DHHS through the Division of Health Benefits, created in Section 10 of this act, shall be responsible for planning and implementing the Medicaid transformation required by this act.

(2) Prepaid Health Plan. – For purposes of this act, a Prepaid Health Plan (PHP) shall be defined as an entity, which may be a commercial plan or provider-led entity, that operates or will operate a capitated contract for the delivery of services pursuant to subdivision (3) of this section. For purposes of this act, the terms "commercial plan" and "provider-led entity" are defined as follows:

a. Commercial plan or CP. – Any person, entity, or organization, profit or nonprofit, that undertakes to provide or arrange for the delivery of health care services to enrollees on a prepaid basis except for enrollee responsibility for copayments and deductibles and holds a PHP license issued by the Department of Insurance.

(6a) To the extent allowed by Medicaid federal law and regulations and consistent with the requirements of this act, PHPs shall comply with the requirements of Chapter 58 of the General Statutes. This requirement shall not be construed to require PHPs to cover services that are not covered by the Medicaid program pursuant to federal law and regulations. The Department of Health and Human Services, Division of Health Benefits, and the Department of Insurance shall jointly review the applicability of provisions of Chapter 58 of the General Statutes to PHPs, and report to the Joint Legislative Oversight Committee on Medicaid and NC Health Choice by March 1, 2016, on the following:

During this four-year period, the Division of Health Benefits shall continue to negotiate actuarially sound capitation rates directly with the LME/MCOs in the same manner as currently utilized. Capitation payments under contracts between the Division of Health Benefits and the LME/MCOs shall be made directly to the LME/MCO by the Division of Health Benefits during the four-year period.

SECTION 5. Role of DHHS. – The role and responsibility of DHHS, through the Division of Health Benefits, during Medicaid transformation shall include the following activities and functions:

DHHS, through the Division of Health Benefits, shall develop standardized contract terms, to include at a minimum, the following:

   b. A requirement that PHP spending for prescribed drugs, net of rebates, ensures the State realizes a net savings for the spending on...
prescription drugs. All PHPs shall be required to use the same drug formulary, which shall be established by DHHS, through the Division of Health Benefits.

c. Until final federal regulations are promulgated governing medical loss ratio, a minimum medical loss ratio of eighty-eight percent (88%) for health care services, with the components of the numerator and denominator to be defined by DHHS, through the Division of Health Benefits.

PHPs may not exclude providers from their networks except for failure to meet objective quality standards or refusal to accept network rates. Notwithstanding the previous sentence, PHPs must include all providers in their geographical coverage area that are designated essential providers by DHHS pursuant to subdivision (13) of this section, unless DHHS approves an alternative arrangement for securing the types of services offered by the essential providers.

e. A requirement that all PHPs assure that enrollees who do not elect a primary care provider will be assigned to one.

(7) Prior to issuing the RFPs required by subdivision (6) of this section, consult, in accordance with G.S. 12-3(15), with the Joint Legislative Oversight Committee on Medicaid and NC Health Choice on the terms and conditions of the requests for proposals (RFPs) for the solicitation of bids for statewide and regional capitated PHP contracts.

m. A plan to stabilize the Division of Medical Assistance during the transition of the Medicaid and NC Health Choice programs to the Division of Health Benefits.
n. A plan that will ensure continuity of services for individuals in foster care and adoptive placements in the transformed Medicaid and NC Health Choice programs.

(13) Designate Medicaid and NC Health Choice providers as essential providers if the provider either offers services that are not available from any other provider within a reasonable access standard or provides a substantial share of the total units of a particular service utilized by Medicaid and NC Health Choice recipients within the region during the last three years, and the combined capacity of other service providers in the region is insufficient to meet the total needs of the Medicaid and NC Health Choice enrollees. DHHS shall not classify physicians and other practitioners as essential providers. At a minimum, providers in the following categories shall be designated essential providers:
   a. Federally qualified health centers.
   b. Rural health centers.

by fifteen percent (15%) from the amount of per member per month payments NCCCN received for January 2015. The renegotiated contract shall provide for greater efficiencies and facilitate a smooth transition of features of the enhanced primary care case management program, including case management, informatics center operations, and practice supports, to the primary care medical home model or other care management model that will be utilized by PHPs, consistent with the plan reported to the Joint Legislative Oversight Committee on Medicaid and NC Health Choice pursuant to subdivision (12) of Section 5 of this act. The renegotiated contract shall also include performance measures and consequences for failing to meet those performance measures. DHHS shall continue to utilize NCCCN to perform existing functions until capitated PHP contracts begin as required by this act. When capitated PHP contracts begin, any contract with NCCCN existing on that date shall terminate. Funds equal to the amount of any savings achieved on or after August 1, 2015, by the Division of Medical Assistance as a result of the contract renegotiation required by this section shall be transferred to the Division of Health Benefits to be used for the transition to capitated PHP contracts.

If such Medicaid-specific funding cannot be maintained as currently implemented, then the Division of Health Benefits shall advise the Joint Legislative Oversight Committee on Medicaid and NC Health Choice, created in Section 15 of this act, of any modifications necessary to maintain as much revenue as possible within the context of Medicaid transformation. If such Medicaid-specific funding streams cannot be preserved through the transformation process or if revenue would decrease, it is the intent of the General Assembly to modify such funding streams so that any supplemental payments to providers are more closely aligned to improving health outcomes and achieving overall Medicaid goals.

