S. 28A-19-3, any claim pending in the action, provided that the substitution or a motion for substitution is made within the time specified for the presentation of claims under G.S. 28A-19-3, and no further presentation is necessary. Such claim will be deemed to have been presented from the time of the substitution, or motion therefor. Neither the timely substitution of the personal representative nor timely motion therefor as provided in this subsection extends the time for filing additional claims."

PART V. CLARIFY THAT COMMON LAW RULE AGAINST ACCUMULATIONS NO LONGER APPLIES TO TRUSTS

SECTION 5.1. G.S. 41-23(h) reads as rewritten:

"(h) The provisions of G.S. 41-15 and G.S. 41-15, the common law rule against perpetuities, and the common law rule against accumulations do not apply to trusts created or administered in this State."

PART VI. ALLOW VIDEOCONFERENCING BETWEEN A TREATMENT FACILITY AND A COURTROOM IN INPATIENT COMMITMENT HEARINGS

SECTION 6.1. G.S. 122C-268(g) reads as rewritten:

"(g) Hearings may be held in an appropriate room not used for treatment of clients at the facility in which the respondent is being treated if it is located within the judge's district court district as defined in G.S. 7A-133, by interactive videoconferencing between a treatment facility and a courtroom, or in the judge's chambers. A hearing may not be held in a regular courtroom, over objection of the respondent, if in the discretion of a judge a more suitable place is available."

The hearing officer is authorized to administer oaths to witnesses appearing at the hearing. The hearing must be conducted in the county where the charge was brought, and except when the evidence of the violation is an alcohol concentration report from an ignition interlock system, the hearing may be conducted in the county where the person resides. The hearing must be limited to consideration of whether:

(1) The drivers license of the person had an ignition interlock requirement; and
(2) The person:

SECTION 8.(a) G.S. 136-66.10 reads as rewritten:

"§ 136-66.10. Dedication of right-of-way under local ordinances.

(a) Whenever a tract of land located within the territorial jurisdiction of a city or county's zoning or subdivision control ordinance or any other land use control ordinance authorized by local act is proposed for subdivision or for use pursuant to a zoning or building permit, and a portion of it is embraced within a corridor for a street or highway on a plan established and adopted pursuant to G.S. 136-66.2, a city or county zoning or subdivision ordinance may provide for the dedication of right-of-way within that corridor pursuant to any applicable legal authority, or:

(1) A city or county may require an applicant for subdivision plat approval or for a special use permit, conditional use permit, or special exception, or for any other permission pursuant to a land use control ordinance authorized by local act to dedicate for street or highway purpose, the right-of-way within such corridor if the city or county allows the applicant to transfer density credits attributable to the dedicated right-of-way to contiguous land owned by the applicant. No dedication of right-of-way shall be required pursuant to this subdivision unless the board or agency granting final subdivision plat approval or the special use permit, conditional use permit, special exception, or permission shall find, prior to the grant, that the dedication does not result in the deprivation of a reasonable use of the original tract and that the dedication is either reasonably related to the traffic generated by the
proposed subdivision or use of the remaining land or the impact of the
dedication is mitigated by measures provided in the local ordinance.

(2) If a city or county does not require the dedication of right-of-way within the
corridor pursuant to subdivision (1) of this subsection or other applicable
legal authority, but an applicant for subdivision plat approval or a zoning or
building permit, or any other permission pursuant to a land use control
ordinance authorized by local act elects to dedicate the right-of-way, the city
or county may allow the applicant to transfer density credits attributable to
the dedicated right-of-way to contiguous land that is part of a common
development plan or to transfer severable development rights attributable to
the dedicated right-of-way to noncontiguous land in designated receiving
districts pursuant to G.S. 136-66.11.

(3) Units of local government that require or accept right-of-way dedications
under this subsection shall notify the applicant and the property owner when
the local government begins review of or negotiations for a right-of-way
dedication and associated density credit transfer, whichever first occurs. If
the property owner is not the applicant, then the property owner shall be
given notification of right-of-way dedications and any related density credit
transfers under this subsection. The notification shall be sent to the last
known address for the owner and shall include a copy of this section and any
local ordinances, policies, or procedures governing the calculation and
application of the density credit transfer.

(b) When used in this section, the term "density credit" means the potential for the
improvement or subdivision of part or all of a parcel of real property, as permitted under the
terms of a zoning and/or subdivision ordinance, and/or other land use control ordinance
authorized by local act, expressed in dwelling unit equivalents or other measures of
development density or intensity or a fraction or multiple of that potential that may be
transferred to other portions of the same parcel or to contiguous land in that is part of a
common development plan.

SECTION 8. (b) This section becomes effective October 1, 2014, and applies to
dedications occurring on or after that date.

shall report its findings, together with any recommended legislation, to the 2015 Regular
Session of the 2015 General Assembly upon its convening.

The General Assembly of North Carolina enacts:

PART I. CREATE TRANSPARENCY IN CONTRACTS BETWEEN THE ATTORNEY GENERAL AND PRIVATE ATTORNEYS

SECTION 1.1. Chapter 114 of the General Statutes is amended by adding a new Article to read:

"Article 2A.

"§ 114-9.2. Title.
This Article shall be known and may be cited as the "Transparency in Private Attorney Contracts Act (TIPAC)."

"§ 114-9.3. Definitions.
The following definitions apply in this Article:

(1) Contingency fee contract. – A contract entered into by a State agency to retain private counsel that contains a contingency fee arrangement, including, but not limited to, pure contingency fee agreements and hybrid agreements, including a contingency fee aspect.

(2) Government attorney. – An attorney employed by the State as a staff attorney in a State agency.

"§ 114-9.4. Procurement.
(a) A State agency may not enter into a contingency fee contract with a private attorney unless the Attorney General makes a written determination prior to entering into the contract.
that contingency fee representation is both cost-effective and in the public interest. Any written
determination shall include specific findings for each of the following factors:

(1) Whether there exist sufficient and appropriate legal and financial resources
within the Attorney General's office to handle the matter.

(2) The time and labor required; the novelty, complexity, and difficulty of the
questions involved; and the skill requisite to perform the attorney services
properly.

(3) The geographic area where the attorney services are to be provided.

(4) The amount of experience desired for the particular kind of attorney services
to be provided and the nature of the private attorney's experience with
similar issues or cases.

(b) If the Attorney General makes the determination described in subsection (a) of this
section, the Attorney General shall request proposals from private attorneys to represent the
State agency on a contingency fee basis and draft a written request for proposals from private
attorneys, unless the Attorney General determines that requesting proposals is not feasible
under the circumstances and sets forth the basis for this determination in writing. A request for
proposals under this provision is not subject to Article 3 of Chapter 143 of the General Statutes.
Until the conclusion of the legal proceeding or other matter for which the services of the private
attorney were sought, all proposals received shall be maintained by the Attorney General and
shall not be deemed a public record within the meaning of Chapter 132 of the General Statutes.

§ 114-9.5. Contingency Fees.

(a) The Attorney General may not give permission under G.S. 114-2.3 for a State
agency to enter into a contingency fee contract that provides for the private attorney to receive
an aggregate contingency fee, exclusive of reasonable costs and expenses, in excess of:

(1) Twenty-five percent (25%) of any damages up to ten million dollars
($10,000,000); plus

(2) Twenty percent (20%) of any portion of such damages between ten million

million dollars ($15,000,000) and twenty million dollars ($20,000,000); plus

dollars ($20,000,000) and twenty-five million dollars ($25,000,000); plus

(5) Five percent (5%) of any portion of such damages exceeding twenty-five
million dollars ($25,000,000).

(b) In no event shall the aggregate contingency fee exceed fifty million dollars
($50,000,000), exclusive of reasonable costs and expenses, and irrespective of the number of
lawsuits filed or the number of private attorneys retained to achieve the recovery.

(c) A contingency fee shall not be based on penalties or civil fines awarded or any
amounts attributable to penalties or civil fines.

(a) Decisions regarding disposition of the case are reserved exclusively to the discretion
of the State agency in consultation with a government attorney.

(b) The Attorney General shall develop a standard addendum to every contract for
contingency fee attorney services that shall be used in all cases, describing in detail what is
expected of both the contracted private attorney and the State agency, including, without
limitation, the requirement listed in subsection (a) of this section.
"§ 114-9.7. Oversight. (a) Until the conclusion of the legal proceeding or other matter for which the services of the private attorney have been retained, the executed contingency fee contract and the Attorney General's written determination pursuant to G.S. 114-9.4 shall not be deemed a public record within the meaning of Chapter 132 of the General Statutes. All records maintained under this subsection shall be made available to the State Auditor for oversight purposes, upon request. (b) The amount of any payment of contingency fees pursuant to a contingency fee contract subject to this Article shall be posted on the Attorney General's Web site within 15 days after the payment of those contingency fees to the private attorney and shall remain posted on the Web site for at least 365 days thereafter. (c) Any private attorney under contract to provide services to a State agency on a contingency fee basis shall maintain all records related to the contract in accordance with the Revised North Carolina Rules of Professional Conduct. (d) By February 1 of each year following a year in which a State agency entered into a contingency fee contract with a private attorney, the Attorney General shall submit a report to the President Pro Tempore of the Senate and the Speaker of the House of Representatives describing the use of contingency fee contracts with private attorneys in the preceding calendar year. To the fullest extent possible without waiving the evidentiary privileges of the State in any pending matters, the report shall: (1) Identify each new contingency fee contract entered into during the year and each previously executed contingency fee contract that remains current during any part of the year, (2) Include the name of the private attorney with whom the department has contracted in each instance, including the name of the attorney's law firm, (3) Describe the nature and status of the legal matter that is the subject of each contract, (4) Provide the name of the parties to each legal matter, (5) Disclose the amount of recovery, (6) Disclose the amount of any contingency fee paid, (7) Include copies of any written determinations made under G.S. 114-9.4.

"§ 114-9.8. No expansion of authority. Nothing in this Article shall be construed to expand the authority of any State agency or officer or employee of this State to enter into contracts for legal representation where no authority previously existed."

SECTION 1.2. G.S. 114-2.3 reads as rewritten: "§ 114-2.3. Use of private counsel limited. (a) Every agency, institution, department, bureau, board, or commission of the State, authorized by law to retain private counsel, shall obtain written permission from the Attorney General prior to employing private counsel. This section does not apply to counties, cities, towns, other municipal corporations or political subdivisions of the State, or any agencies of these municipal corporations or political subdivisions, or to county or city boards of education. (b) Article 2A of this Chapter applies to any contract to retain private counsel authorized by the Attorney General under this section."

SECTION 1.3. Sections 1.1 and 1.2 of this act are effective when they become law and apply to any contract to retain private counsel authorized by the Attorney General entered into on or after that date.

PART II. PREVENT THE ABUSE OF PATENTS

SECTION 2.1. Chapter 75 of the General Statutes is amended by adding a new Article to read:
"Article 8.

§ 75-136. Title.
This Article shall be known and may be cited as the "Abusive Patent Assertions Act."

§ 75-137. Purpose.

(a) The General Assembly finds the following:

1. North Carolina is home to a growing high-technology, knowledge-based economy. With its top-tier research universities and active technology sector, North Carolina is poised to continue its growth. To continue growing, North Carolina must attract new, small, and mid-sized technology companies. Doing so will help provide jobs for North Carolina's residents and boost North Carolina's economy. North Carolina also is home to companies in retail, manufacturing, and other industries, many of whom are customers of technology companies. Those other businesses are more likely to succeed if not inhibited by abusive and bad-faith demands and litigation.

2. Patents encourage research, development, and innovation. Patent holders have legitimate rights to enforce their patents.

3. The General Assembly does not wish to interfere with good-faith patent litigation or the good-faith enforcement of patents. The General Assembly also recognizes that North Carolina is preempted from passing any law that conflicts with federal patent law.

4. Patent litigation can be technical, complex, and expensive. The expense of patent litigation, which may cost millions of dollars, can be a significant burden on companies. North Carolina wishes to help its businesses avoid these costs by encouraging the most efficient resolution of patent infringement claims without conflicting with federal law.

5. In order for North Carolina companies to be able to respond promptly and efficiently to patent infringement assertions against them, it is necessary that they receive specific information regarding how their product, service, or technology may have infringed the patent at issue. Receiving this information at an early stage will facilitate the resolution of claims and lessen the burden of potential litigation on North Carolina companies.

6. Abusive patent litigation, and especially the assertion of bad-faith infringement claims, can harm North Carolina companies. A business that receives a letter asserting such claims faces the threat of expensive and protracted litigation and may feel that it has no choice but to settle and to pay a licensing fee even if the claim is meritless. This is especially so for small- and medium-sized companies and nonprofits that lack the resources to investigate and defend themselves against infringement claims.

7. Not only do bad-faith patent infringement claims impose a significant burden on individual North Carolina businesses, they also undermine North Carolina's efforts to attract and nurture technology and other companies. Funds used to avoid the threat of bad-faith litigation are no longer available to invest, produce new products, expand, or hire new workers, thereby harming North Carolina's economy.

8. North Carolina has a strong interest in patent matters involving its citizens and its businesses, including protecting its citizens and businesses against abusive patent assertions and ensuring North Carolina companies are not subjected to abusive patent assertion by entities acting in bad faith.

9. In lawsuits involving abusive patent assertions, an accused infringer prevailing on the merits may be awarded costs and, less frequently, fees. These awards do not serve as a deterrent to abusive patent assertion entities who have limited liability, as these companies may hold no cash or other
assets. North Carolina has a strong interest in making sure that prevailing North Carolina companies sued by abusive patent assertions entities can recover what is awarded to them.

(b) The General Assembly seeks, by this narrowly tailored act, to strike a balance between (i) the interests of efficient and prompt resolution of patent infringement claims, protection of North Carolina businesses from abusive and bad-faith assertions of patent infringement, and building of North Carolina's economy and (ii) the intentions to respect federal law and be careful to not interfere with legitimate patent enforcement actions. Except as specifically set forth in this act regarding bad-faith patent assertions, nothing in this act is intended to alter current law concerning piercing the corporate veil or otherwise concerning personal liability of principals in business entities.

§ 75-138. Definitions.
The following definitions apply in this Article:

(1) Affiliate. – A business establishment, business, or other legal entity that wholly or substantially owns, is wholly or substantially owned by, or is under common ownership with another entity.

(2) Demand. – A letter, e-mail, or other communication asserting or claiming that a target has engaged in patent infringement or should obtain a license to a patent.

(4) Interested party. – A person, other than the party alleging infringement, that (i) is an assignee of the patent or patents at issue; (ii) has a right, including a contingent right, to enforce or sublicense the patent or patents at issue; or (iii) has a direct financial interest in the patent or patents at issue, including the right to any part of an award of damages or any part of licensing revenue. A "direct financial interest" does not include either of the following:

a. An attorney or law firm providing legal representation in the civil action alleging patent infringement if the sole basis for the financial interest of the attorney or law firm in the patent or patents at issue arises from the attorney or law firm's receipt of compensation reasonably related to the provision of the legal representation.

b. A person whose sole financial interest in the patent or patents at issue is ownership of an equity interest in the party alleging infringement, unless such person also has the right or ability to influence, direct, or control the party alleging infringement.

(5) Operating entity. – A person primarily engaged in, when evaluated with its affiliates over the preceding 24-month period and when disregarding the selling and licensing of patents, one or more of the following activities:

a. Research and technical or experimental work to create, test, qualify, modify, or validate technologies or processes for commercialization of goods or services;

b. Manufacturing; or

c. The provision of goods or commercial services.

(6) Target. – A North Carolina person that meets one or more of the following:

b. The person has been threatened with litigation or is the defendant of a filed lawsuit alleging patent infringement.

c. The person has customers who have received a demand asserting that the person's product, service, or technology has infringed a patent.
§ 75-139. Abusive patent assertions.

(a) It is unlawful for a person to make a bad-faith assertion of patent infringement. A court may consider the following factors as evidence that a person has made a bad-faith assertion of patent infringement:

(1) The demand does not contain all of the following information:
   a. The patent application number or patent number;
   b. The name and address of the patent owner or owners and assignee or assignees, if any;
   c. Factual allegations concerning the specific areas in which the target's products, services, and technology infringe the patent or are covered by specific identified claims in the patent;
   d. An explanation of why the person making the assertion has standing, if the United States Patent and Trademark Office's assignment system does not identify the person asserting the patent as the owner.

(2) Prior to sending the demand, the person failed to conduct an analysis comparing the claims in the patent to the target's products, services, and technology, or the analysis was done but does not identify specific areas in which the products, services, and technology are covered by the claims in the patent.

(3) The demand lacks the information described in subdivision (1) of this subsection, the target requests the information, and the person fails to provide the information within a reasonable period of time.

(4) The person demands payment of a license fee or response within an unreasonably short period of time.

(5) The person offers to license the patent for an amount that is not based on a reasonable estimate of the value of the license, or the person offers to license the patent for an amount that is based on the cost of defending a potential or actual lawsuit.

(6) The claim or assertion of patent infringement is meritless, and the person knew or should have known that the claim or assertion is meritless; or the claim or assertion relies on an interpretation of the patent that was disclaimed during prosecution, and the person making the claim or assertion knows or should have known about the disclaimer, or would have known about the disclaimer if the person reviewed the patent's prosecution history.

(7) The claim or assertion of patent infringement is deceptive.

(8) The person or its subsidiaries or affiliates have previously or concurrently filed or threatened to file one or more lawsuits based on the same or similar claim of patent infringement and (i) those threats or lawsuits lacked the information described in subdivision (1) of this subsection or (ii) the person attempted to enforce the claim of patent infringement in litigation and a court found the claim to be meritless.

(9) The person making the claim or assertion sent the same demand or substantially the same demand to multiple recipients and made assertions against a wide variety of products and systems without reflecting those differences in a reasonable manner in the demands.

(10) The person making the claim or assertion is aware of, but does not disclose, any final, nonfinal, or preliminary postgrant finding of invalidity or unpatentability involving the patent.