WELL DRILLING CHANGES

SECTION 3.5.(a) G.S. 87-97 reads as rewritten:

"§ 87-97. Permitting, inspection, and testing of private drinking water wells.
(a) Mandatory Local Well Programs. – Each county, through the local health department that serves the county, shall implement a private drinking water well permitting, inspection, and testing program. Local health departments shall administer the program and enforce the minimum well construction, permitting, inspection, repair, and testing requirements set out in this Article and rules adopted pursuant to this Article. No person shall unduly delay or refuse to permit a well that can be constructed or repaired and operated in compliance with the requirements set out in this Article and rules adopted pursuant to this Article.
(b1) Permit to Include Authorization for Electrical. – When a permit is issued under this section, that permit shall also be deemed to include authorization for the installation, construction, maintenance, or repair of electrical wiring, devices, appliances, or equipment by a person certified as a well contractor under Article 7A of this Chapter when running electrical wires from the well pump to the pressure switch. The local health department shall be responsible for notifying the appropriate building inspector of the issuance of the well permit.
(c) Permit Not Required for Maintenance or Pump Repair or Replacement. – A repair permit shall not be required for any private drinking water well maintenance work that does not involve breaking or opening the well seal. A repair permit shall not be required for any private drinking water well repair work that involves only the repair or replacement of a pump or tank.
(d) Well Site Evaluation. – The local health department shall conduct a field investigation to evaluate the site on which a private drinking water well is proposed to be located before issuing a permit pursuant to this section. The field investigation shall determine whether there is any abandoned well located on the site, and if so, the construction permit shall
be conditioned upon the proper closure of all abandoned wells located on the site in accordance with the requirements of this Article and rules adopted pursuant to this Article. If a private drinking water well is proposed to be located on a site on which a wastewater system subject to the requirements of Article 11 of Chapter 130A of the General Statutes is located or proposed to be located, the application for a construction permit shall be accompanied by a plat or site plan, as defined in G.S. 130A-334.

If the well location marked on the map submitted with an application to a local well program is also marked with a stake or similar marker on the property, then the local well program may not require the contractor to be on site during the on-site predrill inspection, as long as the contractor is available by telephone to answer questions.

(e) Issuance of Permit. – Within 30 days of receipt of an application to construct or repair a well, a local health department shall make a determination whether the proposed private drinking water well can be constructed or repaired and operated in compliance with this Article and rules adopted pursuant to this Article and shall issue a permit or denial accordingly. If a local health department fails to act within 30 days, the permit shall automatically be issued, and the local health department may challenge issuance of the permit as provided in Chapter 150B of the General Statutes. The local health department may impose any conditions on the issuance of a construction permit or repair permit that it determines to be necessary to ensure compliance with this Article and rules adopted pursuant to this Article. Notwithstanding any other provision of law, no permit for a well that is in compliance with this Article and the rules adopted pursuant to this Article shall be denied on the basis of a local government policy that discourages or prohibits the drilling of new wells.

(e1) Notice for Wells at Contamination Sites. – The Commission shall adopt rules governing permits issued for private drinking water wells for circumstances in which the local health department has determined that the proposed site for a private drinking water well is located within 1,000 feet of a known source of release of contamination. Rules adopted pursuant to this subsection shall provide for notice and information of the known source of release of contamination and any known risk of issuing a permit for the construction and use of a private drinking water well on such a site.

(f) Expiration and Revocation. – A construction permit or repair permit shall be valid for a period of five years except that the local health department may revoke a permit at any time if it determines that there has been a material change in any fact or circumstance upon which the permit is issued. The foregoing shall be prominently stated on the face of the permit. The validity of a construction permit or a repair permit shall not be affected by a change in ownership of the site on which a private drinking water well is proposed to be located or is located if the location of the well is unchanged and the well and the facility served by the well remain under common ownership.

(f1) Chlorination of the Well. – Upon completion of construction of a private drinking water well, the well shall be sterilized in accordance with the standards of drinking water wells established by the United States Public Health Service.

(g) Certificate of Completion. – Upon completion of construction of a private drinking water well or repair of a private drinking water well for which a permit is required under this section, the local health department shall inspect the well to determine whether it was constructed or repaired in compliance with the construction permit or repair permit. If the local health department determines that the private drinking water well has been constructed or repaired in accordance with the requirements of the construction permit or repair permit, the construction and repair requirements of this Article, and rules adopted pursuant to this Article, the local health department shall issue a certificate of completion. No person shall place a private drinking water well into service without first having obtained a certificate of completion. No person shall return a private drinking water well that has undergone repair to service without first having obtained a certificate of completion.
(h) Drinking Water Testing. – Within 30 days after it issues a certificate of completion for a newly constructed private drinking water well, the local health department shall test the water obtained from the well or ensure that the water obtained from the well has been sampled and tested by a certified laboratory in accordance with rules adopted by the Commission for Public Health. The water shall be tested for the following parameters: arsenic, barium, cadmium, chromium, copper, fluoride, lead, iron, magnesium, manganese, mercury, nitrates, nitrates, selenium, silver, sodium, zinc, pH, and bacterial indicators.

(i) Commission for Public Health to Adopt Drinking Water Testing Rules. – The Commission for Public Health shall adopt rules governing the sampling and testing of well water and the reporting of test results. The rules shall allow local health departments to designate third parties to collect and test samples and report test results. The rules shall also provide for corrective action and retesting where appropriate. The Commission for Public Health may by rule require testing for additional parameters, including volatile organic compounds, if the Commission makes a specific finding that testing for the additional parameters is necessary to protect public health. If the Commission finds that testing for certain volatile organic compounds is necessary to protect public health and initiates rule making to require testing for certain volatile organic compounds, the Commission shall consider all of the following factors in the development of the rule: (i) known current and historic land uses around well sites and associated contaminants; (ii) known contaminated sites within a given radius of a well and any known data regarding dates of contamination, geology, and other relevant factors; (iii) any GIS-based information on known contamination sources from databases available to the Department of Environment and Natural Resources; and (iv) visual on-site inspections of well sites. In addition, the rules shall require local health departments to educate citizens for whom new private drinking water wells are constructed and for citizens who contact local health departments regarding testing an existing well on all of the following:

1. The scope of the testing required pursuant to this Article.
2. Optional testing available pursuant to this Article.
3. The limitations of both the required and optional testing.

(j) Test Results. – The local health department shall provide test results to the owner of the newly constructed private drinking water well and, to the extent practicable, to any leaseholder of a dwelling unit or other facility served by the well at the time the water is sampled. The local health department shall include with any test results provided to an owner of a private drinking water well, information regarding the scope of the required and optional testing as established by rules adopted pursuant to subsection (i) of this section.

(k) Registry of Permits and Test Results. – Each local health department shall maintain a registry of all private drinking water wells for which a construction permit or repair permit is issued that is searchable by address or addresses served by the well. The registry shall specify the physical location of each private drinking water well and shall include the results of all tests of water from each well. The local health department shall retain a record of the results of all tests of water from a private drinking water well until the well is properly closed in accordance with the requirements of this Article and rules adopted pursuant to this Article.

(l) Authority Not Limited. – This section shall not be construed to limit any authority of local boards of health, local health departments, the Department of Health and Human Services, or the Commission for Public Health to protect public health.”

SECTION 3.5.(b) Article 7A of Chapter 87 of the General Statutes is amended by adding a new section to read:

§ 87-98.14. Reciprocity.

To the extent that other states provide for the licensing or certification of well contractors, the Commission shall permit those individuals who present valid proof of licensure or certification in good standing in one or more of those states to sit for examination for a license of the same or equivalent classification in North Carolina without delay, upon satisfactory proof furnished to the Commission that the qualifications of the applicant are equal to the
qualifications of holders of similar licenses in North Carolina and upon payment of the required fee."

SECTION 3.5.(c) Article 7 of Chapter 87 of the General Statutes is amended by adding a new section to read:

"§ 87-97.1. Issuance of permit for irrigation water well.

(a) A property owner may apply for, and be issued, a permit for an irrigation water well, whether the property is connected to, or served by, a public water system. The application shall be in accordance with G.S. 87-97 and shall specifically state that the irrigation water well will not be interconnected to plumbing required that is connected to any public water system and will be used for irrigation or other nonpotable purposes only.

(b) This section shall not apply if the property is connected to, or may be served by, a public water system that the public authority or unit of government operating the public water system is being assisted by the Local Government Commission.

c) For purposes of this section, “irrigation water well” shall mean any water well that is not interconnected to any plumbing required to be connected to any public water system and that produces water that is used for irrigation or other nonpotable purposes only."

SECTION 3.5.(d) Article 7 of Chapter 87 of the General Statutes is amended by adding a new section to read:

"§ 87-97.2. Issuance of permit for property within service area of a public water system.

(a) Notwithstanding G.S. 130A-55(16), 153A-284, 160A-317, 162A-6(a)(14d), and 162A-14(2), a property owner may apply for, and be issued, a permit for a private drinking water well to serve any undeveloped or unimproved property located so as to be served by a public water system.

(c) Upon compliance with this Article, the property owner receiving a permit pursuant to subsection (a) or (b) of this section shall not be required to connect to the public water system for so long as the permitted private drinking water well remains compliant and in use. A property owner may opt to connect to the public water system if the property owner so desires. If the property owner opts to connect, the property owner may continue to operate the private drinking water well if that well is not interconnected to any plumbing connected to the public water system and that produces water that is used for irrigation or other nonpotable purposes only.

(d) Nothing in this section shall require a property owner to install a private drinking water well if the property is located so as to be served by a public water system and the public water system is willing to provide service to the property.

e) This section shall not apply, and a public water system may mandate connection to that public water system, in any of the following situations:

(1) The private drinking water well serving the property has failed and cannot be repaired.

(2) The property is located in an area where the drinking water removed by the private drinking water well is contaminated or likely to become contaminated due to nearby contamination.

(3) The public authority or unit of government operating the public water system is being assisted by the Local Government Commission.