(11) The person making the claim or assertion seeks an injunction when that is objectively unreasonable under the law.

(12) Any other factor the court finds relevant.

(b) A court may consider the following factors as evidence that a person has not made a bad-faith assertion of patent infringement:
1. The demand contains the information described in subdivision (1) of subsection (a) of this section.

2. Where the demand lacks the information described in subdivision (1) of subsection (a) of this section and the target requests the information, the person provides the information within a reasonable period of time.

3. The person engages in a good-faith effort to establish that the target has infringed the patent and to negotiate an appropriate remedy.

4. The person makes a substantial investment in the use of the patent or in the production or sale of a product or item that the person reasonably believes is covered by the patent. "Use of the patent" in the preceding sentence means actual practice of the patent and does not include licensing without actual practice.

5. The person is either (i) the inventor or joint inventor of the patent or, in the case of a patent filed by and awarded to an assignee of the original inventor or joint inventor, is the original assignee or (ii) an institution of higher education or a technology transfer organization owned or affiliated with an institution of higher education.

6. The person has demonstrated good-faith business practices in previous efforts to enforce the patent, or a substantially similar patent, or has successfully enforced the patent, or a substantially similar patent, through litigation.

7. Any other factor the court finds relevant.

(c) This Article does not apply to any of the following:

1. A demand letter or assertion of patent infringement arising under any of the following:
   b. 7 U.S.C. § 2321, et seq.
   c. 21 U.S.C. § 301, et seq.
   e. 35 U.S.C. § 271(e)(2).

2. A demand letter or assertion of patent infringement by or on behalf of (i) an institution of higher education incorporated under the laws of and with its principal offices in North Carolina or (ii) a technology transfer organization owned by or affiliated with the institution of higher education.

3. A demand letter or assertion of patent infringement by or on behalf of a nonprofit research organization recognized as exempt from federal income tax under 26 U.S.C. § 501(c)(3) incorporated under the laws of and with its principal offices in North Carolina, or a technology transfer organization owned by or affiliated with the organization.

4. A demand letter or assertion of patent infringement made by an operating entity or its affiliate.

(d) Subject to the provisions of subsections (a) and (b) of this section, and provided the activities are not carried out in bad faith, nothing in this section shall be construed to deem it an unlawful practice for any person who owns or has the right to license or enforce a patent to do any of the following:

1. Advise others of that ownership or right of license or enforcement.
2. Communicate to others that the patent is available for license or sale.
3. Notify another of the infringement of the patent.
4. Seek compensation on account of past or present infringement or for a license to the patent.
"§ 75-140. Bond.

(a) Upon motion by a target and a finding by the court that a target has established a reasonable likelihood that a person has made a bad-faith assertion of patent infringement in violation of this Chapter, the court shall require the person to post a bond in an amount equal to a good-faith estimate of the target's fees and costs to litigate the claim and amounts reasonably likely to be recovered under G.S. 75-141, conditioned upon payment of any amounts finally determined to be due to the target. A hearing shall be held if either party so requests. A bond ordered pursuant to this section shall not exceed five hundred thousand dollars ($500,000).

(b) The court may waive the bond requirement of subsection (a) of this section if it finds the person has available assets equal to the amount of the proposed bond or for other good cause shown.

(c) If the person asserting patent infringement fails within 30 days to pay any fee or cost ordered by a court in a matter related to the asserted patent infringement, the amount not paid shall be paid out of the bond posted under subsection (a) of this section without affecting the obligation of the person asserting patent infringement to pay any remainder of those fees or costs not paid out of the bond.

"§ 75-141. Enforcement; remedies; damages.

(a) The Attorney General shall have the same authority under this Article to make rules, conduct civil investigations, bring civil actions, and enter into assurances of discontinuance as provided under this Chapter. In an action brought by the Attorney General pursuant to this section, the court may award or impose any relief available under this Chapter.

(b) A target or a person aggrieved by a violation of this Article or by a violation of rules adopted under this Article may bring an action in superior court against a person who has made a bad-faith assertion of patent infringement. A court may award to a plaintiff who prevails in an action brought pursuant to this subsection one or more of the following remedies:

(1) Equitable relief.
(2) Damages.
(3) Costs and fees, including reasonable attorneys' fees.
(4) Exemplary damages in an amount equal to fifty thousand dollars ($50,000) or three times the total of damages, costs, and fees, whichever is greater.

(c) A court may award to a defendant who prevails in an action brought pursuant to this section costs and fees, including reasonable attorneys' fees, if the court finds the action was not well-grounded in fact and warranted by existing law or was interposed for any improper purpose, such as to harass or to cause unnecessary delay or needless increase in the cost of litigation.

(d) Joinder of Interested Parties. – In an action arising under subsection (a) or (b) of this section, the court shall grant a motion by the Attorney General or a target to join an interested party if the moving party shows that the party alleging infringement has no substantial interest in the patent or patents at issue other than making demands or asserting such patent claim in litigation.

(e) In an action arising under subsection (a) or (b) of this section, any person who has delivered or sent, or caused another to deliver or send, a demand to a target in North Carolina has purposefully availed himself or herself of the privileges of conducting business in this State and shall be subject to suit in this State, whether or not the person is transacting or has transacted any other business in this State. This Article shall be construed as a special jurisdiction statute in accordance with G.S. 1-75.4(2).

(f) If a party is unable to pay an amount awarded by the court pursuant to subsection (a) or (b) of this section, the court may find any interested party joined pursuant to subsection (d) of this section jointly and severally liable for the abusive patent assertion and make the award recoverable against any or all of the joined interested parties.

(g) This Article shall not be construed to limit rights and remedies available to the State of North Carolina or to any person under any other law and shall not alter or restrict the
Attorney General's authority under this Article with regard to conduct involving assertions of patent infringement.”

(4) Successor asbestos-related liability. – Any liabilities, whether known or unknown, asserted or unasserted, absolute or contingent, accrued or unaccrued, liquidated or unliquidated, or due or to become due, which are related in any way to asbestos claims and were assumed or incurred by a corporation as a result of or in connection with a merger or consolidation, or the plan of merger or consolidation related to the merger or consolidation with or into another corporation, or that are related in any way to asbestos claims based on the exercise of control or the ownership of stock of the corporation before the merger or consolidation. The term includes liabilities that, after the time of the merger or consolidation for which the fair market value of total gross assets is determined under G.S. 99E-43, were or are paid or otherwise discharged or committed to be paid or otherwise discharged, by or on behalf of the corporation or by a successor of the corporation, or by or

"§ 99E-42. Limitation on successor asbestos-related liability.

(a) Except as further limited in subsection (b) of this section, the cumulative successor asbestos-related liabilities of a successor corporation are limited to the fair market value of the total gross assets of the transferor determined as of the time of the merger or consolidation. The successor corporation does not have responsibility for successor asbestos-related liabilities in excess of this limitation.

(b) If the transferor had assumed or incurred successor asbestos-related liabilities in connection with a prior merger or consolidation with a prior transferor, then the fair market value of the total assets of the prior transferor determined as of the time of the earlier merger or consolidation shall be substituted for the limitation set forth in subsection (a) of this section for purposes of determining the limitation of liability of a successor corporation.

"§ 99E-43. Establishing fair market value of total gross assets.

(a) A successor corporation may establish the fair market value of total gross assets for the purpose of the limitations under G.S. 99E-35 through any method reasonable under the circumstances, including either of the following:

(c) To the extent total gross assets include any liability insurance that was issued to the transferor whose assets are being valued for purposes of this section, the applicability, terms, conditions, and limits of such insurance shall not be affected by this statute nor shall this statute otherwise affect the rights and obligations of an insurer, transferor, or successor under any insurance contract and/or any related agreements, including, without limitation, preenactment settlements resolving coverage-related disputes, and the rights of an insurer to seek payment for applicable deductibles, retrospective premiums, or self-insured retentions or to seek contribution from a successor for uninsured or self-insured periods or periods where insurance is uncollectible or otherwise unavailable. Without limiting the foregoing, to the extent total gross assets include any such liability insurance, a settlement of a dispute concerning any such liability insurance coverage entered into by a transferor or successor with the insurers of the
transferor before the effective date of this act shall be determinative of the total coverage of such liability insurance to be included in the calculation of the transferor's total gross assets.

"§ 99E-44. Adjustment.
(a) Except as provided in subsections (b), (c), and (d) of this section, the fair market value of total gross assets at the time of the merger or consolidation shall increase annually at a rate equal to the sum of the following:

(b) The rate defined in subsection (a) of this section shall not be compounded.
(c) The adjustment of the fair market value of total gross assets shall continue as provided in subsection (a) of this section until the date the adjusted value is first exceeded by the cumulative amounts of successor asbestos-related liabilities paid or committed to be paid by or on behalf of the successor corporation or a predecessor or by or on behalf of a transferor after the time of the merger or consolidation for which the fair market value of total gross assets is determined.
(d) No adjustment of the fair market value of total gross assets shall be applied to any liability insurance that may be included in the definition of total gross assets by subsection (c) of G.S. 99E-43.

subject to a minimum of twenty-five thousand dollars ($25,000) and to a maximum of fifty thousand dollars ($50,000). Such death benefit shall be payable apart and separate from the payment of the member's accumulated contributions under the System on his death pursuant to the provisions of subsection (f) of this section. For the purpose of the Plan, a member shall be deemed to be in service at the date of his death if his death occurs within 180 days from the last day of his actual service.

The death benefit provided in this subsection (l) shall not be payable, notwithstanding the member's compliance with all the conditions set forth in the preceding paragraph, if his death occurs:

1. After December 31, 1968 and after he has attained age 70; or
2. After December 31, 1969 and after he has attained age 69; or
3. After December 31, 1970 and after he has attained age 68; or

Notwithstanding the above provisions, the death benefit shall be payable on account of the death of any member who died or dies on or after January 1, 1974, but before January 1, 1979, after attaining age 65, if he or she had not yet attained age 65, if he or she had not yet attained age 66, was at the time of death completing the work year for those individuals under specific contract, or during the fiscal year for those individuals not under specific contract, in which he or she attained 65, and otherwise met all conditions for payment of the death benefit.

Notwithstanding the above provisions, the Board of Trustees may and is specifically authorized to provide the death benefit according to the terms and conditions otherwise appearing in this Plan in the form of group life insurance, either (i) by purchasing a contract or contracts of group life insurance with any life insurance company or companies licensed and authorized to transact business in this State for the purpose of insuring the lives of members in service, or (ii) by establishing a separate trust fund qualified under Section 501(c)(9) of the Internal Revenue Code of 1954, as amended, for such purpose. To that end the Board of Trustees is authorized, empowered and directed to investigate the desirability of utilizing group life insurance by either of the foregoing methods for the purpose of providing the death benefit. If a separate trust fund is established, it shall be operated in accordance with rules and regulations adopted by the Board of Trustees and all investment earnings on the trust fund shall be credited to such fund.

In administration of the death benefit the following shall apply:

1. For the purpose of determining eligibility only, in this subsection "calendar year" shall mean any period of 12 consecutive months or, if less, the period covered by an annual contract of employment. For all other purposes in this subsection "calendar year" shall mean the 12 months beginning January 1 and ending December 31.
2. Last day of actual service shall be:
a. When employment has been terminated, the last day the member actually worked.

b. When employment has not been terminated, the date on which an absent member's sick and annual leave expire, unless he is on approved leave of absence and is in service under the provisions of G.S. 135-4(h).

c. When a participant's employment is interrupted by reason of service in the Uniformed Services, as that term is defined in section 4303(16) of the Uniformed Services Employment and Reemployment Rights Act, Public Law 103-353, and the participant does not return immediately after that service to employment with a covered employer in this System, the date on which the participant was first eligible to be separated or released from his or her involuntary military service.

(3) For a period when a member is on leave of absence, his status with respect to the death benefit will be determined by the provisions of G.S. 135-4(h).

(4) A member on leave of absence from his position as a teacher or State employee for the purpose of serving as a member or officer of the General Assembly shall be deemed to be in service during sessions of the General Assembly and thereby covered by the provisions of the death benefit. The amount of the death benefit for such member shall be the equivalent of the salary to which the member would have been entitled as a teacher or State employee during the 12-month period immediately prior to the month in which death occurred, not to be less than twenty-five thousand dollars ($25,000) nor to exceed fifty thousand dollars ($50,000).

AN ACT TO DESIGNATE RECLAIMED WATER AS A SOURCE WATER UNDER CERTAIN CONDITIONS.

The General Assembly of North Carolina enacts:

SECTION 1. The General Assembly finds that the use of reclaimed water to supplement source waters for potable water treatment is an appropriate and prudent measure in regions of the State with limited water resources under limited conditions.

SECTION 2. G.S. 143-350 is amended by adding a new subdivision to read:
"(4a) "Pretreatment mixing basin" means a basin created from lands that do not include waters of the State and in which raw water is mixed with reclaimed water before it is treated to the standards to make it suitable for potable water supply."

SECTION 3. G.S. 143-355.5 reads as rewritten:
"§ 143-355.5. Water reuse; policy; rule making.
(a) Water Reuse Policy. – It is the public policy of the State that the reuse of treated wastewater or reclaimed water and the use of gray water or captured rain water is critical to meeting the existing and future water supply needs of the State.
(a1) The General Assembly finds that reclaimed water systems permitted and operated under G.S. 143-215.1(d2) in an approved wastewater reuse program can provide water for many beneficial purposes in a way that is both environmentally acceptable and protective of public health. This finding includes and applies to conjunctive facilities that require the relocation of a discharge from one receiving stream to another under all of the following conditions:

1. The relocation is necessary to create an approved comprehensive wastewater reuse program.
2. The reuse program provides significant reuse benefits.
3. The relocated discharge will comply with all applicable water quality standards; will not result in degradation of water quality in the receiving waters; and will not contribute to water quality impairment in the receiving watershed, and will result in net benefits to water quality, such as the elimination of a wastewater discharge in a nutrient sensitive river basin watershed.

(a2) The General Assembly finds that reclaimed water systems permitted and operated under G.S. 143-215.1 in an approved wastewater reuse program can provide water for the beneficial purpose of supplementing the water supply source for potable water in a way that is both environmentally acceptable and protective of public health. Notwithstanding any other provision of law, a local water supply system may combine reclaimed water with other raw water sources before treatment if all of the following conditions are satisfied:

1. The reclaimed water use is not permitted for compliance with flow limitations imposed by a permit issued pursuant to G.S. 143-215.1(a4)(1).
2. The reclaimed water and source water are combined in a pretreatment mixing basin owned and controlled by the drinking water supplier from which water is pumped to the water treatment plant.
3. The pretreatment mixing basin is sized to hold a minimum volume corresponding to five days’ storage at the authorized operating capacity of the water treatment plant under normal operating conditions.
4. The pretreatment mixing basin design and pumping infrastructure incorporate features to ensure mixing of reclaimed water and source water.
5. The reclaimed water is treated to comply with the highest reclaimed water effluent standards established by the Commission.
6. The average daily flow of reclaimed water into the pretreatment mixing basin, as measured over a 24-hour period, is no more than twenty percent (20%) of the sum of the average daily flow of source water and reclaimed water, as measured over the same 24-hour period, into the pretreatment mixing basin.
7. The local water system has implemented conservation and efficiency measures designed to achieve water use reductions.
8. Unbilled leakage from the local water system is maintained below fifteen percent (15%) of annual average potable water consumption of the local water system.
9. The local water system has a master plan that evaluates alternatives for reclaimed water use.
10. The local water system provides public notice to potable water recipients with opportunity for public participation.
11. The potable water supply provided pursuant to this subsection shall comply with all State and federal laws for the provision of safe drinking water.
12. Any discharge into the waters of the State must be pursuant to a permit issued under G.S. 143-215.1.
(b) Water Reuse Rule Making. – The Commission shall encourage and promote safe and beneficial reuse of treated wastewater as an alternative to surface water discharge. The Commission shall adopt rules to:
   (1) Identify acceptable uses of reclaimed water, including toilet flushing, fire protection, decorative water features, and landscape irrigation.
   (2) Facilitate the permitting of reclaimed water systems.
   (3) Establish standards for reclaimed water systems that are adequate to prevent the direct distribution of reclaimed water as potable water. Standards adopted pursuant to this subdivision shall not prohibit the combining of reclaimed water with other raw water sources before treatment pursuant to subsection (a2) of this section.

(c) Gray Water Rule Making. – The Commission shall encourage and promote the safe and beneficial use of gray water. The Commission shall adopt rules to:
   (1) Identify acceptable uses of gray water, including toilet flushing, fire protection, decorative water features, and landscape irrigation.
   (2) Facilitate the permitting of gray water systems.
   (3) Establish standards, in coordination with the Commission for Public Health, for gray water systems that protect public health and safety and the environment and reduce the use of potable water within individual structures.

(d) The Department shall develop policies and procedures to promote the voluntary adoption and installation of gray water systems."

SECTION 4. This act is effective when it becomes law.

In the General Assembly read three times and ratified this the 1st day of August, 2014.

Within five days of receiving the list, the parties may jointly select a hearing officer from that list, or, if the parties cannot agree to a hearing officer, each party may strike up to one-third of the names on the list and submit its strikeout list to the Superintendent of Public Instruction. The Superintendent of Public Instruction shall then appoint a hearing officer
from those individuals remaining on the list. Further, the parties may jointly
agree on another hearing officer not on the State Board of Education's list, provided that individual is available to proceed in a timely
manner and is willing to accept the terms of appointment required by the
State Board of Education. No person eliminated by the career employee or

SECTION 10. G.S. 130A-294.1(b) reads as rewritten:

or developer, and a representative of the local health department shall be required for any
authorization for wastewater system construction issued with an improvement permit under
G.S. 130-336 when the authorization is greater than five years old. Following
the conference, the local health department shall issue a revised authorization for wastewater
system construction that includes current technology that can reasonably be expected to
improve the performance of the system."