(4) The public authority or unit of government operating the public water system is in the process of expanding or repairing the public water system and is actively making progress to having water lines installed directly available to provide water service to that property within the 24 months of
the time the property owner applies for the private drinking water well permit.

SECTION 3.5.(e) G.S. 153A-284 reads as rewritten:

(a) A county may require the owner of developed property on which there are situated one or more residential dwelling units or commercial establishments located so as to be served by a water line or sewer collection line owned, leased as lessee, or operated by the county or on behalf of the county to connect the owner's premises with the water or sewer line and may fix charges for these connections.

(b) In the case of improved property that would qualify for the issuance of a building permit for the construction of one or more residential dwelling units or commercial establishments and where the county has installed water or sewer lines or a combination thereof directly available to the property, the county may require payment of a periodic availability charge, not to exceed the minimum periodic service charge for properties that are connected.

(c) In accordance with G.S. 87-97.1, when developed property is located so as to be served by a county water line and the property owner has connected to that water line, the property owner may continue to use any private water well located on the property for nonpotable purposes as long as the water well is not interconnected to the county water line and the county shall not require the owner of any such water well to abandon, cap, or otherwise compromise the integrity of the water well."

SECTION 3.5.(f) G.S. 160A-317 is amended by adding a new subsection to read:

"(d) In accordance with G.S. 87-97.1, when developed property is located so as to be served by a city water line and the property owner has connected to that water line, the property owner may continue to use any private water well located on the property for nonpotable purposes as long as the water well is not interconnected to the city water line and the city shall not require the owner of any such water well to abandon, cap, or otherwise compromise the integrity of the water well."

The power granted by this subdivision may be exercised by a district only to the extent that the service, whether water, sewer, or a combination thereof, to be provided by the district is not then being provided to the improved property by any other political subdivision or by a public utility regulated by the North Carolina Utilities Commission pursuant to Chapter 62 of the General Statutes. In the case of improved property that would qualify for the issuance of a building permit for the construction of one or more residential dwelling units or commercial establishments and where the district has installed water or sewer lines or a combination thereof directly available to the property, the district may require payment of a periodic availability charge, not to exceed the minimum periodic service charge for properties that are connected. In accordance with G.S. 87-97.1, when developed property is located so as to be served by a sanitary district water line and the property owner has connected to that water line, the property owner may continue to use any private water well located on the property for nonpotable purposes as long as the water well is not interconnected to the sanitary district water line and the sanitary district shall not
require the owner of any such water well to abandon, cap, or otherwise compromise the integrity of the water well.”

SECTION 13.1.(b) Part 1 of Article 21 of Chapter 143 of the General Statutes is amended by adding a new section to read:

“§ 143-214.23A. Limitations on local government riparian buffer requirements.

(a) As used in this section:

(1) "Local government ordinance" means any action by a local government carrying the effect of law approved before or after October 1, 2015, whether by ordinance, comprehensive plan, policy, resolution, or other measure.

(2) "Protection of water quality" means nutrient removal, pollutant removal, stream bank protection, or protection of an endangered species as required by federal law.

(3) "Riparian buffer area" means an area subject to a riparian buffer requirement.

(4) "Riparian buffer requirement" means a landward setback from surface waters.

(b) Except as provided in this section, a local government may not enact, implement, or enforce a local government ordinance that establishes a riparian buffer requirement that exceeds riparian buffer requirements necessary to comply with or implement federal or State law or a condition of a permit, certificate, or other approval issued by a federal or State agency.

(c) Subsection (b) of this section shall not apply to any local government ordinance that establishes a riparian buffer requirement enacted prior to August 1, 1997, if (i) the ordinance included findings that the requirement was imposed for purposes that include the protection of aesthetics, fish and wildlife habitat, and recreational use by maintaining water temperature, healthy tree canopy and understory, and the protection of the natural shoreline through minimization of erosion and potential chemical pollution in addition to the protection of water quality and the prevention of excess nutrient runoff, and (ii) the ordinance would permit small or temporary structures within 50 feet of the water body and docks and piers within and along the edge of the water body under certain circumstances.

(d) A local government may request from the Commission the authority to enact, implement, and enforce a local government ordinance that establishes a riparian buffer requirement for the protection of water quality that exceeds riparian buffer requirements for the protection of water quality necessary to comply with or implement federal or State law or a condition of a permit, certificate, or other approval issued by a federal or State agency. To do so, a local government shall submit to the Commission an application requesting this authority that includes the local government ordinance, including the riparian buffer requirement for the protection of water quality, scientific studies of the local environmental and physical conditions that support the necessity of the riparian buffer requirement for the protection of water quality, and any other information requested by the Commission. Within 90 days after the Commission receives a complete application, the Commission shall review the application and notify the local government whether the application has been approved, approved with modifications, or disapproved. The Commission shall not approve a local government ordinance that establishes a riparian buffer requirement for the protection of water quality unless the Commission finds
that the scientific evidence presented by the local government supports the necessity of the riparian buffer requirement for the protection of water quality.