SECTION 11. G.S. 136-93(b) reads as rewritten:
"(b) Except as provided in G.S. 136-133.1(g), no vegetation, including any tree, shrub,
or underbrush, in or on any right-of-way of a State road or State highway shall be planted, cut,
trimmed, pruned, or removed without a written selective vegetation removal permit issued
pursuant to G.S. 136-133.2 and in accordance with the rules of the Department. Requests for a
permit for selective vegetation cutting, thinning, pruning, or removal shall be made by the
owner of an outdoor advertising sign or the owner of a business facility to the appropriate
person in the Division of Highways office on a form prescribed by the Department. For
purposes of this section, G.S. 136-129(4) or G.S. 136-129(5). These provisions shall not be used to

SECTION 13. G.S. 143-151.77 reads as rewritten:

"§ 143-151.77. Enforcement and penalties.
(a) In addition to injunctive relief, the Commissioner may assess and collect a civil penalty against any person who violates any of the provisions of this Article or rules adopted pursuant to this Article, as provided in this subsection. The maximum civil penalty for a violation is five thousand dollars ($5,000). A civil penalty may be assessed from the date of the violation. Each day of a continuing violation may constitute a separate violation.

(b) The Commissioner shall determine the amount of the civil penalty and shall notify the person who is assessed the civil penalty of the amount of the penalty and the reason for assessing the penalty. The notice of assessment shall be served by any means authorized under Rule 4 of G.S. 1A-1 and shall direct the violator to either pay the assessment or contest the assessment within 30 calendar days by filing a petition for a contested case under Article 3 of Chapter 150B of the General Statutes. If a violator does not pay a civil penalty assessed by the Commissioner within 30 calendar days after it is due, the Commissioner shall request that the Attorney General institute a civil action to recover the amount of the assessment. The civil action may be brought in the superior court of any county where the violation occurred. A civil action must be filed within one year of the date the assessment was due. An assessment that is not contested is due when the violator is served with a notice of assessment. An assessment that is contested is due at the conclusion of the administrative and judicial review of the assessment.

(c) In determining the amount of the penalty, the Commissioner shall consider the degree and extent of harm caused by the violation, the cost of rectifying the damage, the amount of money the violator saved by noncompliance, whether the violation was committed willfully, the prior record of the violator in complying or failing to comply with this Article, and the action of the person to remedy the violation.

(d) The clear proceeds of civil penalties collected by the Commissioner under this subsection shall be remitted to the Civil Penalty and Forfeiture Fund in accordance with G.S. 115C-457.2."
(b) Evidence in a contested case, including records and documents shall be offered and made a part of the record. Other factual information or evidence shall not be considered in determination of the case, except as permitted under G.S. 150B-30 subsection (d) of this section. Documentary evidence may be received in the form of a copy or excerpt or may be incorporated by reference, if the materials so incorporated are available for examination by the parties. Upon timely request, a party shall be given an opportunity to compare the copy with the original if available.

(c) The parties in a contested case under this Article by a stipulation in writing filed with the agency may agree upon any fact involved in the controversy, which stipulation shall be used as evidence at the hearing and be binding on the parties thereto. Parties should agree upon facts when practicable. Except as otherwise provided by law, disposition may be made of a contested case by stipulation, agreed settlement, consent order, waiver, default, or other method agreed upon by the parties.

(d) Official notice may be taken of all facts of which judicial notice may be taken and of other facts within the specialized knowledge of the agency. The noticed fact and its source shall be stated and made known to affected parties at the earliest practicable time, and any party shall on timely request be afforded an opportunity to dispute the noticed fact through submission of evidence and argument. An agency may use its experience, technical competence, and specialized knowledge in the evaluation of evidence presented to it."

SECTION 15.(a) G.S. 153A-357(d) is repealed.
SECTION 15.(b) G.S. 160A-417(c) is repealed.
SECTION 15.1. G.S. 160A-58.64 reads as rewritten:

"§ 160A-58.64. Referendum prior to involuntary annexation ordinance.
(a) After the adoption of the resolution of intent under this Part, the municipality shall place the question of annexation on the ballot. The municipal governing board shall notify the appropriate county board or boards of elections of the adoption of the resolution of intent and provide a legible map and clear written description of the proposed annexation area.
(b) In accordance with G.S. 163-58.55, G.S. 160A-58.55, the municipal governing board shall adopt a resolution setting the date for the referendum and so notify the appropriate county board or boards of elections.
(c) The county board or boards of elections shall cause legal notice of the election to be published. That notice shall include the general statement of the referendum. The referendum shall be conducted, returned, and the results declared as in other municipal elections in the municipality. Only registered voters of the proposed annexation area shall be allowed to vote on the referendum.
(d) The referendum of any number of proposed involuntary annexations may be submitted at the same election; but as to each proposed involuntary annexation, there shall be an entirely separate ballot question.
(e) The ballots used in a referendum shall submit the following proposition:

"[ ] FOR [ ] AGAINST
The annexation of (clear description of the proposed annexation area)."
(f) If less than a majority of the votes cast on the referendum are for annexation, the municipal governing body may not proceed with the adoption of the annexation ordinance or begin a separate involuntary annexation process with respect to that proposed annexation area for at least 36 months from the date of the referendum. If a majority of the votes cast on the referendum are for annexation, the municipal governing body may proceed with the adoption of the annexation ordinance under G.S. 160A-58.55."

SECTION 16.(a) On March 13, 1895, the General Assembly enacted "An act to incorporate the town of Columbus." The act was published in the 1895 "Private Laws of North Carolina," appearing on pages 404 through 406. The session law designation that appears at the beginning of the act is "Chapter 354," although (i) the act is physically located between Chapters 253 and 255, and (ii) pages 404 through 406 have a running header showing Chapter 254 as the session law contained on those pages. There is otherwise no Chapter 254 in the 1895
"Private Laws of North Carolina," and the last session law in that volume is Chapter 353. It therefore appears that the intended session law designation for the act was Chapter 254 and that the published session law number contains a typographical error. The act has been cited at least once in a subsequent session law as "Chapter 354 of the Private Laws of 1895" and was repealed in Chapter 46 of the 1985 Session Laws ("An act to revise and consolidate the charter of the town of Columbus").

SECTION 16.(b) To remove any ambiguity, any reference to "Chapter 354" of the 1895 Private Laws of this State or to "Chapter 254" of the 1895 Private Laws of this State shall be construed as a reference to the act enacted by the General Assembly on March 13, 1895, entitled "An act to incorporate the town of Columbus."

SECTION 16.1. Section 5 of S.L. 2011-84 reads as rewritten:

"SECTION 5. Sections 2, 3, and 4 of this act do not apply to a city or joint agency providing communications service as of January 1, 2011, provided the city or joint agency limits the provision of communications service as provided in G.S. 160A-340.2(c). In the event a city subject to the exemption set forth in this section provides communications service to a customer outside the limits set forth in G.S. 160A-340(c), the city shall have 30 days from the date of notice or discovery to cease providing service to the customer without loss of the exemption."

SECTION 17. Section 60(c) of S.L. 2013-413 reads as rewritten:

"SECTION 60(c) This act Part becomes effective July 1, 2015."

PART II. ADDITIONAL TECHNICAL CORRECTIONS AND OTHER AMENDMENTS

SECTION 18. G.S. 1-72.2 reads as rewritten:

"§ 1-72.2. Standing of legislative officers.

The Speaker of the House of Representatives and the President Pro Tempore of the Senate, as agents of the State, shall jointly have standing to intervene on behalf of the General Assembly as a party in any judicial proceeding challenging a North Carolina statute or provision of the North Carolina Constitution. The procedure for interventions at the trial level in State court shall be that set forth in Rule 29 of the Rules of Civil Procedure. The procedure for interventions at the appellate level in State court shall be by motion in the appropriate appellate court or by any other relevant procedure set forth in the Rules of Appellate Procedure."

SECTION 18.5. G.S. 1A-1, Rule 8(a), reads as rewritten:

"(a) Claims for relief. – A pleading which sets forth a claim for relief, whether an original claim, counterclaim, crossclaim, or third-party claim shall contain

(1) A short and plain statement of the claim sufficiently particular to give the court and the parties notice of the transactions, occurrences, or series of transactions or occurrences, intended to be proved showing that the pleader is entitled to relief, and

(2) A demand for judgment for the relief to which he deems himself entitled. Relief in the alternative or of several different types may be demanded. In all negligence actions, and in all claims for punitive damages in any civil action, wherein the matter in controversy exceeds the sum or value of ten thousand dollars ($10,000), twenty-five thousand dollars ($25,000), the pleading shall not state the demand for monetary relief, but shall state that the relief demanded is for damages incurred or to be incurred in excess of ten thousand dollars ($10,000), twenty-five thousand dollars ($25,000). However, at any time after service of the claim for relief, any party may request of the claimant a written statement of the monetary relief sought, and the claimant shall, within 30 days after such service, provide such statement, which shall not be filed with the clerk until the action has been called for
trial or entry of default entered. Such statement may be amended in the manner and at times as provided by Rule 15."

SECTION 19.(a) G.S. 7A-228 reads as rewritten:

"§ 7A-228. New trial before magistrate; appeal for trial de novo; how appeal perfected; oral notice; dismissal.

... (d) When a defendant in a summary ejectment action has given notice of appeal and perfected the appeal in accordance with G.S. 7A-228(b), the plaintiff may serve upon the defendant a motion to dismiss the appeal if the defendant:

(1) Failed to raise a defense orally or in writing in the small claims court;
(2) Failed to file a motion, answer, or counterclaim in the district court; and
(3) Failed to make any payment due under any applicable bond to stay execution of the judgment for possession, comply with any obligation set forth in the Bond to Stay Execution on Appeal of Summary Ejectment Judgment entered by the court.

The motion to dismiss the appeal shall list all of the deficiencies committed by the defendant, as described in subdivisions (1), (2), and (3) of this subsection, and shall state that the court will decide the motion to dismiss without a hearing if the defendant fails to respond within 10 days of receipt of the motion. The defendant may defeat the motion to dismiss by responding within 10 days of receipt of the motion by doing any of the following acts: (i) filing a responsive motion, answer, or counterclaim and serving the plaintiff with a copy thereof or (ii) paying the amount due under the bond to stay execution, if any amount is owed by the defendant. If the defendant is not required by law to make any payment under the bond to stay execution, the court shall not use the failure to make a payment as a basis to dismiss the appeal. The court shall review the file, determine whether the motion satisfies the requirements of this subsection, determine whether the defendant has made a sufficient response to defeat the motion, and shall enter an order resolving the matter without a hearing."

Once the State, a local government, or the specific business has announced a commitment by the business to expand or locate a specific project in this State or the business has made a final decision not to do so, of which the State or local government agency involved with the project knows or should know, and that the business will receive a discretionary incentive for the project pursuant to Chapter 143B of the General Statutes, the provisions of this subsection allowing public records to be withheld by the agency no longer apply. Once the provisions of this subsection no longer apply, the agency shall disclose as soon as practicable, and within 25 business days, public records requested for the announced project that are not otherwise made confidential by law. An announcement that a business or industrial project has committed to expand or locate in the State shall not require disclosure of local government records relating to the project if the business has not selected a specific location within the State for the project. Once a specific location for the project has been determined, local government records must be disclosed, upon request, in accordance with the provisions of this section. For purposes of this section, "local
government records" include records maintained by the State that relate to a local government's efforts to attract the project.

Records relating to the proposed expansion or location of specific business or industrial projects that are in the custody of the Department of Commerce or an entity with which the Department contracts pursuant to G.S. 143B-431A shall be treated as follows:

(1) Unless controlled by another subdivision of this subsection, the records may be withheld if their inspection, examination, or copying would frustrate the purpose for which the records were created.

(2) If no discretionary incentives pursuant to Chapter 143B of the General Statutes are requested for a project and if the specific business decides to expand or locate the project in the State, then the records relating to the project shall not be disclosed.

(2) The governmental unit finds that the energy savings resulting from the performance of the contract will equal or exceed the total cost of the contract.

744
(3) The energy conservation measures to be installed under the contract are for an existing building or utility system, or utility consuming device or equipment when the utility cost is paid by the governmental unit.

(b) Before entering into a guaranteed energy savings contract, the governmental unit shall provide published notice of the time and place or of the meeting at which it proposes to award the contract, the names of the parties to the proposed contract, and the contract's purpose. The notice must be published at least 15 days before the date of the proposed award or meeting.

However, if the State governmental unit terminates the project after the audit is conducted and the results of the audit are within ten percent (10%) of both the guaranteed savings contained in the proposal and the total proposal amount, the State governmental unit shall reimburse the qualified provider the reasonable cost incurred in conducting the audit, and the results of the audit shall become the property of the State governmental unit.

(g) A qualified provider shall provide an annual reconciliation statement based upon the results of the measurement and verification review. The agency shall submit the text of the proposed rule change, an analysis of the proposed rule change, and a fiscal note on the proposed rule change to the Office at the same time as the agency submits the notice of text for publication pursuant to G.S. 150B-21.2. The fiscal note must state the amount of funds that would be expended or distributed as a result of the proposed rule change and explain how the amount was computed. The Office of State Budget and Management must certify a proposed rule change if funds are available to cover the expenditure or distribution required by the proposed rule change.

(a1) DOT Analyses. – In addition to the requirements of subsection (a) of this section, any agency that adopts a rule affecting environmental permitting of Department of Transportation projects shall conduct an analysis to determine if the rule will result in an increased cost to the Department of Transportation. The analysis shall be conducted and submitted to the Board of Transportation when the agency submits the notice of text for publication. The agency shall consider any recommendations offered by the Board of Transportation prior to adopting the rule. Once a rule subject to this subsection is adopted, the Board of Transportation may submit any objection to the rule it may have to the Rules Review Commission. If the Rules Review Commission receives an objection to a rule from the Board of Transportation no later than 5:00 P.M. of the day following the day the Commission approves the rule, then the rule shall only become effective as provided in G.S. 150B-21.3(b1).

The agency must also obtain from the Office a certification that the agency adhered to the regulatory principles set forth in G.S. 150B-19.1(a)(2), (5), and (6). The agency may request the Office of State Budget and Management to prepare the fiscal note only after, working with the Office, it has exhausted all resources, internal and external, to otherwise prepare the required fiscal note. If an agency
requests the Office of State Budget and Management to prepare a fiscal note for a proposed rule change, that Office must prepare the note within 90 days after receiving a written request for the note. If the Office of State Budget and Management fails to prepare a fiscal note within this time period, the agency proposing the rule change shall prepare a fiscal note. A fiscal note prepared in this circumstance does not require approval of the Office of State Budget and Management.

If an agency prepares the required fiscal note, the agency must submit the note to the Office of State Budget and Management for review. The Office of State Budget and Management shall review the fiscal note within 14 days after it is submitted and either approve the note or inform the agency in writing of the reasons why it does not approve the fiscal note. After addressing these reasons, the agency may submit the revised fiscal note to that Office for its review. If an agency is not sure whether a proposed rule change would have a substantial economic impact, the agency shall ask the Office of State Budget and Management to determine whether the proposed rule change has a substantial economic impact. Failure to prepare or obtain approval of the fiscal note as required by this subsection shall be a basis for objection to the rule under G.S. 150B-21.9(a)(4).

As used in this subsection, the term "substantial economic impact" means an aggregate financial impact on all persons affected of at least one million dollars ($1,000,000) in a 12-month period. In analyzing substantial economic impact, an agency shall do the following:

The analysis should include direct costs as well as opportunity costs. Cost estimates must be monetized to the greatest extent possible. Where costs are not monetized, they must be listed and described.
(5) For costs that occur in the future, the agency shall determine the net present value of the costs by using a discount factor of seven percent (7%).

(b2) Content. – A fiscal note required by subsection (b1) of this section must contain the following:

If the Commission makes a final decision in a contested case, as appropriate, no action may be taken during that time that would be unlawful in the absence of a permit.

(d) A permit challenged under subsection (b) of this section remains in effect unless a stay is issued by the administrative law judge as set forth in G.S. 150B-33 or by a reviewing court as set forth in G.S. 150B-48."

1. Standardize the provision of review and comments on Regulatory Submittals so that revisions or requests for additional information that are required by the Regulatory Authority in order to proceed with the permit, license, or approval are clearly delineated from revisions or requests for additional information that constitute suggestions or recommendations by the Regulatory Authority. For purposes of this subdivision, "suggestions or recommendations by the Regulatory Authority" means comments made by the reviewer of the Regulatory Submittal to the Submitting Party that make a suggestion or recommendation for consideration by the Submitting Party but that are not required by the Regulatory Authority in order to proceed with the permit, license, or approval.

This review should first be conducted by the reviewing employee's supervisor or, in the case of a Regulatory Authority that is a unit of local government, either the reviewing employee's supervisor or the delegating or approving State agency. If this initial review was not conducted by a Professional Engineer, then the Submitting Party may request review by (i) a Professional Engineer on the staff of the Regulatory Authority or (ii) the delegating or approving State agency in the case of a Regulatory Authority that is a unit of local government. If the Regulatory Authority or delegating or approving State agency does not employ a Professional Engineer qualified and competent to...
perform the review, it may provide for review by a consulting Professional Engineer selected from a list developed and maintained by the Regulatory Authority. The Regulatory Authority may charge the Submitting Party for the costs of the review by the consulting Professional Engineer. Nothing in this subdivision is intended to limit the authority of the Regulatory Authority to make a final decision with regard to a Regulatory Submittal following the reviews described in this subdivision.

(2) A disagreement between the reviewer of the Regulatory Submittal and the Submitting Party regarding whether the statutory or regulatory authority identified by the Regulatory Authority for revisions or requests for additional information designated as "required" under the procedures set forth in Section 29(b) of this act justifies a required change.