(g) Cities and counties shall not treat the land within a riparian buffer area as if the land is the property of the State or any of its subdivisions unless the land or an interest therein has been acquired by the State or its subdivisions by a conveyance or by eminent domain. Land within a riparian buffer area in which neither the State nor its subdivisions holds any property interest may be used by the property owner to satisfy any other development-related regulatory requirements based on property size, including, but not limited to, residential density and nonresidential intensity calculations and yields, tree conservation purposes, open space or conservation area requirements, setbacks, perimeter buffers, and lot area requirements.

(f) When riparian buffer requirements are included within a lot, cities and counties shall require that the riparian buffer area be shown on the recorded plat. Nothing in this subsection shall be construed to require that the riparian buffer area be surveyed. When riparian buffer requirements are placed outside of lots in portions of a subdivision that are designated as common areas or open space and neither the State nor its subdivisions holds any property interest in that riparian buffer area, the local government shall attribute to each lot abutting the riparian buffer area a proportionate share based on the area of all lots abutting the riparian buffer area for purposes of development-related regulatory requirements based on property size, including, but not limited to, residential density and nonresidential intensity calculations and yields, tree conservation purposes, open space or conservation area requirements, setbacks, perimeter buffers, and lot area requirements.

The Commission may adopt rules to implement this section.”

SECTION 13.1.(d) This section becomes effective October 1, 2015.

SECTION 13.2.(a) The Environmental Management Commission, with the assistance of the Department of Environment and Natural Resources, shall examine ways to provide regulatory relief from the impacts of riparian buffer rules adopted to implement the State's Riparian Buffer Protection Program for parcels of land that were platted on or before the effective date of the applicable riparian buffer rule. The Commission shall specifically examine ways to fairly provide properties with relief where a change in use has occurred that would otherwise trigger the requirements of the riparian buffer rules. Such relief would be determined on a case-by-case basis and provide relief to successor owners. For purposes of this study, a change in use that would otherwise trigger the requirements of the riparian buffer rules shall not include either of the following circumstances:

(1) Developing from a vacant condition to a use allowed by the current local regulations, unless the local regulations have been changed at the request of the property owner since the date the buffer rule was applied; the parcel was recorded prior to the effective date of the applicable buffer rule; and the allowable use is for any nonfarming or nonagricultural purpose.

(2) The property configuration has not been altered except as a result of either an eminent domain action or a recombination involving not more than three
parcels, all of which were recorded before the effective date of the applicable buffer rule.

The Commission may also consider and recommend other circumstances that should not constitute a change in use that would otherwise trigger the requirements of the riparian buffer rules. No later than April 1, 2016, the Commission shall report the results of its study, including any recommendations, to the Environmental Review Commission.

SECTION 13.2.(b) This section becomes effective October 1, 2015.

SECTION 13.3.(a) As used in this section, “coastal wetlands” means any salt marsh or other marsh subject to regular or occasional flooding by tides, including wind tides, whether or not the tidewaters reach the marshland areas through natural or artificial watercourses, provided this shall not include hurricane or tropical storm tides.

SECTION 13.3.(b) For purposes of implementing 15A NCAC 02B .0233 (Neuse River Basin: Nutrient Sensitive Waters Management Strategy: Protection and Maintenance of Existing Riparian Buffers) and 15A NCAC 02B .0259 (Tar-Pamlico River Basin: Nutrient Sensitive Waters Management Strategy: Protection and Maintenance of Existing Riparian Buffers), Zone 1 of a protective riparian buffer for coastal wetlands shall begin at the most landward limit of the normal high water level or the normal water level, as appropriate.

SECTION 13.3.(c) The Environmental Management Commission shall adopt temporary rules to amend its rules consistent with this section.

(e) If the court does not find that the defendant to be mentally retarded has an intellectual disability in the pretrial proceeding, upon the introduction of evidence of the defendant’s mental retardation raising the issue of intellectual disability during the sentencing hearing, the court shall submit a special issue to the jury as to whether the defendant is mentally retarded has an intellectual disability as defined in this section. This special issue shall be considered and answered by the jury prior to the consideration of aggravating or mitigating factors and the determination of sentence. If the jury determines that the defendant to be mentally retarded, has an intellectual disability, the court shall declare the case noncapital and the defendant shall be sentenced to life imprisonment.

(f) The defendant has the burden of production and persuasion to demonstrate mental retardation-intellectual disability to the jury by a preponderance of the evidence.

(g) If the jury determines that the defendant is not mentally retarded does not have an intellectual disability as defined by this section, the jury may consider any evidence of mental retardation-intellectual disability presented during the sentencing hearing when determining aggravating or mitigating factors and the defendant’s sentence.

SECTION 1.(e) Nomination of Presidential Candidates by State Board of Elections. – No later than December 16, 2015, the chair of each political party shall submit to the State Board of Elections a list of its presidential candidates to be placed on the 2016 presidential preference primary ballot. The State Board of Elections shall prepare and publish a list of the names of the presidential candidates submitted. The State Board of Elections shall convene in Raleigh on January 5, 2016. At the meeting required by this section, the State Board of Elections shall nominate as presidential primary candidates all candidates affiliated with a political party, recognized pursuant to the provisions of Article 9 of Chapter 163 of the General Statutes, who have been submitted to the State Board of Elections. Additionally, the State Board of Elections, by vote of at least three of its members in the affirmative, may nominate as a presidential primary candidate any other person affiliated with a political party that it finds is generally advocated and recognized in the news media throughout the United States or in North Carolina as candidates for the nomination by that party. Persons registered as "Unaffiliated" shall not participate in the presidential primary except as provided in G.S. 163-119.