(1) Review the Working Job Titles of every employee with job duties that include the review of Regulatory Submittals.
(2) Propose revisions to the Working Job Titles identified under subdivision (1) of this subsection or other administrative measures that will eliminate the public identification as "engineers" of persons reviewing Regulatory Submittals who are not Professional Engineers.

SECTION 29.(i) Initial Report. – Each Regulatory Authority shall report to the Environmental Review Commission prior to the convening of the 2015 Regular Session of the 2015 General Assembly on implementation of the following, if applicable:

(3) Funding. – The plan should include a request for appropriations sufficient to provide funds for the construction of appropriate bottom habitat and shellfish seeding and for Division staff necessary to conduct oyster restoration and monitoring activities. The plan should provide that, whenever possible, construction and shellfish seeding be carried out by contract with private entities.

(4) Commercial fisherman relief. – To promote the diversification of commercial fishing opportunities, the plan should include a program to award free or discounted leases under this section to commercial fishermen who (i) have held one or more commercial fishing licenses continually for a period of 10 or more years and (ii) receive at least fifty percent (50%) of their income from commercial fishing with those licenses.

(5) Recommendations. – The plan should include recommendations for statutory or regulatory changes needed to expedite the expansion of shellfish restoration and harvesting in order to improve water quality, restore ecological habitats, and expand the coastal economy.

The Department shall report its findings and recommendations to the Environmental Review Commission on or before November 1, 2014.
SECTION 54.(e) This section is effective when it becomes law. Section 54(b) of this act expires on the date that rules adopted pursuant to Section 54(c) of this act become effective.

PART I. PROHIBIT RECOVERY OF COSTS RELATED TO UNLAWFUL DISCHARGES FROM COAL COMBUSTION RESIDUALS SURFACE IMPOUNDMENTS; MORATORIUM ON RATE CASES

SECTION 1.(a) Article 7 of Chapter 62 of the General Statutes is amended by adding a new section to read:

"§ 62-133.13. Recovery of costs related to unlawful discharges from coal combustion residuals surface impoundments to the surface waters of the State.

The Commission shall not allow an electric public utility to recover from the retail electric customers of the State costs resulting from an unlawful discharge to the surface waters of the State from a coal combustion residuals surface impoundment, unless the Commission determines the discharge was due to an event of force majeure. For the purposes of this section, "coal combustion residuals surface impoundments" has the same meaning as in G.S. 130A-309.201. For the purposes of this section, "unlawful discharge" means a discharge that results in a violation of State or federal surface water quality standards."

SECTION 1.(b) Section 1(a) of this act is effective when it becomes law and applies to discharges occurring on or after January 1, 2014.

SECTION 2.(a) Moratorium on Cost Recovery. – The Utilities Commission shall not issue an order authorizing an electric public utility the recovery of any costs related to coal combustion residuals surface impoundments that were not included in the utility's cost of service approved in its most recent general rate case until the end of the moratorium provided in this section. Nothing in this section prohibits the utility from seeking, nor prohibits the Commission from authorizing under its existing authority, a deferral for costs related to coal ash combustion residual surface impoundments. The moratorium established under this section shall not apply to the net recovery of any fuel and fuel-related costs under G.S. 62-133.2. For the purposes of this section, "coal combustion residuals surface impoundments" has the same meaning as in G.S. 130A-309.201. The moratorium in this section shall end January 15, 2015.

SECTION 2.(b) Purpose of Moratorium. – The purpose of the moratorium is to allow the State to study the disposition of coal combustion residuals surface impoundments, including any final rules adopted by the United States Environmental Protection Agency on the regulation of coal combustion residuals.

PART II. PROVISIONS FOR COMPREHENSIVE MANAGEMENT OF COAL COMBUSTION RESIDUALS

SECTION 3.(a) Article 9 of Chapter 130A of the General Statutes is amended by adding a new Part to read:

"Part 21. Coal Ash Management

"§ 130A-309.200. Title.
This Part may be cited as the "Coal Ash Management Act of 2014."

"§ 130A-309.201. Definitions.
Unless a different meaning is required by the context, the definitions of G.S. 130A-290 and the following definitions apply throughout this Part:

(1) "Beneficial and beneficial use" means projects promoting public health and environmental protection, offering equivalent success relative to other alternatives, and preserving natural resources.

(2) "Boiler slag" means the molten bottom ash collected at the base of slag tap and cyclone type furnaces that is quenched with water. It is made up of hard, black, angular particles that have a smooth, glassy appearance.

(3) "Bottom ash" means the agglomerated, angular ash particles formed in pulverized coal furnaces that are too large to be carried in the flue gases and
"Coal combustion products" means fly ash, bottom ash, boiler slag, or flue gas desulfurization materials that are beneficially used, including use for structural fill.

"Coal combustion residuals" has the same meaning as defined in G.S. 130A-290.

"Coal combustion residuals surface impoundment" means a topographic depression, excavation, or diked area that is (i) primarily formed from earthen materials; (ii) without a base liner approved for use by Article 9 of Chapter 130A of the General Statutes or rules adopted thereunder for a combustion products landfill or coal combustion residuals landfill, industrial landfill, or municipal solid waste landfill; and (iii) designed to hold accumulated coal combustion residuals in the form of liquid wastes, wastes containing free liquids, or sludges, and that is not backfilled or otherwise covered during periods of deposition. "Coal combustion residuals surface impoundment" shall only include impoundments owned by a public utility, as defined in G.S. 62-3. "Coal combustion residuals surface impoundment" includes all of the following:

a. An impoundment that is dry due to the deposited liquid having evaporated, volatilized, or leached.

b. An impoundment that is wet with exposed liquid.

c. Lagoons, ponds, aeration pits, settling ponds, tailings ponds, and sludge pits, when these structures are designed to hold accumulated coal combustion residuals.

d. A coal combustion residuals surface impoundment that has been covered with soil or other material after the final deposition of coal combustion residuals at the impoundment.

"Commission" means the Environmental Management Commission.

"Fly ash" means the very fine, powdery material, composed mostly of silica with nearly all particles spherical in shape, which is a product of burning finely ground coal in a boiler to produce electricity and is removed from the plant exhaust gases by air emission control devices.

"Flue gas desulfurization material" means the material produced through a process used to reduce sulfur dioxide emissions from the exhaust gas system of a coal-fired boiler. The physical nature of these materials varies from a wet sludge to a dry powdered material, depending on the process, and their composition comprises either sulfites, sulfates, or a mixture thereof.

"Minerals" means soil, clay, coal, phosphate, metallic ore, and any other material or substance of commercial value found in natural deposits on or in the earth.

"Open pit mine" means an excavation made at the surface of the ground for the purpose of extracting minerals, inorganic and organic, from their natural deposits, which excavation is open to the surface.

"Owner" or "owner of a coal combustion residuals surface impoundment" means a public utility, as defined in G.S. 62-3, that owns a coal combustion residuals surface impoundment.

"Receptor" means any human, plant, animal, or structure which is, or has the potential to be, affected by the release or migration of contaminants. Any well constructed for the purpose of monitoring groundwater and contaminant concentrations shall not be considered a receptor.

"Structural fill" means an engineered fill with a projected beneficial end use constructed using coal combustion products that are properly placed and
compacted. For purposes of this Part, the term includes fill used to reclaim open pit mines and for embankments, greenscapes, foundations, construction foundations, and for bases or sub-bases under a structure or a footprint of a paved road, parking lot, sidewalk, walkway, or similar structure.

(15) "Use or reuse of coal combustion products" means the procedure whereby coal combustion products are directly used as either of the following:
   a. As an ingredient in an industrial process to make a product, unless distinct components of the coal combustion products are recovered as separate end products.
   b. In a function or application as an effective substitute for a commercial product or natural resource.

(a) Creation. – In recognition of the complexity and magnitude of the issues associated with the management of coal combustion residuals and the proper closure and remediation of coal combustion residuals surface impoundments, the Coal Ash Management Commission is hereby established.

"§ 130A-309.203. Expedited permit review.

(a) The Department shall act as expeditiously as practicable, but no later than the deadlines established under subsection (b) of this section, except in compliance with subsection (c) of this section, to issue all permits necessary to conduct activities required by this Part.

(b) Notwithstanding G.S. 130A-295.8(e), the Department shall determine whether an application for any permit necessary to conduct activities required by this Part is complete within 30 days after the Department receives the application for the permit. A determination of completeness means that the application includes all required components but does not mean that the required components provide all of the information that is required for the Department to make a decision on the application. If the Department determines that an application is not complete, the Department shall notify the applicant of the components needed to complete the application. An applicant may submit additional information to the Department to cure the deficiencies in the application. The Department shall make a final determination as to whether the application is complete within the later of (i) 30 days after the Department receives the application for the permit less the number of days that the applicant uses to provide the additional information or (ii) 10 days after the Department receives the additional information from the applicant. The Department shall issue a draft permit decision on an application for a permit within 90 days after the Department determines that the application is complete. The Department shall hold a public hearing and accept written comment on the draft permit decision for a period of not less than 30 or more than 60 days after the Department issues a draft permit decision. The Department shall issue a final permit decision on an application for a permit within 60 days after the comment period on the draft permit decision closes. If the Department fails to act within any time period set out in this subsection, the applicant may treat the failure to act as a denial of the permit and may challenge the denial as provided in Chapter 150B of the General Statutes.

(c) If the Department finds that compliance with the deadlines established under subsection (b) of this section would result in insufficient review of a permit application that would pose a risk to public health, safety, and welfare; the environment; or natural resources, the applicable deadline shall be waived for the application as necessary to allow for adequate review. If a deadline is waived pursuant to this subsection, the Secretary shall issue a written declaration, including findings of fact, documenting the need for the waiver.
(d) Notwithstanding any other provision of this section or any other provision of law, the Department shall either issue or deny a permit required for dewatering of a retired impoundment within 90 days of receipt of a completed application, in such a form and including such information as the Department may prescribe, for the dewatering activities. The Department shall accept written comment on a draft permit decision for a period of not less than 30 days or more than 60 days prior to issuance or denial of such a permit. If the Department fails to act within any time period set out in this subsection, the applicant may treat the failure to act as a denial of the permit and may challenge the denial as provided in Chapter 150B of the General Statutes.

"§ 130A-309.204. Reports.

(a) The Department shall submit quarterly written reports to the Environmental Review Commission and the Coal Ash Management Commission on its operations, activities, programs, and progress with respect to its obligations under this Part concerning all coal combustion residuals surface impoundments. At a minimum, the report shall include information concerning the status of assessment, corrective action, prioritization, and closure for each coal combustion residuals surface impoundment and information on costs connected therewith. The report shall include an executive summary of each annual Groundwater Protection and Restoration Report submitted to the Department by the operator of any coal combustion residuals surface impoundments pursuant to G.S. 130A-309.209(d) and a summary of all groundwater sampling, protection, and restoration activities related to the impoundment for the preceding year. The report shall also include an executive summary of each annual Surface Water Protection and Restoration Report submitted to the Department by the operator of any coal combustion residuals surface impoundments pursuant to G.S. 130A-309.210(e) and a summary of all surface water sampling, protection, and restoration activities related to the impoundment for the preceding year, including the status of the identification, assessment, and correction of unpermitted discharges from coal combustion residuals surface impoundments to the surface waters of the State. The Department shall supplement the written reports required by this subsection with additional written and oral reports as may be requested by the Environmental Review Commission. The Department shall submit the written reports required by this subsection whether or not the General Assembly is in session at the time the report is due.

(b) On or before October 1 of each year, the Department shall report to each member of the General Assembly who has a coal combustion residuals surface impoundment in the member's district. This report shall include the location of each impoundment in the member's district, the amount of coal combustion residuals known or believed to be located in the impoundment, the last action taken at the impoundment, and the date of that last action.

(c) On or before October 1 of each year, a public utility generating coal combustion residuals and coal combustion products shall submit an annual summary to the Department. The annual summary shall be for the period of July 1 through June 30 and shall include all of the following:

1. The volume of coal combustion residuals and products produced.
2. The volume of coal combustion residuals disposed.
3. The volume of coal combustion products used in structural fill projects.
4. The volume of coal combustion products beneficially used, other than for structural fill.

"§ 130A-309.205. Local ordinances regulating management of coal combustion residuals and coal combustion products invalid; petition to preempt local ordinance.

(a) It is the intent of the General Assembly to maintain a uniform system for the management of coal combustion residuals and coal combustion products, including matters of disposal and beneficial use, and to place limitations upon the exercise by all units of local government in North Carolina of the power to regulate the management of coal combustion residuals and coal combustion products by means of ordinances, property restrictions, zoning regulations, or otherwise. Notwithstanding any authority granted to counties, municipalities, or
other local authorities to adopt local ordinances, including those imposing taxes, fees, or charges or regulating health, environment, or land use, all provisions of local ordinances, including those regulating land use, adopted by counties, municipalities, or other local authorities that regulate or have the effect of regulating the management of coal combustion residuals and coal combustion products, including regulation of carbon burn-out plants, within the jurisdiction of a local government are invalidated, to the extent necessary to effectuate the purposes of this Part, that do the following:

1. Place any restriction or condition not placed by this Part upon management of coal combustion residuals or coal combustion products within any county, city, or other political subdivision.

2. Conflict or are in any manner inconsistent with the provisions of this Part.

(b) If a local zoning or land-use ordinance imposes requirements, restrictions, or conditions that are generally applicable todevelopment, including, but not limited to, setback, buffer, and stormwater requirements, and coal combustion residuals and coal combustion products would be regulated under the ordinance of general applicability, the operator of the proposed activities may petition the Environmental Management Commission to review the matter. After receipt of a petition, the Commission shall hold a hearing in accordance with the procedures in subsection (c) of this section and shall determine whether or to what extent to preempt the local ordinance to allow for the management of coal combustion residuals and coal combustion products.

(c) When a petition described in subsection (b) of this section has been filed with the Environmental Management Commission, the Commission shall hold a public hearing to consider the petition. The public hearing shall be held in the affected locality within 60 days after receipt of the petition by the Commission. The Commission shall give notice of the public hearing by both of the following means:

1. Publication in a newspaper or newspapers having general circulation in the county or counties where the activities are to be conducted, once a week for three consecutive weeks, the first notice appearing at least 30 days prior to the scheduled date of the hearing.

2. First-class mail to persons who have requested notice. The Commission shall maintain a mailing list of persons who request notice in advance of the hearing pursuant to this section. Notice by mail shall be complete upon deposit of a copy of the notice in a postage-paid wrapper addressed to the person to be notified at the address that appears on the mailing list maintained by the Commission in a post office or official depository under the exclusive care and custody of the United States Postal Service.

(d) Any interested person may appear before the Environmental Management Commission at the hearing to offer testimony. In addition to testimony before the Commission, any interested person may submit written evidence to the Commission for the Commission's consideration. At least 20 days shall be allowed for receipt of written comment following the hearing.

(e) A local zoning or land-use ordinance is presumed to be valid and enforceable to the extent the zoning or land-use ordinance imposes requirements, restrictions, or conditions that are generally applicable to development, including, but not limited to, setback, buffer, and stormwater requirements, unless the Environmental Management Commission makes a finding of fact to the contrary. The Commission shall determine whether or to what extent to preempt local ordinances so as to allow the project involving management of coal combustion residuals and coal combustion products no later than 60 days after conclusion of the hearing. The Commission shall preempt a local ordinance only if the Commission makes all of the following findings:

1. That there is a local ordinance that would regulate the management of coal combustion residuals and coal combustion products.
(2) That all legally required State and federal permits or approvals have been issued by the appropriate State and federal agencies or that all State and federal permit requirements have been satisfied and that the permits or approvals have been denied or withheld only because of the local ordinance.

(3) That local citizens and elected officials have had adequate opportunity to participate in the permitting process.

(4) That the project involving management of coal combustion residuals and coal combustion products will not pose an unreasonable health or environmental risk to the surrounding locality and that the operator has taken or consented to take reasonable measures to avoid or manage foreseeable risks and to comply to the maximum feasible extent with applicable local ordinances.

(f) If the Environmental Management Commission does not make all of the findings under subsection (e) of this section, the Commission shall not preempt the challenged local ordinance. The Commission's decision shall be in writing and shall identify the evidence submitted to the Commission plus any additional evidence used in arriving at the decision.

(g) The decision of the Environmental Management Commission shall be final, unless a party to the action files a written appeal under Article 3 of Chapter 150B of the General Statutes, as modified by this section, within 30 days of the date of the decision. The record on appeal shall consist of all materials and information submitted to or considered by the Commission, the Commission's written decision, a complete transcript of the hearing, the specific findings required by subsection (e) of this section, and any minority positions on the specific findings required by subsection (e) of this section. The scope of judicial review shall be as set forth in G.S. 150B-51, except as this subsection provides regarding the record on appeal.

(h) If the court reverses or modifies the decision of the Environmental Management Commission, the judge shall set out in writing, which writing shall become part of the record, the reasons for the reversal or modification.

(i) In computing any period of time prescribed or allowed by the procedure in this section, the provisions of Rule 6(a) of the Rules of Civil Procedure, G.S. 1A-1, shall apply.

“§ 130A-309.206. Federal preemption; severability.
The provisions of this Part shall be severable, and if any phrase, clause, sentence, or provision is declared to be unconstitutional or otherwise invalid or is preempted by federal law or regulation, the validity of the remainder of this Part shall not be affected thereby.

“§ 130A-309.207. General rule making for Part.
The Environmental Management Commission shall adopt rules as necessary to implement the provisions of the Part. Such rules shall be exempt from the requirements of G.S. 150B-19.3.

“§ 130A-309.208. Generation, disposal, and use of coal combustion residuals.

(a) On or after October 1, 2014, the construction of new and expansion of existing coal combustion residuals surface impoundments is prohibited.

(b) On or after October 1, 2014, the disposal of coal combustion residuals into a coal combustion residuals surface impoundment at an electric generating facility where the coal-fired generating units are no longer producing coal combustion residuals is prohibited.