SECTION 1.(i) Allocation of Delegate Positions. – Upon completion and certification of the primary results by the State Board of Elections, the Secretary of State shall certify the results of the 2016 presidential preference primary to the State chair of each political party. The candidate receiving the highest number of votes in the presidential preference primary of each party shall be nominated. Each political party shall require the delegate positions appointed by that party to support the candidate certified as receiving the highest number of votes until one convention nominating ballot has been taken at the 2016 national party convention, unless that candidate has withdrawn from the race and has ceased to actively seek election to the office of President of the United States in more than one state at the time the first convention nominating ballot is taken at the 2016 national party convention.

SECTION 1.(j) Conflict With National Rules. – In case of conflict between the requirements of subsection (i) of this section and the national rules of a political party, the State executive committee of that party has the authority to resolve the conflict by adopting for that party the national rules, which shall then supersede any provision in subsection (i) of this section with which it conflicts, provided that the executive committee shall take only such action under this section necessary to resolve the conflict.

A person registered as "Unaffiliated" shall be ineligible to file as a candidate in a party primary election.

Persons whose qualifications to register and vote mature after the day of the first primary and before the day of the second primary may register on the day of the second primary and, when thus registered, shall be entitled to vote in the second primary. The second primary is a continuation of the first primary and any voter who files a proper and timely written affirmation of change of address within the county under the provisions of G.S. 163-82.15, in the first primary may vote in the second primary without having to refile that written affirmation if the voter is otherwise qualified to vote in the second primary. SECTION 2.(e) Special Elections. – Any special election authorized by statute or local act that is set for May 2016 shall be placed on the ballot at the time of the presidential preference primary, as established by subsection (b) of Section 1 of this act, unless the unit of government calling the special election affirmatively changes the date for the special election to another date in accordance with G.S. 163-287.

SECTION 3.(p) G.S. 163-278.19B reads as rewritten:

"§ 163-278.19B. Political party headquarters building funds.

Notwithstanding the provisions of G.S. 163-278.19, a person prohibited by that section from making a contribution may donate to political parties and affiliated party committees and committees may accept from such a person money and other things of value donated to a political party headquarters building fund. Donations to the political party headquarters building fund shall be subject to all the following rules:

(1) The donations solicited and accepted are designated to the political party headquarters building fund.

(2) Potential donors to that fund are advised that all donations will be exclusively for the political party headquarters building fund.

(3) The political party or affiliated party committee establishes a separate segregated bank account into which shall be deposited only donations for the political party headquarters building fund from persons prohibited by G.S. 163-278.19 from making contributions.

(4) The donations deposited in the separate segregated bank account for the political party headquarters building fund will be spent only to purchase a principal headquarters building, to construct a principal headquarters building, to renovate a principal headquarters building, to pay a mortgage on a principal headquarters building, to repay donors if a principal headquarters building is not purchased, constructed, or renovated, or to pay building rent or monthly or bimonthly utility expenses incurred to operate the principal headquarters building. Donations deposited into that account shall be used solely for the purposes set forth in the preceding sentence, and specifically shall not be used for headquarters equipment other than fixtures, personnel compensation, or travel or fundraising expenses or requirements of any kind. Notwithstanding the above, personnel compensation and in-kind benefits may be paid to no more than three personnel whose functions are primarily administrative in nature, such as providing accounting, payroll, or campaign finance reporting services, for the party and whose job functions require no more than ten percent (10%) of work time to be spent on political advocacy each calendar year.

(5) The political party executive committee or affiliated party committee shall report donations to and spending by a political party headquarters building fund on every report required to be made by G.S. 163-278.9. If a committee is excused from making general campaign finance reports under G.S. 163-278.10A, that committee shall nonetheless report donations in any amount to and spending in any amount by the political party headquarters building fund at the times required for reports in G.S. 163-278.9.
If all the criteria set forth in subdivisions (1) through (5) of this section are complied with, then donations to and spending by a political party headquarters building fund do not constitute contributions or expenditures as defined in G.S. 163-278.6. If those criteria are complied with, then donations may be made to a political party headquarters building fund.”

SECTION 3.(q)  G.S. 163-278.38Z reads as rewritten:

SECTION 1.(b) G.S. 143B-437.52 reads as rewritten:

"§ 143B-437.52. Job Development Investment Grant Program.  
(a) Program. – There is established the Job Development Investment Grant Program to be administered by the Economic Investment Committee. In order to foster job creation and investment in the economy of this State, the Committee may enter into agreements with businesses to provide grants in accordance with the provisions of this Part. The Committee, in consultation with the Attorney General, shall develop criteria to be used in determining whether the conditions of this section are satisfied and whether the project described in the application is otherwise consistent with the purposes of this Part. Before entering into an agreement, the Committee must find that all the following conditions are met:

(1) The project proposed by the business will create, during the term of the agreement, a net increase in employment in this State by the business.

(2) The project will benefit the people of this State by increasing opportunities for employment and by strengthening this State's economy by, for example, providing worker training opportunities, constructing and enhancing critical infrastructure, increasing development in strategically important industries, or increasing the State and local tax base.

(3) The project is consistent with economic development goals for the State and for the area where it will be located.

(4) A grant under this Part is necessary for the completion of the project in this State.

(5) The total benefits of the project to the State outweigh its costs and render the grant appropriate for the project.

(6) For a project located in a development tier three area, the affected local governments have participated in recruitment and offered incentives in a manner appropriate to the project.

(b) Priority. – In selecting between applicants, a project that is located in an Eco-Industrial Park certified under G.S. 143B-437.08 has priority over a comparable project that is not located in a certified Eco-Industrial Park.

(c) Awards. – Award Limitations. – The following limitations apply to grants awarded under this Part:

(1) Maximum liability. – The maximum amount of total annual liability for grants awarded in any single calendar year under this Part, including amounts transferred to the Utility Account pursuant to G.S. 143B-437.61, is fifteen-twenty million dollars ($15,000,000)–($20,000,000) for a year in which no grants are awarded for a high-yield project and is thirty-five million dollars ($35,000,000) for a year in which a grant is awarded for a high-yield project. No agreement may be entered into that, when considered together with other existing agreements governing grants awarded during a
single calendar year, could cause the State's potential total annual liability for grants awarded in a single calendar year to exceed the applicable amount. The Department shall make every effort to ensure that the average percentage of withholdings of eligible positions for grants awarded under this Part does not exceed the average of the range provided in G.S. 143B-437.56(a).

(2) Semiannual commitment limitations. – Of the amount authorized in subdivision (1) of this subsection, no more than fifty percent (50%), excluding roll-over amounts, may be awarded in any single calendar semiannual period. A roll-over amount is any amount from a previous semiannual period in the same calendar year that was not awarded as a grant. The limitation of this subdivision does not apply to a grant awarded to a high-yield project.

(d) Measuring Employment. – For the purposes of subdivision (a)(1) of this section and G.S. 143B-437.51(5), 143B-437.51(7), and 143B-437.57(a)(11), the Committee may designate that the increase or maintenance of employment is measured at the level of a division or another operating unit of a business, rather than at the business level, if both of the following conditions are met:

(1) The Committee makes an explicit finding that the designation is necessary to secure the project in this State.

(2) The agreement contains terms to ensure that the business does not create eligible positions by transferring or shifting to the project existing positions from another project of the business or a related member of the business.”

SECTION 1.(c) G.S. 143B-437.53 reads as rewritten:

"§ 143B-437.53. Eligible projects.
(a) Minimum Number of Eligible Positions. – A business may apply to the Committee for a grant for any project that creates the minimum number of eligible positions as set out in the table below. If the project will be located in more than one development tier area, the location with the highest development tier area designation determines the minimum number of eligible positions that must be created.

SECTION 1.(d) G.S. 143B-437.55(c) reads as rewritten:

"(c) Annual Reports. – The Committee shall publish a report on the Job Development Investment Grant Program on or before April 30 of each year. The Committee shall submit the report electronically to the House of Representatives Finance Committee, the Senate Finance Committee, the House of Representatives Appropriations Subcommittee on Natural and Economic Resources, the Senate Appropriations Committee on Natural and Economic Resources, and the Fiscal Research Division. The report shall include the following:

…

(11) A listing of all businesses making an application under this Part and an explanation of whether each business ultimately located the project in this State regardless of whether the business was awarded a grant for the project under this Part.

(11a) A listing, itemized by development tier, of the number of offers that have been calculated, estimated, or extended but were not accepted and the total award value of the offers.

…"
§ 143B-437.56. Calculation of minimum and maximum grants; factors considered.

(a) Subject to the limitations provisions of subsections (a1) and (d) of this section, the amount of the grant awarded in each case shall be a percentage of the withholdings of eligible positions. The percentage shall be no less than ten percent (10%) and no more than seventy-five percent (75%) of the withholdings of the eligible positions for a period of years. The percentage shall be no more than eighty percent (80%) for a development tier one area and no more than seventy-five percent (75%) for any other area. If the project will be located in more than one area designation, the location with the highest area designation determines the maximum percentage to be used. The percentage used to determine the amount of the grant shall be based on criteria developed by the Committee, in consultation with the Attorney General, after considering at least the following:

1. The number of eligible positions to be created.
2. The expected duration of those positions.
3. The type of contribution the business can make to the long-term growth of the State's economy.
4. The amount of other financial assistance the project will receive from the State or local governments.
5. Whether the project utilizes existing infrastructure and resources in the community.
6. Whether the project is located in a development zone.
7. The number of eligible positions that would be filled by residents of a development zone.
8. The extent to which the project will mitigate unemployment in the State and locality.

(a1) Notwithstanding the percentage specified by subsection (a) of this section, if the project is a high-yield project, the business has met the investment and job creation requirements, and, for three consecutive years, the business has met all terms of the agreement, the amount of the grant awarded shall be no more than one hundred percent (100%) of the withholdings of eligible positions for each consecutive year the business maintains the minimum job creation requirement and meets all terms of the agreement. A business receiving an enhanced percentage of the withholdings of eligible positions under this subsection that fails to maintain the minimum job creation requirement or meet all terms of the agreement will be disqualified from receiving the enhanced percentage and will have the applicable percentage set forth in subsection (a) of this section applied in the year in which the failure occurs and all remaining years of the grant term.