(c) On or after December 31, 2018, the discharge of stormwater into a coal combustion surface impoundment at an electric generating facility where the coal-fired generating units are no longer producing coal combustion residuals is prohibited.

(d) On or after December 31, 2019, the discharge of stormwater into a coal combustion surface impoundment at an electric generating facility where the coal-fired generating units are actively producing coal combustion residuals is prohibited.

(e) On or before December 31, 2018, all electric generating facilities owned by a public utility shall convert to the disposal of “dry” fly ash or the facility shall be retired. For purposes of this subsection, the term “dry” means coal combustion residuals that are not in the form of liquid wastes, wastes containing free liquids, or sludges.
(f) On or before December 31, 2019, all electric generating facilities owned by a public utility shall convert to the disposal of "dry" bottom ash or the facility shall be retired. For purposes of this subsection, the term "dry" means coal combustion residuals that are not in the form of liquid wastes, wastes containing free liquids, or sludges.

§ 130A-309.209. Groundwater assessment and corrective action; drinking water supply well survey and provision of alternate water supply; reporting.

(a) Groundwater Assessment of Coal Combustion Residuals Surface Impoundments. – The owner of a coal combustion residuals surface impoundment shall conduct groundwater monitoring and assessment as provided in this subsection. The requirements for groundwater monitoring and assessment set out in this subsection are in addition to any other groundwater monitoring and assessment requirements applicable to the owners of coal combustion residuals surface impoundments.

(1) No later than December 31, 2014, the owner of a coal combustion residuals surface impoundment shall submit a proposed Groundwater Assessment Plan for the impoundment to the Department for its review and approval. The Groundwater Assessment Plan shall, at a minimum, provide for all of the following:
   a. A description of all receptors and significant exposure pathways.
   b. An assessment of the horizontal and vertical extent of soil and groundwater contamination for all contaminants confirmed to be present in groundwater in exceedance of groundwater quality standards.
   c. A description of all significant factors affecting movement and transport of contaminants.
   d. A description of the geological and hydrogeological features influencing the chemical and physical character of the contaminants.
   e. A schedule for continued groundwater monitoring.
   f. Any other information related to groundwater assessment required by the Department.

(2) The Department shall approve the Groundwater Assessment Plan if it determines that the Plan complies with the requirements of this subsection and will be sufficient to protect public health, safety, and welfare; the environment; and natural resources.

(3) No later than 10 days from approval of the Groundwater Assessment Plan, the owner shall begin implementation of the Plan.

(4) No later than 180 days from approval of the Groundwater Assessment Plan, the owner shall submit a Groundwater Assessment Report to the Department. The Report shall describe all exceedances of groundwater quality standards associated with the impoundment.

(b) Corrective Action for the Restoration of Groundwater Quality. – The owner of a coal combustion residuals surface impoundment shall implement corrective action for the restoration of groundwater quality as provided in this subsection. The requirements for corrective action for the restoration of groundwater quality set out in this subsection are in addition to any other corrective action for the restoration of groundwater quality requirements applicable to the owners of coal combustion residuals surface impoundments.

(1) No later than 90 days from submission of the Groundwater Assessment Report required by subsection (a) of this section, or a time frame otherwise approved by the Department not to exceed 180 days from submission of the Groundwater Assessment Report, the owner of the coal combustion residuals surface impoundment shall submit a proposed Groundwater Corrective Action Plan to the Department for its review and approval. The Groundwater Corrective Action Plan shall provide for the restoration of groundwater in conformance with the requirements of Subchapter L of Chapter 2 of Title
15A of the North Carolina Administrative Code. The Groundwater Corrective Action Plan shall include, at a minimum, all of the following:

a. A description of all exceedances of the groundwater quality standards, including any exceedances that the owner asserts are the result of natural background conditions.

b. A description of the methods for restoring groundwater in conformance with the requirements of Subchapter L of Chapter 2 of Title 15A of the North Carolina Administrative Code and a detailed explanation of the reasons for selecting these methods.

c. Specific plans, including engineering details, for restoring groundwater quality.

d. A schedule for implementation of the Plan.

e. A monitoring plan for evaluating the effectiveness of the proposed corrective action and detecting movement of any contaminant plumes.

f. Any other information related to groundwater assessment required by the Department.

(2) The Department shall approve the Groundwater Corrective Action Plan if it determines that the Plan complies with the requirements of this subsection and will be sufficient to protect public health, safety, and welfare; the environment; and natural resources.

(3) No later than 30 days from the approval of the Groundwater Corrective Action Plan, the owner shall begin implementation of the Plan in accordance with the Plan's schedule.

c. Drinking Water Supply Well Survey and Provision of Alternate Water Supply. – No later than October 1, 2014, the owner of a coal combustion residuals surface impoundment shall conduct a Drinking Water Supply Well Survey that identifies all drinking water supply wells within one-half mile down-gradient from the established compliance boundary of the impoundment and submit the Survey to the Department. The Survey shall include well locations, the nature of water uses, available well construction details, and information regarding ownership of the wells. No later than December 1, 2014, the Department shall determine, based on the Survey, which drinking water supply wells the owner is required to sample and how frequently and for what period sampling is required. The Department shall require sampling for drinking water supply wells where data regarding groundwater quality and flow and depth in the area of any surveyed well provide a reasonable basis to predict that the quality of water from the surveyed well may be adversely impacted by constituents associated with the presence of the impoundment. No later than January 1, 2015, the owner shall initiate sampling and water quality analysis of the drinking water supply wells. A property owner may elect to have an independent third party selected from a laboratory certified by the Department's Wastewater/Groundwater Laboratory Certification program sample wells located on their property in lieu of sampling conducted by the owner of the coal combustion residuals surface impoundment. The owner of the coal combustion residuals surface impoundment shall pay for the reasonable costs of such sampling. Nothing in this subsection shall be construed to preclude or impair the right of any property owner to refuse such sampling of wells on their property. If the sampling and water quality analysis indicates that water from a drinking water supply well exceeds groundwater quality standards for constituents associated with the presence of the impoundment, the owner shall replace the contaminated drinking water supply well with an alternate supply of potable drinking water and an alternate supply of water that is safe for other household uses. The alternate supply of potable drinking water shall be supplied within 24 hours of the Department's determination that there is an exceedance of groundwater quality standards attributable to constituents associated with the presence of the impoundment. The alternate supply of water that is safe for other household uses shall be supplied within 30 days of the Department's determination that there is an exceedance of groundwater quality standards.
attributable to constituents associated with the presence of the impoundment. The requirement to replace a contaminated drinking water supply well with an alternate supply of potable drinking water and an alternate supply of water that is safe for other household uses set out in this subsection is in addition to any other requirements to replace a contaminated drinking water supply well with an alternate supply of potable drinking water or an alternate supply of water that is safe for other household uses applicable to the owners of coal combustion residuals surface impoundments.

(d) Reporting. – In addition to any other reporting required by the Department, the owner of a coal combustion residuals surface impoundment shall submit an annual Groundwater Protection and Restoration Report to the Department no later than January 31 of each year. The Report shall include a summary of all groundwater monitoring, protection, and restoration activities related to the impoundment for the preceding year, including the status of the Groundwater Assessment Plan, the Groundwater Assessment Report, the Groundwater Corrective Action Plan, the Drinking Water Supply Well Survey, and the replacement of any contaminated drinking water supply wells. The owner of a coal combustion residuals surface impoundment shall also submit all information required to be submitted to the Department pursuant to this section to the Coal Ash Management Commission.

(a) Identification of Discharges from Coal Combustion Residuals Surface Impoundments. – The owner of a coal combustion residuals surface impoundment shall identify all discharges from the impoundment as provided in this subsection. The requirements for identifying all discharges from an impoundment set out in this subsection are in addition to any other requirements for identifying discharges applicable to the owners of coal combustion residuals surface impoundments.

(1) No later than December 31, 2014, the owner of a coal combustion residuals surface impoundment shall submit a topographic map that identifies the location of all (i) outfalls from engineered channels designed or improved for the purpose of collecting water from the toe of the impoundment and (ii) seeps and weeps discharging from the impoundment that are not captured by engineered channels designed or improved for the purpose of collecting water from the toe of the impoundment to the Department. The topographic map shall comply with all of the following:
   a. Be at a scale as required by the Department.
   b. Specify the latitude and longitude of each toe drain outfall, seep, and weep.

Prior to closure, the Department may allow the disposal of coal combustion residuals, in addition to those originally contained in the impoundment, to the landfill constructed pursuant to this sub-subdivision, if the Department determines that the site is suitable for additional capacity and that disposal of additional coal combustion residuals will not pose an unacceptable risk to public health, safety, welfare, the environment, and natural resources.
   b. Remove all coal combustion residuals from the impoundment, return the former impoundment to a nonerosive and stable condition and (i) transfer the coal combustion residuals for disposal in a coal combustion residuals landfill, industrial landfill, or municipal solid waste landfill.

be increased by the Department upon a determination that a longer period is necessary to protect public health, safety, welfare; the environment; and natural resources, or decreased upon a determination that a shorter period is sufficient to protect public health, safety, welfare; the environment; and natural resources. The Department may require implementation of any other measure it deems necessary to protect public health, safety, and welfare; the environment; and natural resources, including imposition of institutional controls that are sufficient to protect public health, safety, and welfare; the environment; and natural resources. The Department may not approve closure for an impoundment pursuant to sub-subdivision b. of subdivision (3) of this subsection unless the Department finds that the proposed closure plan includes design measures to prevent, upon the plan’s full implementation, post-closure exceedances of groundwater quality standards beyond the compliance boundary that are attributable to constituents associated with the presence of the impoundment.

Modifications to an approved Closure Plan may only be allowed in conformance with the requirements of this Part, upon written request of an owner of an impoundment, with the written approval of the Department, and after public notice of the change in accordance with the requirements of subdivision (2) of subsection (b) of this section. Provided, however, minor technical modifications may be made in accordance with standard Department procedures for such minor modifications and may be made without written approval of the Department or public notice of the change.

(f) Nothing in this section shall be construed to obviate the need for sampling, remediation, and monitoring activities at the site as required by G.S. 130A-309.209 and G.S. 130A-309.310.

§ 130A-309.213. Variance authority.

(a) In recognition of the complexity and magnitude of the issues surrounding the management of coal combustion residuals and coal combustion residuals surface impoundments, the General Assembly authorizes the Commission to grant a variance to extend any deadline for closure of an impoundment established under G.S. 130A-309.212 in conformance with the requirements of this section. To request such a variance the owner of an impoundment shall, no earlier than two years prior to the applicable deadline, submit an application in a form acceptable to the Department which shall include, at a minimum, all of the following information: identification of the site, applicable requirements, and applicable...
deadlines for which a variance is sought, and the site-specific circumstances that support the need for the variance. The owner of the impoundment shall also provide detailed information that demonstrates (i) the owner has substantially complied with all other requirements and deadlines established by this Part; (ii) the owner has made good faith efforts to comply with the applicable deadline for closure of the impoundment; and (iii) that compliance with the deadline cannot be achieved by application of best available technology found to be economically reasonable at the time and would produce serious hardship without equal or greater benefits to the public. As soon as practicable, but no later than 60 days from receipt of an application, the Secretary shall evaluate the information submitted in conjunction with the application, and any other information the Secretary deems relevant, to determine whether the information supports issuance of a variance. After such evaluation, if the Secretary finds that the information supports issuance of a variance from the deadline, the Secretary shall issue a proposed variance. Within 10 days after a proposed variance has been issued, the Secretary shall issue a written declaration, including findings of fact, documenting the proposed variance. The Department shall provide for public participation on the proposed variance in the manner provided by G.S. 130A-309.212(b) and shall take the public input received through the process into account in its decision concerning the proposed variance. Within 30 days of the receipt of all public input received, the Department shall submit a proposed variance to the Coal Ash Management Commission. The Commission shall evaluate all information submitted in accordance with this section and any other information the Commission deems relevant. The Commission shall only approve a variance if it determines that compliance with the deadline cannot be achieved by application of best available technology found to be economically reasonable at the time and would produce serious hardship without equal or greater benefits to the public. The Commission shall issue its determination in writing, including findings in support of its determination. If the Commission fails to act on a variance request within 60 days of receipt, the variance shall be deemed denied. Parties aggrieved by a final decision of the Commission pursuant to this subsection may appeal the decision as provided under Article 3 of Chapter 150B of the General Statutes.

(b) A variance granted pursuant to this section shall not extend a deadline for closure of an impoundment more than three years beyond the date applicable to the impoundment as provided under G.S. 130A-309.212.

(c) No more than one variance may be granted pursuant to this section per impoundment.

"Subpart 3. Use of Coal Combustion Products in Structural Fill.

§ 130A-309.214. Applicability.

§ 130A-309.216. Design, construction, and siting requirements for projects using coal combustion products for structural fill.

(a) Design, Construction, and Operation of Structural Fill Sites. –

(1) A structural fill site must be designed, constructed, operated, closed, and maintained in such a manner as to minimize the potential for harmful release of constituents of coal combustion residuals to the environment or create a nuisance to the public.

(2) Coal combustion products shall be collected and transported in a manner that will prevent nuisances and hazards to public health and safety. Coal combustion products shall be moisture conditioned, as necessary, and transported in covered trucks to prevent dusting.

(3) Coal combustion products shall be placed uniformly and shall be compacted to standards, including in situ density, compaction effort, and relative

(4) Equipment shall be provided that is capable of placing and compacting the coal combustion products and handling the earthwork required during the periods that coal combustion products are received at the fill project.

(5) The coal combustion product structural fill project shall be effectively maintained and operated as a nondischarge system to prevent discharge to surface water resulting from the project.

(6) The coal combustion product structural fill project shall be effectively maintained and operated to ensure no violations of groundwater standards adopted by the Commission pursuant to Article 21 of Chapter 143 of the General Statutes due to the project.

(7) Surface waters resulting from precipitation shall be diverted away from the active coal combustion product placement area during filling and construction activity.

(8) Site development shall comply with the North Carolina Sedimentation Pollution Control Act of 1973, as amended.

(9) The coal combustion product structural fill project shall be effectively maintained and operated to ensure no violations of groundwater standards adopted by the Commission pursuant to Article 21 of Chapter 143 of the General Statutes due to the project.

(10) The coal combustion product structural fill project shall be effectively maintained and operated to ensure no violations of groundwater standards adopted by the Commission pursuant to Article 21 of Chapter 143 of the General Statutes due to the project.

(11) Compliance with this subsection shall not insulate any of the owners or operators of a structural fill project from claims for damages to surface waters, groundwater, or air resulting from the operation of the structural fill project. If the project fails to comply with the requirements of this section, the constructor, generator, owner, or operator shall notify the Department and shall take any immediate corrective action as may be required by the Department.

(b) Liners, Leachate Collection System, Cap, and Groundwater Monitoring System Required for Large Structural Fills. – For projects involving placement of 8,000 or more tons of coal combustion products per acre or 80,000 or more tons of coal combustion products in total per project shall have an encapsulation liner system. The encapsulation liner system shall be constructed on and around the structural fill and shall be designed to efficiently contain, collect, and remove leachate generated by the coal combustion products, as well as separate the coal combustion products from any exposure to surrounding environs. At a minimum, the components of the liner system shall consist of the following:

(1) A base liner, which shall consist of one of the following designs:

a. A composite liner utilizing a compacted clay liner. This composite liner is one liner that consists of two components: a geomembrane liner installed above and in direct and uniform contact with a compacted clay liner with a minimum thickness of 24 inches (0.61 m) and a permeability of no more than 1.0 x 10^-7 centimeters per second.

b. A composite liner utilizing a geosynthetic clay liner. This composite liner is one liner that consists of three components: a geomembrane liner installed above and in uniform contact with a geosynthetic clay liner overlying a compacted clay liner with a minimum thickness of 18 inches (0.46 m) and a permeability of no more than 1.0 x 10^-5 centimeters per second.
(2) A leachate collection system, which is constructed directly above the base liner and shall be designed to effectively collect and remove leachate from the project.

(3) A cap system that is designed to minimize infiltration and erosion as follows:
   a. The cap system shall be designed and constructed to (i) have a permeability less than or equal to the permeability of any base liner system or the in situ subsoils underlying the structural fill, or the permeability specified for the final cover in the effective permit, or a permeability no greater than $1 \times 10^{-5}$ centimeters per second, whichever is less; (ii) minimize infiltration through the closed structural fill by the use of a low-permeability barrier that contains a minimum 18 inches of earthen material; and (iii) minimize erosion of the cap system and protect the low-permeability barrier from root penetration by use of an erosion layer that contains a minimum of six inches of earthen material that is capable of sustaining native plant growth.
   b. The Department may approve an alternative cap system if the owner or operator can adequately demonstrate (i) the alternative cap system will achieve an equivalent or greater reduction in infiltration as the low-permeability barrier specified in sub-subdivision a. of this subdivision and (ii) the erosion layer will provide equivalent or improved protection as the erosion layer specified in sub-subdivision a. of this subdivision.

(4) A groundwater monitoring system, that shall be approved by the Department and, at a minimum, consists of all of the following:
   a. A sufficient number of wells, installed at appropriate locations and depths, to yield groundwater samples from the uppermost aquifer that represent the quality of groundwater passing the relevant point of compliance as approved by the Department. A down-gradient monitoring system shall be installed at the relevant point of compliance so as to ensure detection of groundwater contamination in the uppermost aquifer.
   b. A proposed monitoring plan, which shall be certified by a licensed geologist or professional engineer to be effective in providing early detection of any release of hazardous constituents from any point in a structural fill or leachate surface impoundment to the uppermost aquifer, so as to be protective of public health, safety, and welfare; the environment; and natural resources.
   c. A groundwater monitoring program, which shall include consistent sampling and analysis procedures that are designed to ensure monitoring results that provide an accurate representation of groundwater quality at the background and down-gradient wells. Monitoring shall be conducted through construction and the post-closure care period. The sampling procedures and frequency shall be protective of public health, safety, and welfare; the environment; and natural resources.

"§ 130A-309.217. Financial assurance requirements for large projects using coal combustion products for structural fill.

(a) For projects involving placement of 8,000 or more tons of coal combustion products per acre or 80,000 or more tons of coal combustion products in total per project, the applicant for a permit or a permit holder to construct or operate a structural fill shall establish financial assurance that will ensure that sufficient funds are available for facility closure, post-closure maintenance and monitoring, any corrective action that the Department may require, and to satisfy any potential liability for sudden and nonsudden accidental occurrences, and subsequent costs incurred by the Department in response to an incident at a structural fill project, even if the applicant or permit holder becomes insolvent or ceases to reside, be incorporated, do business, or maintain assets in the State.

(b) To establish sufficient availability of funds under this section, the applicant for a permit or a permit holder may use insurance, financial tests, third-party guarantees by persons who can pass the financial test, guarantees by corporate parents who can pass the financial test, irrevocable letters of credit, trusts, surety bonds, or any other financial device, or any combination of the foregoing shown to provide protection equivalent to the financial protection that would be provided by insurance if insurance were the only mechanism used.

(c) The applicant for a permit or a permit holder and any parent, subsidiary, or other affiliate of the applicant, permit holder, or parent, including any joint venturer with a direct or indirect interest in the applicant, permit holder, or parent shall be a guarantor of payment for closure, post-closure maintenance and monitoring, any corrective action that the Department may require, and to satisfy any potential liability for sudden and nonsudden accidental occurrences arising from the operation of the hazardous waste facility.

(d) Assets used to meet the financial assurance requirements of this section shall be in a form that will allow the Department to readily access funds for the purposes set out in this section. Assets used to meet financial assurance requirements of this section shall not be accessible to the permit holder except as approved by the Department.

(e) The Department may provide a copy of any filing that an applicant for a permit or a permit holder submits to the Department to meet the financial responsibility requirements under this section to the State Treasurer. The State Treasurer shall review the filing and provide the Department with a written opinion as to the adequacy of the filing to meet the purposes of this section, including any recommended changes.

(f) In order to continue to hold a permit for a structural fill, a permit holder must maintain financial responsibility as required by this Part and must provide any information
requested by the Department to establish that the permit holder continues to maintain financial responsibility.

(g) An applicant for a permit or a permit holder shall satisfy the Department that the applicant or permit holder has met the financial responsibility requirements of this Part before the Department is required to otherwise review the application.

§ 130A-309.218. Closure of projects using coal combustion products for structural fill.

(a) Closure of Structural Fill Projects. –

(1) No later than 30 working days or 60 calendar days, whichever is less, after coal combustion product placement has ceased, the final cover shall be applied over the coal combustion product placement area.

(2) The final surface of the structural fill shall be graded and provided with drainage systems that do all of the following:
   a. Minimize erosion of cover materials.
   b. Promote drainage of area precipitation, minimize infiltration, and prevent ponding of surface water on the structural fill.

(3) Other erosion control measures, such as temporary mulching, seeding, or silt barriers shall be installed to ensure no visible coal combustion product migration to adjacent properties until the beneficial end use of the project is realized.

(4) The constructor or operator shall submit a certification to the Department signed and sealed by a registered professional engineer or signed by the Secretary of the Department of Transportation or the Secretary's designee certifying that all requirements of this Subpart have been met. The report shall be submitted within 30 days of application of the final cover.

(b) Additional Closure and Post-Closure Requirements for Large Structural Fill Projects. – For projects involving placement of 8,000 or more tons of coal combustion products per acre or 80,000 or more tons of coal combustion products in total per project, a constructor or operator shall conduct post-closure care. Post-closure care shall be conducted for 30 years, which period may be increased by the Department upon a determination that a longer period is necessary to protect public health, safety, and welfare; the environment; and natural resources, or decreased upon a determination that a shorter period is sufficient to protect public health, safety, and welfare; the environment; and natural resources. Additional closure and post-closure requirements include, at a minimum, all of the following:

(1) Submit a written closure plan that includes all of the following:

the integrity of the cap system, base liner system, or any other components of the containment system or the function of the monitoring systems, unless necessary to comply with the requirements of this subsection. The Department may approve disturbance if the constructor or operator demonstrates that disturbance of the cap system, base liner system, or other component of the containment system will not increase the potential threat to public health, safety, and welfare; the environment; and natural resources.

d. The cost estimate for post-closure activities required under this section.

(3) Maintain the integrity and effectiveness of any cap system, including repairing the system as necessary to correct the defects of settlement, subsidence, erosion, or other events and preventing run-on and runoff from eroding or otherwise damaging the cap system.

(4) Maintain and operate the leachate collection system. The Department may allow the constructor or operator to stop managing leachate upon a satisfactory demonstration that leachate from the project no longer poses a threat to human health and the environment.

(5) Monitor and maintain the groundwater monitoring system in accordance with G.S. 130A-309.216 and monitor the surface water in accordance with 15A NCAC 13B .0602.

SECTION 4.(c) The use of coal combustion products (i) as structural fill as authorized by Section 4(b) of this act shall be conducted in accordance with the requirements of
Subpart 3 of Part 2I of Article 9 of the General Statutes, as enacted by Section 3(a) of this act, and (ii) for other beneficial uses shall be conducted in accordance with the requirements of Section .1700 of Subchapter B of Chapter 13 of Title 15A of the North Carolina Administrative Code (Requirements for Beneficial Use of Coal Combustion By-Products) and Section .1205 of Subchapter T of Chapter 2 of Title 15A of the North Carolina Administrative Code (Coal Combustion Products Management), as applicable.

SECTION 4.(d) The Department of Environment and Natural Resources and the Environmental Management Commission shall jointly review Subpart 3 of Part 2I of Article 9 of the General Statutes, as enacted by Section 3(a) of this act, and 15A NCAC 13B .1701, et seq. In conducting this review, the Department and Commission shall do all of the following:

1. Review the uses of coal combustion products as structural fill and the regulation of this use under Subpart 3 of Part 2I of Article 9 of the General Statutes, as enacted by Section 3(a) of this act, to determine if the requirements are sufficient to protect public health, safety, and welfare; the environment; and natural resources.

2. Review the uses of coal combustion products for other beneficial uses and the regulation of these uses under Section .1700 of Subchapter B of Chapter 13 of Title 15A of the North Carolina Administrative Code (Requirements for Beneficial Use of Coal Combustion By-Products) and Section .1200 of Subchapter T of Chapter 2 of Title 15A of the North Carolina Administrative Code (Coal Combustion Products Management), and other applicable rules, to determine if the rules are sufficient to protect public health, safety, and welfare; the environment; and natural resources.

3. Evaluate additional opportunities for the use of coal combustion products as structural fill and for other beneficial uses that would reduce the volume of coal combustion residuals that are being disposed of in coal combustion residuals landfills, industrial landfills, or municipal solid waste landfills while still being protective of public health, safety, and welfare; the environment; and natural resources.

4. Monitor any actions of the United States Environmental Protection Agency regarding the use of coal combustion products as structural fill or for other beneficial uses.

5. Jointly report to the Environmental Review Commission no later than January 15, 2015, on their findings and recommendations regarding the use of coal combustion products as structural fill and for other beneficial uses.

SECTION 4.(e) All electric generating facilities owned by a public utility that produce coal combustion residuals and coal combustion products shall issue a request for proposals on or before December 31, 2014, for (i) the conduct of a market analysis for the concrete industry and other industries that might beneficially use coal combustion residuals and coal combustion products; (ii) the study of the feasibility and advisability of installation of technology to convert existing and newly generated coal combustion residuals to commercial-grade coal combustion products suitable for use in the concrete industry and other industries that might beneficially use coal combustion residuals; and (iii) an examination of all innovative technologies that might be applied to diminish, recycle or reuse, or mitigate the impact of existing and newly generated coal combustion residuals. All electric generating facilities shall present the materials and information received in response to a request for proposals issued pursuant to this section and an assessment of the materials and information, including a forecast of specific actions to be taken in response to the materials and information received, to the Environmental Management Commission and the Coal Ash Management Commission on or before August 1, 2016.

SECTION 4.(f) This section is effective when it becomes law and applies to the use of coal combustion residuals as structural fill contracted for on or after that date.
SECTION 5.(a) There is hereby established a moratorium on construction of new or expansion of existing coal combustion residuals landfills, as defined by G.S. 130A-290(2c) and amended by Section 3(d) of this act. The purpose of this moratorium is to allow the State to assess the risks to public health, safety, and welfare; the environment; and natural resources of coal combustion residuals impoundments located beneath coal combustion residuals landfills to determine the advisability of continued operation of these landfills.

SECTION 5.(b) The Department of Environment and Natural Resources shall evaluate each coal combustion residuals landfill currently operating in the State and, in particular, assess the risks to public health, safety, and welfare; the environment; and natural resources, of coal combustion residuals surface impoundments located beneath coal combustion residuals landfills to determine the advisability of continued operation of these landfills. The Department shall report to the Environmental Review Commission no later than January 15, 2015, on its findings and recommendations concerning the risk assessment of each of these sites and the advisability of continued operation of coal combustion residuals landfills.

The Decommissioning Request shall include, at a minimum, all of the following:

(1) A proposed geotechnical investigation plan scope of work. Upon preliminary plan approval pursuant to subsection (b) of this section, the owner shall proceed with necessary field work and submit a geotechnical report with site-specific field data indicating that the containment dam and material impounded by the containment dam are stable, and that the impounded material is not subject to liquid flow behavior under expected static and dynamic loading conditions. Material testing should be performed along the full extent of the containment dam and in a pattern throughout the area of impounded material.

(2) A topographic map depicting existing conditions of the containment dam and impoundment area at two-foot contour intervals or less.

(3) If the facility contains areas capable of impounding by topography, a breach plan must be included that ensures that there shall be no place within the facility capable of impounding. The breach plan shall include, at a minimum, proposed grading contours superimposed on the existing topographic map as
well as necessary engineering calculations, construction details, and construction specifications.

(4) A permanent vegetation and stabilization or capping plan by synthetic liner or other means, if needed. These plans shall include at minimum, proposed grading contours superimposed on the existing topographic map where applicable as well as necessary engineering calculations, construction details, construction specifications, and all details for the establishment of surface area stabilization.

(5) A statement indicating that the impoundment facility has not received sluiced coal combustion residuals for at least three years and that there are no future plans to place coal combustion residuals in the facility by sluicing methods. The Division of Energy, Mineral, and Land Resources may waive the three-year requirement if proper evidence is presented by a North Carolina registered professional engineer indicating that the impounded material is not subject to liquid flow behavior.

(b) Preliminary Review and Approval. – The Decommissioning Request shall undergo a preliminary review by the Division for completeness and approval of the proposed geotechnical investigation plan scope of work. The owner shall be notified by letter with results of the preliminary review, including approval or revision requests relative to the proposed scope of work included in the geotechnical investigation plan. Upon receipt of a letter issued by the Division approving the preliminary geotechnical plan scope of work, the owner may proceed with field work and development of the geotechnical report.

(c) Final Determination and Approval. – Upon receipt of the geotechnical report, the Division shall complete the submittal review as provided in this subsection.

(1) If it is determined that sufficient evidence has been presented to clearly show that the facility no longer functions as a dam in its current state, a letter decommissioning the facility shall be issued by the Division, and the facility shall no longer be under jurisdiction of the Dam Safety Law of 1967.

(2) If modifications such as breach construction or implementation of a permanent vegetation or surface lining plan are needed, such plans shall be reviewed per standard procedures for consideration of a letter of approval to modify or breach.

(3) If approved, such plans shall follow standard procedure for construction, including construction supervision by a North Carolina registered professional engineer, as-built submittal by a North Carolina registered professional engineer, and follow up final inspection by the Division.

(4) Final approval shall be issued by the Division in the form of a letter decommissioning the facility, and the facility shall no longer be under jurisdiction of the Dam Safety Law of 1967.

SECTION 8.(a) G.S. 143-215.31 reads as rewritten:

"§ 143-215.31. Supervision over maintenance and operation of dams.

(a) The Commission shall have jurisdiction and supervision over the maintenance and operation of dams to safeguard life and property and to satisfy minimum streamflow requirements. The Commission may adopt standards for the maintenance and operation of dams as may be necessary for the purposes of this Part. The Commission may vary the standards applicable to various dams, giving due consideration to the minimum flow requirements of the stream, the type and location of the structure, the hazards to which it may be exposed, and the peril of life and property in the event of failure of a dam to perform its function.

(a1) The owner of a dam classified by the Department as a high-hazard dam or an intermediate-hazard dam shall develop an Emergency Action Plan for the dam as provided in this subsection.

867

(2) The Emergency Action Plan shall include, at a minimum, all of the following:
   a. A description of potential emergency conditions that could occur at the dam, including security risks.
   b. A description of actions to be taken in response to an emergency condition at the dam.

   d. A downstream inundation map depicting areas affected by a dam failure and sudden release of the impoundment.

(3) The owner of the dam shall update the Emergency Action Plan annually and shall submit it to the Department and the Department of Public Safety for their review and approval within one year of the prior approval.

(4) The Department shall provide a copy of the Emergency Action Plan to the regional offices of the Department that might respond to an emergency condition at the dam.

(5) The Department of Public Safety shall provide a copy of the Emergency Action Plan to all local emergency management agencies that might respond to an emergency condition at the dam.

(6) Information included in an Emergency Action Plan that constitutes sensitive public security information, as provided in G.S. 132-1.7, shall be maintained as confidential information and shall not be subject to disclosure under the Public Records Act. For purposes of this section, "sensitive public security information" shall include Critical Energy Infrastructure Information protected from disclosure under rules adopted by the Federal Energy Regulatory Commission in 18 C.F.R. § 333.112.

As soon as possible thereafter supplementary drawings or descriptive matter showing or describing the dam as actually constructed shall be filed with the Department in such detail as the Commission may require.
   (b) When an existing dam is enlarged, the supplementary drawings and descriptive matter need apply only to the new work.
   (c) The completed work shall be inspected by the supervising engineers, and upon finding that the work has been done as required and that the dam is safe and satisfies minimum streamflow requirements, they shall file with the Department a certificate that the work has been completed in accordance with approved design, plans, specifications and other requirements. Unless the Commission has reason to believe that the dam is unsafe or is not in
compliance with any applicable rule or law, the Commission shall grant final approval of the work in accordance with the certificate, subject to such terms as it deems necessary for the protection of life and property.

(d) Pending issuance of the Commission's final approval, the dam shall not be used except on written consent of the Commission, subject to conditions it may impose.

(e) The owner of a dam shall provide written notice of transfer to the Department within 30 days after title to the dam has been legally transferred. The notice of transfer shall include the name and address of the new dam owner.

SECTION 9. Section 3(b) of S.L. 2009-390 reads as rewritten:

"SECTION 3.(b) Any impoundments or other facilities that were in use on the effective date of this section January 1, 2010, in connection with nonnuclear electric generating facilities under the jurisdiction of the North Carolina Utilities Commission, and that had been exempted under the provisions of G.S. 143-215.25A(4), prior to amendment by Section 3(a) of this act, January 1, 2010, shall be deemed to have received all of the necessary approvals from the Department of Environment and Natural Resources and the Commission for Dam Safety, and shall not be required to submit application, certificate, or other materials in connection with the continued normal operation and maintenance of those facilities.       a. Deterioration, malfunction, or improper operation of spillway control systems.
      b. Sudden drops in the level of the contents of the impoundment.
      c. Severe erosion or other signs of deterioration in dikes or other containment devices or structures.
      d. New or enlarged seeps along the downstream slope or toe of the dike or other containment devices or structures.

The registered professional engineer shall investigate the conditions and, if necessary, develop a plan of corrective action to be implemented by the owner of the impoundment. The owner of the impoundment shall provide documentation of the completed corrective action to the Department.

   (4) The owner of a coal combustion residuals surface impoundment shall provide for the annual inspection of the impoundment by an independent registered professional engineer to ensure that the structural integrity and the design, operation, and maintenance of the impoundment is in accordance
with generally accepted engineering standards. Within 30 days of the
inspection, the owner shall provide to the Department the inspection report
and a certification by the engineer that the impoundment is structurally
sound and that the design, operation, and maintenance of the impoundment
is in accordance with generally accepted engineering standards. The owner
and the Department shall each place the inspection report and certification
on a publicly accessible Internet Web site.

(b) If the Department upon inspection finds that any dam is not sufficiently strong, is
not maintained in good repair or operating condition, is dangerous to life or property, or does
not satisfy minimum streamflow requirements, the Department shall present its findings to the
Commission and the Commission may issue an order directing the owner or owners of the dam
to make at his or her expense maintenance, alterations, repairs, reconstruction, change in
construction or location, or removal as may be deemed necessary by the Commission within a
time limited by the order, not less than 90 days from the date of issuance of each order, except
in the case of extreme danger to the safety of life or property, as provided by subsection (c) of
this section.

(c) If at any time the condition of any dam becomes so dangerous to the safety of life or
property, in the opinion of the Environmental Management Commission, as not to permit
sufficient time for issuance of an order in the manner provided by subsection (b) of this section,
the Environmental Management Commission may immediately take such measures as may be
essential to provide emergency protection to life and property, including the lowering of the
level of a reservoir by releasing water impounded or the destruction in whole or in part of the
dam or reservoir. The Environmental Management Commission may recover the costs of such
measures from the owner or owners by appropriate legal action.

(d) An order issued under this Part shall be served on the owner of the dam as provided
in G.S. 1A-1, Rule 4."

The location of the compliance boundary shall be established at the property boundary, except as otherwise established by the Commission. Multiple contiguous properties under common ownership and permitted for use as a disposal system shall be treated as a single property with regard to determination of a compliance boundary under this subsection. Nothing in this subsection shall be interpreted to require a revision to an existing compliance boundary previously approved by rule or permit boundary.

(j) When operation of a disposal system permitted under this section results in an exceedance of the groundwater quality standards adopted in accordance with G.S. 143-214.1, the Commission shall require that the exceedances within the compliance boundary be remedied through cleanup, recovery, containment, or other response only when any of the following conditions occur:

1. A violation of any water quality standard in adjoining classified waters of the State occurs or can be reasonably predicted to occur considering hydrogeological conditions, modeling, or any other available evidence.

2. An imminent hazard or threat to the environment, public health, or safety exists.

3. A violation of any standard in groundwater occurring in the bedrock, including limestone aquifers in Coastal Plain sediments, unless it can be demonstrated that the violation will not adversely affect, or have the potential to adversely affect, a water supply well.

(k) Where operation of a disposal system permitted under this section results in exceedances of the groundwater quality standards at or beyond the compliance boundary established under subsection (i) of this section, exceedances shall be remedied through cleanup, recovery, containment, or other response as directed by the Commission boundary, the Commission shall require the permittee to undertake corrective action, without regard to the date that the system was first permitted, to restore the groundwater quality by assessing the cause, significance, and extent of the violation of standards and submit the results of the investigation and a plan and proposed schedule for corrective action to the Director or the Director's designee. The permittee shall implement the plan as approved by, and in accordance with, a schedule established by the Director or the Director's designee. In establishing a
schedule the Director or the Director’s designee shall consider any reasonable schedule proposed by the permittee.”

SECTION 13.(c) The Coal Ash Management Commission, established pursuant to G.S. 130A-309.202, as enacted by Section 3(a) of this act, shall study how to promote, incentivize, and prioritize the beneficial use of coal combustion products over the disposal of coal combustion residuals. The Commission shall report the results of its study, including any recommendations, to the Environmental Review Commission no later than December 1, 2014.

SECTION 14. The Department of Transportation shall evaluate additional opportunities for the use of coal combustion products in the construction and maintenance of roads and bridges within the State. The Department shall report the results of its study, including any recommendations, to the Environmental Review Commission and the Joint Legislative Transportation Oversight Committee no later than December 1, 2014.

Receipts shall be reported on an accrual basis.

(d) Use of Proceeds. – A special fund in the Office of State Treasurer and the Coal Ash Management Commission is created. The fees collected pursuant to this section and all other funds received by the Coal Ash Management Commission shall be deposited in the Coal Combustion Residuals Management Fund. The Fund shall be placed in an interest-bearing account, and any interest or other income derived from the Fund shall be credited to the Fund. Moneys in the Fund shall only be spent pursuant to appropriation by the General Assembly. The Commission shall be subject to the provisions of the State Budget Act, except that no unexpended surplus of the Coal Combustion Residuals Management Fund shall revert to the General Fund. All funds credited to the Fund shall be used only to pay the expenses of the Coal Ash Management Commission and the Department of Environment and Natural Resources in providing oversight of coal combustion residuals.

(e) Recovery of Fee. – The North Carolina Utilities Commission shall not allow an electric public utility to recover this fee from the retail electric customers of the State.

GOVERNOR'S OBJECTIONS AND VETO MESSAGE

House Bill 1069, "An act to amend the unemployment insurance laws, as recommended by the Joint Legislative Oversight Committee on Unemployment Insurance."

After reviewing House Bill 1069, I have determined a veto is the proper course of action.

Although the vast majority of this bill contains much needed revisions to unemployment insurance laws, there are unacceptable provisions which stagger and shorten terms of current lawfully seated members. I appointed these members following a previous legislative directive that did not require confirmation for initial appointees.

The three qualified, capable, and bipartisan appointees by all accounts have performed well.

I look forward to working with House and Senate leaders to help craft a new bill which addresses our concerns while also improving employment policies.

Therefore, I veto the bill.

Pat McCrory

This bill, having been vetoed, is returned to the Clerk of the North Carolina House of Representatives on this 24th day of June 2014 at 1:50 PM for reconsideration of that body.
A JOINT RESOLUTION HONORING NASCAR AND THE INDUCTEES OF THE

proud of NASCAR's presence in the State and its position as the stock car racing capital of the

Whereas, after World War II, stock car racing evolved as a sport in the foothills,
pinewoods, and piedmont of North Carolina and quickly became one of the deepest traditions
in the State's popular culture; and

Whereas, North Carolina is the home of NASCAR and motorsports events, which
staged its first sanctioned "purely stock car" race at the Charlotte Speedway on June 19, 1949; and

Whereas, in 2011, stock car racing became the official State sport of North
Carolina; and

Whereas, the Charlotte Motor Speedway currently hosts six NASCAR events
annually, including one NASCAR Camping World Series truck race, two NASCAR
Nationwide Series races, and three NASCAR Sprint Cup Series races; and

Whereas, motorsports and stock car racing tremendously affect the economy of
North Carolina through travel and tourism and job creation; and

in partnership with Hewlett Packard (HP) and later became the centerpiece of HP's multimillion
dollar advertising campaign in 2013; and

Whereas, skills and trades used in NASCAR are supported as part of the State's
educational system at the university, community college, and career school levels; and

Whereas, the State's motorsports industry partnered with the military in February
2012 to share technology related to performance and safety to help our nation's service men and
women; and

880
Whereas, as the home to many of the legends and pioneers of stock car racing, it was fitting that North Carolina was chosen in 2006 as the site of the prestigious NASCAR Hall of Fame, which opened in Charlotte in 2010 and whose mission is to preserve the history of NASCAR and to entertain and educate racing and nonracing fans alike; and

Whereas, each year, the NASCAR Hall of Fame recognizes those who have made outstanding contributions to the sport by inducting five legends into the Hall of Fame; and

WHEREAS, 49 CFR § 390.23 allows the Governor of a state to suspend the rules and regulations under 49 CFR Part 395 for up to 30 days if the Governor determines that an emergency condition exists; and

WHEREAS, under N.C.G.S. § 166A-19.70, the Governor may declare that the health, safety, or economic well-being of persons or property requires that the maximum hours of service for drivers prescribed by N.C.G.S. § 20-381 should be waived for persons transporting essential fuels, food, water, medical supplies, feed for livestock and poultry, transporting livestock and poultry and for vehicles used in the restoration of utility services.

responsibility of one agency or entity, but a collective responsibility of the entire state and nation
that requires a high level of collaboration and cooperation; and

WHEREAS, it is my expectation that interagency cooperation be taken beyond the existing
efforts to a new level of performance and accountability and that barriers are eliminated that may
limit or lessen the effectiveness of Federal, State and Local entities that serve our veterans.

EXECUTIVE ORDER NO. 58

TEMPORARY SUSPENSION OF MOTOR VEHICLE REGULATIONS TO ENSURE 
RESTORATION OF UTILITY SERVICES AND TRANSPORTING ESSENTIALS 

WHEREAS, due to the approach of Tropical Storm Arthur, vehicles bearing equipment and 
supplies for utility restoration, debris removal, and carrying essentials such as food and 
medicine, need to be moved on the highways of North Carolina; and 

WHEREAS, I have declared that a state of emergency as defined in N.C.G.S. §§ 166A-19.3(6) 
and 166A-19.3(19) exists in portions of North Carolina due likely impact of Tropical Storm 
Arthur; and 

WHEREAS, the prompt resumption of utility services and uninterrupted supply of electricity, 
gasoline and other essentials in commerce to citizens of North Carolina is essential to their safety 
and well-being; and 

WHEREAS, under the provisions of N.C.G.S. § 166A-19.30(b)(3) the Governor, with the 
concurrency of the Council of State, may regulate and control the flow of vehicular traffic and 
the operation of transportation services; and 

WHEREAS, with the concurrency of the Council of State, I have found that vehicles bearing 
equipment and supplies for utility restoration, carrying essentials and for debris removal must 
adhere to the registration requirements of N.C.G.S. § 20-85.1 and 20-382, fuel tax requirements 
of N.C.G.S. § 105-449.47, and the size and weight requirements of N.C.G.S. §§ 20-116 and 20-
118. I have further found that citizens in this State may suffer imminent widespread damage 
within the meaning of N.C.G.S § 166A-19.3(3) and N.C.G.S. § 166A-19.21(b); and 

WHEREAS, 49 CFR § 390.23 allows the Governor of a state to suspend the rules and 
regulations under 49 CFR Parts 390-399 for up to 30 days if the Governor determines that an 
emergency condition exists; and 

WHEREAS, under N.C.G.S. § 166A-19.70, the Governor may declare that the health, safety, or 
economic well-being of persons or property requires that the maximum hours of service for 
drivers prescribed by N.C.G.S. § 20-381 should be waived for persons transporting essential 
fuels, food, water, medical supplies, and vehicles used in the restoration of utility services. 

NOW, THEREFORE, pursuant to the authority vested in me as Governor by the Constitution 
and the laws of the State of North Carolina, IT IS ORDERED:
Section 1.

The Department of Public Safety in conjunction with the North Carolina Department of Transportation shall waive the maximum hours of service for drivers prescribed by the Department of Public Safety pursuant to N.C.G.S. § 20-381.

Section 2.

The Department of Public Safety in conjunction with the Department of Transportation shall waive certain size and weight restrictions and penalties arising under N.C.G.S. §§ 20-116 and 20-118, and certain registration requirements and penalties arising under N.C.G.S. §§ 20-86.1, 20-382, 105-449.47, and 105-449.49 for vehicles transporting equipment and supplies for the restoration of utility services, carrying essentials and for equipment for any debris removal.

Section 3.

Notwithstanding the waivers set forth above, size and weight restrictions and penalties have not been waived under the following conditions:

a. When the vehicle weight exceeds the maximum gross weight criteria established by the manufacturer (GVWR) or 90,000 pounds gross weight, whichever is less.

b. When the tandem axle weight exceeds 42,000 pounds and the single axle weight exceeds 22,000 pounds.

c. When a vehicle and vehicle combination exceeds 12 feet in width and a total overall vehicle combination length of 75 feet from bumper to bumper.

d. Vehicles and vehicle combinations subject to exemptions or permits by authority of this Executive Order shall not be exempt from the requirement of having a yellow banner on the front and rear measuring a total length of 7 feet by 18 inches bearing the legend “Oversized Load” in 10 inch black letters 1.5 inches wide and red flags measuring 18 inches square to be displayed on all sides at the widest point of the load. In addition, when operating between sunset and sunrise, a certified escort shall be required for loads exceeding 8 feet 6 inches in width.

Section 4.

Vehicles referenced under Sections 2 and 3 shall be exempt from the following registration requirements:

a. The $50.00 fee listed in N.C.G.S. § 105-449.49 for a temporary trip permit is waived for the vehicles described above. No quarterly fuel tax is required because the exception in N.C.G.S. § 105-449.45(a)(1) applies.

b. The registration requirements under N.C.G.S. § 20-382.1 concerning intrastate and interstate for-hire authority is waived; however, vehicles shall maintain the required limits of insurance as required.

c. Non-participants in North Carolina’s International Registration Plan will be permitted into North Carolina in accordance with the exemptions identified by this Executive Order.

Section 5.

The size and weight exemption for vehicles will be allowed on all routes designated by the North Carolina Department of Transportation, except those routes designated as light traffic roads under N.C.G.S. § 20-118. This order shall not be in effect on bridges posted pursuant to N.C.G.S. § 136-72.
Section 6.  
The waiver of regulations under Title 49 of the Code of Federal Regulations (Federal Motor Carrier Safety Regulations) does not apply to the CDL and Insurance Requirements. This waiver shall be in effect for 30 days or the duration of the emergency, whichever is less.

Section 7.  
The North Carolina State Highway Patrol shall enforce the conditions set forth in Sections 1 through 6 of this Executive Order in a manner which will implement these provisions without endangering motorists in North Carolina.

Section 8.  
Upon request by law enforcement officers, exempted vehicles must produce documentation sufficient to establish that their loads are being used for bearing equipment and supplies for utility restoration, debris removal, and carrying essentials in commerce in the State of North Carolina.

Section 9.  
This Executive Order does not prohibit or restrict lawfully possessed firearms or ammunition or impose any limitation on the consumption, transportation, sale or purchase of alcoholic beverages as provided in N.C.G.S. § 166A-19.30(c).

Section 10.  
Pursuant to N.C.G.S. § 166A-19.23, this declaration triggers the prohibition against excessive pricing as provided in N.C.G.S. § 75-37 and 75-38 in the declared emergency area.

Section 11.  
This Executive Order is effective immediately and shall remain in effect for thirty (30) days or the duration of the emergency, whichever is less.

IN WITNESS WHEREOF, I have hereunto signed my name and affixed the Great Seal of the State of North Carolina at the Capitol in the City of Raleigh, this 2nd day of July in the year of our Lord two thousand and fourteen, and of the Independence of the United States of America the two hundred and thirty-eight.

Public Education
Conference Report on the Continuation, Capital, and Expansion Budget

5 Compensation Increase Reserve - Department of Public Instruction (DPI)
Provides a $1,000 annual recurring salary increase (~$1,236 salary and benefit increase) for permanent full-time employees and funds the salary increase required by the Teacher Salary Schedule for State agency teachers.

6 State Retirement System Contributions - School District Personnel
Increase the State's contribution to the Teachers' and State Employees' Retirement System to fund the Annual Required Contribution, provide a 1.0% cost-of-living adjustment to retirees, and reflect the ratification of H.B. 1115. Total General Fund appropriation across all sections in the committee report is $46.5 million.

7 State Retirement System Contributions - DPI
Increases the State's contribution to the Teachers' and State Employees' Retirement System to fund the Annual Required Contribution, provide a 1.0% cost-of-living adjustment to retirees, and reflect the ratification of H.B. 1115. Total General Fund appropriation across all sections in the committee report is $46.5 million.

8. Technical Adjustments

8 Average Daily Membership (ADM) (Multiple)
Revises projected ADM for FY 2014-15 to reflect 6,266 fewer students than originally projected. The adjustment includes revisions to all position, dollar, and categorical allotments.

Total allotted ADM for FY 2014-15 is 1,920,305, an increase of 10,320 students over FY 2013-14.

9 Average Certified Personnel Salaries (Multiple)
Revises budgeted funding for certified personnel salaries based on actual salary data from December 2013. The adjustment does not reduce any salary paid to certified personnel, nor does it reduce the number of guaranteed State-funded teachers, administrators, or instructional support personnel.

10 ADM Adjustment: Opportunity Scholarships (1800)
Provides funding to eliminate the ADM Adjustment for Opportunity Scholarships.

Public Education
Conference Report on the Continuation, Capital, and Expansion Budget

11 Education Lottery Receipts: Classroom Teachers (1800)
Adjusts the receipts budgeted for the Classroom Teachers allotment to reflect an updated distribution between Lottery-supported programs.

12 Education Lottery Receipts: Teacher Assistants (1800)
Budgets Lottery receipts into the Teacher Assistants allotment and takes an equivalent reduction to the allotment's General Fund support.

13 Exceptional Children Headcount (1800)
Adjusts funding budgeted for the Children With Disabilities preschool and school-age allotments to reflect actual student headcount. The enacted FY 2014-15 budget included anticipated growth based on the projected headcount of children with disabilities. This adjustment revises budgeted funding for both preschool and school-age children with special needs to reflect the April 1, 2014 headcount and does not reduce funding per student.

14 Civil Penalties (1800)
Increases budgeted receipts from Civil Penalties and takes corresponding General Fund reductions. The nonrecurring reduction reflects actual overrealized receipts in FY 2013-14, while the recurring reduction reflects an increased estimate of anticipated FY 2014-15 receipts.

C. Public School Funding Adjustments

15 Excellent Public Schools Act (Multiple)
Provides additional funds to the Department of Public Instruction to carry out elements of the Excellent Public Schools Act contained in Section 7A.1 and Section 7A:7 of S.L. 2012-142. DPI will have $38.0 million available to implement these requirements.

16 Classroom Teachers (1800)
Decreases class size funding allocations by 1 student in both Kindergarten and Grade 1. The new Kindergarten allotment ratio will be 1 guaranteed teaching position for every 10 students in membership, an increase of 359 positions. The new Grade 1 allotment ratio will be 1 guaranteed teaching position for every 17 students in membership, an increase of 402 positions. This expansion, combined with other class size modifications made in S.L. 2013-390, will lower the FY 2014-15 teacher allotment ratios in Grades K-3 by 1 student per teacher as compared to the FY 2013-14 ratios. $3.80 billion is budgeted in total for this allotment.

Public Education
17 Excellent Public Schools Act - Five Extra Days (Multiple)
Eliminates funding that had been provided to support a requirement that local education agencies (LEAs) provide additional instructional days (S.L. 2011-145, Section 7.20). A subsequent amendment to G.S. 115C-84.2 (a)/(1) eliminated this mandate. Funding had previously supported $40,168 for additional costs related to substitute teachers and $251,469 for additional costs related to student transportation.

18 Education-Based Salary Supplements Restoration (1800)
Provides additional funding necessary to restore education-based salary supplements for master’s, advanced or doctoral degree for certain personnel, as directed in a corresponding special provision.

19 School Bus Replacement (1920)
Reduces this allotment supporting the purchase of replacement school buses to reflect lower-than-expected bus prices and departmental operational efficiencies. The nonrecurring reduction reflects the savings associated with foregone bus purchases in FY 2015-16 and the recurring reduction reflects reduced future financing payments as a result of those foregone purchases. This reduction does not reduce the number of replacement buses to be purchased in FY 2014-15. $45.2 million remains in this allotment to support the purchase of 579 replacement buses in FY 2014-15.

20 Teacher Assistants (1900)
Adjusts the Teacher Assistant allotment and continues to allocate funding on the basis of student headcount in grades K-3. Approximately $368.3 million will remain in this allotment from a combination of General Fund and Lottery sources.

21 Central Office Administration (1910)
Reduces the allotment to LEAs for the salaries and benefits of central office staff by approximately 3%. This staff includes, but is not limited to, superintendents, associate and assistant superintendents, finance officers, athletic trainers, and transportation directors. $251.1 million will remain to support these local staff in FY 2014-15.

22 Transportation (1830)
Reduces by approximately 1% the total budget for the allotment, which supports the salaries of transportation personnel and the maintenance of yellow school buses. Total funding for this allotment will be $467.7 million in FY 2014-15.

23 Small County Supplemental Funding (1800)
Revises the funding formula to provide differentiated funding based on the size of eligible districts as directed in a corresponding special provision. $46.3 million will be available for this allotment in FY 2014-15.

24 Panic Alarms (1820)
Reduces available funding for this program to reflect FY 2013-14 actual expenditure. $600,000 will be available for awards in FY 2014-15, slightly more than the amount awarded in FY 2013-14.

25 Cooperative and Innovative High Schools (1821)
Provides Cooperative and Innovative High Schools (CIHS) allotment support to fulfill the funding requirements for the six new CIHSs approved by the State Board of Education in 2014. Funding will support one STEM Early College and two Middle Colleges in Mecklenburg County, A Young Men’s and Young Women’s Leadership Academy in Wake County, and the Buncombe Discovery Academy in Buncombe County.

26 Textbooks (1800)
Increases General Fund support for textbooks; bringing total funding for this allotment to $24.3 million.

27 Merit Pay for Teachers (1800)
Modifies funding status of this teacher supplemental compensation program to nonrecurring support.

28 Differential Teacher Compensation
Supports the initial phase of differentiated pay for highly effective classroom teachers, as described in a corresponding special provision, for selected LEAs to develop differentiated pay approaches for classroom teachers based on a teacher’s demonstrated effectiveness, teaching in hard-to-staff areas, and additional responsibilities in advanced roles. The funding shall be allocated to the North Carolina Educational Endowment Fund, created within a related special provision.

29 At-Risk Student Services (1800)
Reduces funding for this allotment to the FY 2013-14 level of $293.7 million.

31 DPI Flexible Reduction (Multiple)
Reduces State General Fund support for DPI by 10%. The State Board of Education may allocate this reduction at its discretion.

32 North Carolina Center for the Advancement of Teaching (1410)
Shifts all State General Fund support for the ongoing operations of this teacher professional development provider to recurring funding.

33 Military Interstate Children's Compact Commission (1860)
Provides additional funding to cover the actual cost of membership in the Military Interstate Children’s Compact Commission. The Commission seeks to ensure consistent policies amongst member states to resolve educational transition issues encountered by military children due to frequent relocation. The total budget for this item will be $80,000.

E. Grants

34 Teaching Fellows (1900)
Eliminates the General Fund appropriation supporting the Teaching Fellows program. Obligations to previous Fellows classes will continue to be supported from funds available in the Teaching Fellows Trust Fund. The Teaching Fellows Trust Fund has a cash balance of $4.7 million as of April 30, 2014.

35 Communities in Schools (1991)
Provides support to expand the intervention programs and services provided by Communities In Schools of North Carolina, Inc. (CISNC), as part of its public and private partnership with local school administrative units to address the needs of public school students at risk of grade-level retention and dropout from school. 41 Closing the Skills Gap (Multiple)
Directs the System Office to create a fourth tier in its entitlement funding formula. The tier will be funded at a higher rate than the current highest tier. The new tier shall include health care and technical educational programs that train North Carolinians for jobs that have documented skills gaps and that pay higher wages.

42 Transfer to Commerce to Offset Apprenticeship Fees (1622)
Transfers $300,000 from the Customized Industry Training Program to the Department of Commerce for the Apprenticeship and Training Bureau’s Registered Apprenticeship program, which helps workers learn new specialized skills needed in the workforce.

The Department of Commerce is directed to use the funds to offset the revenue lost when apprenticeship fees assessed under G.S. 04-12 are waived.

There is a corresponding special provision for this item.

C. Financial Aid Changes

43 Yellow Ribbon G.I. Education Enhancement Program (1900)
Funds financial aid for eligible military veterans and dependents attending North Carolina community colleges by providing state dollars to leverage federal matching funds via the Yellow Ribbon Program.

The Yellow Ribbon Program provides a direct match of school funds to offset the cost of the gap for veterans between non-resident tuition rates and the Post-9/11 G.I. Bill, which pays only up to the resident tuition rate. Funds provided in FY 2014-15 are intended for use in academic year 2015-16 but may be awarded and disbursed in spring 2015.

There is a corresponding special provision for this item.

D. Other Changes

44 Curriculum Tuition (1620)
Increases curriculum tuition by $0.50 per credit hour and makes a corresponding General Fund reduction in anticipation of increased tuition receipts.

Tuition will increase from $71.50 to $72 per credit hour for residents and from $265.50 to $266 for nonresidents. Tuition for resident students will increase by a maximum of $32 per year, from $928 to $929.

| Provides a $1,000 annual recurring salary increase (~$1,296 salary and benefit increase) for permanent full-time UNC employees who are subject to the State Human Resources Act (SHRA) and funds the salary increase required by the Teacher Salary Schedule for North Carolina School of Science and Math teachers. | R            |

| **48 Compensation Increase Reserve - EHRA Employees** | $5,000,000  |
| Provides funds for salary increases for UNC employees who are exempt from the State Human Resources Act (EHRA). UNC is not required to provide an across-the-board increase with these funds. The Board of Governors shall determine how to allocate these funds to improve employee retention. | R            |

| **49 State Retirement System Contributions**     | $5,391,085   |

51 Enrollment Growth Model Change (16011)
Denote UNC General Administration to revise the Enrollment Growth Funding Model for general institutional support. The current model contains an adjustment factor to limit budget cuts to institutional support lines when enrollment declines. UNC is directed to remove this factor from its model and to reduce campus budgets accordingly.

52 Building Reserves (Multiple)
Reduces funding in reserves for new facilities due to delays in completion dates.

53 Teacher Preparation Programs through Distance Education (16011)
Eliminates funding for the Teacher Preparation Distance Education Reserve. Funding for distance education teacher preparation was originally provided by the 2001 Appropriations Act (S.L. 2001-104, Sec. 31.7), since that time, these programs have also been added to the enrollment growth funding formula. This adjustment ends that duplicative funding.

C. Financial Aid Changes

54 Yellow Ribbon G.I. Education Enhancement Program (16011)
Funds financial aid for eligible military veterans and dependents attending the University of North Carolina by providing State dollars to leverage federal matching funds via the Yellow Ribbon Program.

The Yellow Ribbon Program provides a direct match of school funds to offset the cost of the gap for veterans between non-resident tuition rates and the Post-9/11 G.I. Bill, which pays only up to the resident tuition rate. Funds provided in FY 2014-15 are intended for use in academic year 2015-16 but may be awarded and disbursed in spring 2015.

There is a corresponding special provision for this item.

55 NC Need-Based Scholarship (16015; 124T)
Shifts from nonrecurring to recurring $4.0 million for the NC Need-Based Scholarship for students attending private institutions of higher education. Total funding for the program in FY 2014-15 will be $58,301,568.

UNC System
Conference Report on the Continuation, Capital, and Expansion Budget

56 National Guard Tuition Assistance Program (16012, 124R)

57 College Foundation of North Carolina (16011)
Mitigates the structural budget gap at the College Foundation of North Carolina (CFNC), which formerly was supported largely by receipts from the federal guaranteed student loan program at the College Foundation, Inc. and the State Education Assistance Authority. The 2010 federalization of the student loan program ended any new loan origination through the guaranteed loan program, so those receipts are no longer sufficient to sustain CFNC.

58 UNC Need-Based Financial Aid Forward-Funding Reserve
Increases the funding for the UNC Need-Based financial aid program by $18,130,726. This amount shall be funded from the Eschweat Fund. There is a corresponding special provision for this item.

59 Opportunity Scholarships (16015)
Provides funds to expand Opportunity Scholarship Grants for the Spring 2015 semester. The program provides scholarship grants of up to $2,100 per semester for eligible students to attend nonpublic schools. The additional funds will support 400 semester-long scholarships. Total funding for this program is $10.6 million.

D. Other Changes
60 Management Flexibility Reduction (16011)
Increases the management flexibility reduction for the UNC operating budget by 3.3%, including this change, the management flexibility reduction for FY 2014-15 totals $76,059,768. The UNC Board of Governors shall not allocate this reduction or an across-the-board basis to constituent institutions.

61 Game-Changing Research (16011)

Conference Report on the Continuation, Capital, and Expansion Budget

17 Child Care Subsidy Eligibility Changes (1380)
Changes eligibility for Child Care Subsidy from 75% of State Median income to 200% of Federal Poverty Level (FPL) for children age 0-4 and children with special needs. Children who are age 6-12 are eligible at 133% of FPL. This change is effective October 1, 2014. Children currently receiving assistance will have their income eligibility determined according to the new income standards at their next redetermination after October 1, 2014. Combined with other Child Care Subsidy items, General Fund appropriation is reduced by 34% to $27.1 million due to the replacement of state funds with federal funding. Savings from this item are reinvested in market rates and the waiting list. Total funding for Child Care Subsidy is unchanged.

18 Child Care Subsidy Co-Payments Set at 10% of Income (1380)
Sets co-payments at 10% of income for all householders that are required to pay a co-payment effective October 1, 2014. This does not change who pays a co-payment; children receiving child care subsidy through Child Welfare, Child Protective Services and Foster Care will continue to be exempt from the co-payment requirement. This reduction does not change the slot availability or child care subsidy as the amount paid by the Child Care Subsidy program will be reduced due to the increased co-payment. The co-payment is paid to the child care provider. There were 40,000 children whose families paid a co-payment based on 8% or 9% of their family income out of 110,000 children whose families paid a co-payment in FY 2012-13. Combined with other Child Care Subsidy items, General Fund appropriation is reduced by 34% to $27.1 million due to the replacement of state funds with federal funding. Savings from this item are reinvested in market rates and the waiting list. Total funding for Child Care Subsidy is unchanged.

19 Child Care Subsidy Co-Payment No Longer Prorated for Part-time Care (1380)
Eliminates the proration of co-payments for part-time care effective October 1, 2014. This reduction does not result in any loss of child care slots. The increased co-payment will reduce the amount paid to child care providers by the Child Care Subsidy program. Providers collect the co-payment from the parents. There were 26,000 children whose families paid a reduced co-payment due to part-time care out of 110,000 children whose families paid a co-payment in FY 2012-13. Combined with other Child Care Subsidy items, General Fund appropriation is reduced by 34% to $27.1 million due to the replacement of state funds with federal funding. Savings from this item are reinvested in market rates and the waiting list. Total funding for Child Care Subsidy is unchanged.

(9.9) Division of Medical Assistance

**55 Mental Health Drug Management (1310,1331)**

Directs the Department of Health and Human Services, Division of Medical Assistance, to manage mental health drugs to produce $12 million savings. Net of rebates, to General Fund appropriations to the Medicaid program. In order to achieve the annual savings the Department will first make adjustments to the preferred drug list, to maximize supplemental rebates. Next the Department is authorized to impose controls including prior authorization, utilization review criteria, and any other restrictions. Notwithstanding the foregoing, because of the effective date of this section, savings in fiscal year 2014-2015 shall be $6 million

**56 Provider Rate and Hospital DRG Weight Mix Reduction (1310)**

Reduces provider rates by 1.0% effective January 1, 2015. This reduction applies to all fee-for-service providers with the exception of hospital inpatient services, drugs and dispensing fees, nursing homes, non-PCS home care services, private duty nursing, all cost based providers, services where rates or rate methodologies are set by the federal government, negotiated through a contract, hospice, CAP services, FQHC and Rural Health Centers or as specified in special provision.

Reduces Hospital DRG weights by 2.1% effective January 1, 2015. The 2.1% reduction will be uniformly applied to each DRG weight.

-(87,190,441) R

**57 Medsolutions Contract Renegotiation and Imaging Request for Proposal (1310)**

Reduces spending for the imaging contract with Medsolutions to reflect the recently renegotiated contract terms. The Department is also directed to issue a Request for Proposal (RFP) for high-tech imaging services. This represents a 14.9% reduction in spending on the high-tech imaging contract, leaving an estimated $50 million in the budget for FY 2014-15.

50 Hospital Outpatient Cost (1310)
Reduces the settlement for the UNC Hospitals (UNC-CH) and Vidant, formally known as Pitt Memorial Hospital (ECU) for outpatient services to 70% of Medicaid costs effective July 1, 2014. Historically, the State has funded the State share of payment to UNC-CH and ECU at 100% of costs, unlike other hospitals which were paid 70% of cost through the claims and settlement processes. The reduction in the settlement percentage will be factored into supplemental payments under the Disproportionate Share Hospital (DSH) and hospital GAP payment plans, as appropriate. This represents a 2.1% reduction in overall hospital outpatient Medicaid spending, leaving an estimated $621 million in the budget for outpatient services for all hospitals in FY 2014-15.

59 Nursing Home Case Mix Index Adjustment (1310)
Freeze the case-mix index adjustments for direct cost of nursing home care effective January 1, 2015. Historically, nursing home direct care rates are adjusted quarterly for the change in the average case mix or intensity of care for each facility’s residents from the previous quarter. The case-mix index adjustments do not apply to the indirect care or fair rental value components of the nursing home per diem rates. Total Medicaid payments for nursing homes is projected to be $1.20 billion in FY 2013-14. This represents a 0.5% reduction in overall budgeted spending for nursing homes leaving an estimated $1.2 billion in the Medicaid budget for FY 2014-15.

60 Average Acquisition Cost for Drug Pricing (1510)
Converts the pricing for drug products from a multiple of Wholesale Acquisition Cost (WAC) for brand medications and State Maximum Allowable Cost (SMAC) for generic medications to an average acquisition cost for all Medicaid drugs. This item also adjusts dispensing fees to more closely align with the cost of dispensing. Adjustments to drug pricing and dispensing fees will result in a net savings of $675,000 in FY 2014-15. Total spending for drug product and dispensing fees are projected to be $1.4 billion in FY 2013-14. Drug ingredient prices will be updated at least monthly.

The amount is offset by drug rebates that are estimated at $675 million in FY 2013-14. This represents a 0.3% reduction in spending for drug costs, net of rebates, leaving an estimated net budget of $1.37 billion in FY 2014-15.

61 State Retention of the Hospital GAP Plan Assessment (1310)
Increases the state retention on assessments through the hospital GAP plan from 25.5% to 26.6% effective July 1, 2014. The increased retention percentage will apply to the total amount assessed under the GAP plan. The residual amount of assessment will be used to make supplemental equity and upper payment limit payments as defined under the plan. The GAP plan for the year ending September 30, 2014 provides for payments from hospitals totaling $365 million and supplemental payments for outpatient equity and inpatient upper payment limit of $787 million. This change will increase the amount of payments from the hospitals, but will not change the supplement payments the hospitals receive.

62 Single Base Rate for All Hospitals (1310)
Establishes a single base diagnosis related group (DRG) rate for inpatient hospital services based on the statewide median base rate at June 30, 2014 for all hospitals effective January 1, 2015. This reduces payments for hospital services by $36.5 million and increases the GAP plan retention by $9.7 million on an annual basis. In FY 2015-14 total spending for inpatient hospital services is projected to be $938 million. This represents a 1.8% reduction in spending for inpatient hospital services, leaving an estimated $932 million in the FY 2014-15 budget.

A provision in the Salaries and Benefits part of the Appropriations Act provides additional details on this increase.
   - $1,834,633

3. State Retirement System Contributions
   - Increases the State's contribution to the Teachers' and State Employees' Retirement System to fund the Annual Required Contribution; provide a 1.0% cost-of-living adjustment to retirees, and reflect the ratification of H.B. 1165. 6 NCVAN (1170)
Eliminates the grant to the NC Victims Assistance Network. This is the last direct appropriation to a non-profit in the Department's budget; the others were eliminated in the 2011 budget. This reduction will have no impact on services provided by State agencies to victims of crime.

D. Law Enforcement

7 State Highway Patrol Vacant Trooper Positions
Eliminates 26 vacant trooper positions in the State Highway Patrol (SHP). As of March 2014, there were 154.5 vacant trooper positions; of which 56 had been vacant for longer than six months. These positions are budgeted at the starting trooper salary of $70,100, for a total position cost of $50,986 each including retirement, social security, and health benefits. After this reduction, there will be 1,759 sworn law enforcement positions in the Highway Patrol.

8 State Highway Patrol Uniforms
Increases funding for State Highway Patrol uniforms to provide adequate resources for Troopers. After the reduction in item 7, there are a total of 1,691 General Fund supported troopers (66 troopers are supported by federal funds). Uniform expenditures for troopers are $965 each for 1,430 traditional patrol and $1,005 each for 261 size and weight troopers. The total annual cost is $1,071,035. The Authorized Budget for FY 2014-15 appropriates $963,384 for this purpose, leaving a shortfall of $963,384. This item increases the budget for uniforms by 100% to fully fund SHP uniform needs.

This section applies to misdemeanants convicted on or after October 1, 2014, and DWI offenders convicted on or after January 1, 2015. SMCP will also expand to provide appropriate treatment for DWI offenders. Suggestions for Use: Local legislation appears under the name of the particular county or municipality. Legislation that amends or repeals another session law appears under "Laws Amended or Repealed" and under the particular subject. General appropriations appear under "Appropriations". Specific appropriations or earmarks appear under the particular agency, entity, or subject. Committees, Commissions, Councils, and Boards appear as main entries. Numbers are alphabetized as spelled (i.e., 9 is listed alphabetically as "nine"). Session Law numbers (locators) are shown in standard citation format with the word "Section" replaced by the section symbol (§). Thus, "Session Law 145 Section 6A.10 subsection (a) through subsection (p)" would appear as "145§6A.10(a)-(p)", and "Session Law 145 Section 28.31 through Section 28.31A" would appear as "145§§28.31-28.31A". Noncontiguous Session Law sections are separated by a comma. Complete Session Law citations are separated by a semicolon.