(b) The term of the grant shall not exceed 12 years starting with the first year a grant payment is made. The first grant payment must be made within six years after the date on which the grant was awarded. The number of years in the base period for which grant payments may be made shall not exceed five years.

1. For high-yield projects in which the business receives the enhanced percentage pursuant to subsection (a1) of this section, 20 years starting with the first year a grant payment is made. If a business is disqualified from the enhanced percentage in one of the first 12 years, the term of the grant shall not exceed 12 years starting with the first year a grant payment is made. If a business is disqualified from receiving the enhanced percentage after the first 12 years, the term of the grant ends in the year the disqualification occurs.

2. For all other projects, 12 years starting with the first year a grant payment is made.

(c) The grant may be based only on eligible positions created during the base period.

(d) For any eligible position that is located in a development tier three area, seventy-five percent (75%) of the annual grant approved for disbursement shall be payable to
the business, and twenty-five percent (25%) shall be payable to the Utility Account pursuant to G.S. 143B-437.61. For any eligible position that is located in a development tier two area, eighty-five percent (85%) ninety percent (90%) of the annual grant approved for disbursement shall be payable to the business, and fifteen percent (15%) ten percent (10%) shall be payable to the Utility Account pursuant to G.S. 143B-437.61. A position is located in the development tier area that has been assigned to the county in which the project is located at the time the application is filed with the Committee. This subsection does not apply to a high-yield project in years in which the business receives the enhanced percentage pursuant to subsection (a1) of this section.

(e) A business that is receiving any other grant by operation of State law may not receive an amount as a grant pursuant to this Part that, when combined with any other grants, exceeds seventy-five percent (75%) of the applicable maximum percentage of the withholdings of the business, as provided in subsections (a) and (a1) of this section, unless the Committee makes an explicit finding that the additional grant is necessary to secure the project.

(f) The amount of a grant associated with any specific eligible position, including any amount transferred to the Utility Account pursuant to G.S. 143B-437.61, may not exceed six thousand five hundred dollars ($6,500) in any year.

SECTION 1.(f) G.S. 143B-437.57(a) reads as rewritten:

"(a) Terms. – Each community economic development agreement shall include at least the following:

(10) A provision that requires the business to maintain operations at the project location or another location approved by the Committee for at least one hundred fifty percent (150%) of the term of the grant and a provision to permit the Committee to recapture all or part of an appropriate portion of the grant at its discretion if the business does not remain at the site for the required term.

(11) A provision that requires the business to maintain employment levels in this State at the greater of the level of employment on the date of the application or the level of employment on the date of the award.

..."

SECTION 1.(g) G.S. 143B-437.62 reads as rewritten:

"§ 143B-437.62. Expiration.

The authority of the Committee to award new grants expires January 1, 2016-2019."

SECTION 1.(h) Section 15.19(a1) of S.L. 2013-360 reads as rewritten:

"SECTION 15.19.(a1) Notwithstanding G.S. 143B-437.52(c), for the 2013-2015 fiscal biennium, period from July 1, 2013, to December 31, 2015, the maximum total liability for grants awarded, including amounts transferred to the Utility Account pursuant to G.S. 143B-437.61, is twenty-two million five hundred thousand dollars ($22,500,000) and, for the period from July 1, 2015, to December 31, 2015, the maximum total liability for grants awarded, including amounts transferred to the Utility Account pursuant to G.S. 143B-437.61, is seven million five hundred thousand dollars ($7,500,000). If no grant is awarded for a high-yield project and is fifty million dollars ($50,000,000) if a grant is awarded for a high-yield project. No agreement may be entered into that, when considered together with other existing agreements governing grants awarded during an applicable time period provided in this subsection, could cause the State's potential total annual liability for grants awarded in that time period to exceed the designated maximum amount."

SECTION 1.(i) The Department of Commerce shall study the factors that have contributed to the termination of grants awarded pursuant to Part 2G of Article 10 of Chapter 143B of the General Statutes. In conducting the study required by this subsection, the Department shall examine the efforts of other states that have permitted similar economic
development programs to incent businesses to create jobs for the purpose of determining best practices for remediating underperformance of participating businesses in order to lower the incidence of community economic development agreements under G.S. 143B-437.57 ending in termination. The Department shall submit the report to the House of Representatives Finance Committee, the Senate Finance Committee, the House of Representatives Committee on Agriculture and Natural and Economic Resources, the Senate Appropriations Committee on Natural and Economic Resources, and the Fiscal Research Division no later than March 1, 2016.

SECTION 1.(j) Subsections (d) and (h) of this section are effective when this act becomes law. The remainder of this section becomes effective July 1, 2015, and applies to awards made under Part 2G of Article 10 of Chapter 143B of the General Statutes on or after that date.

PART II. ONE NC MODIFICATIONS

SECTION 2.(a) G.S. 143B-437.72(c) reads as rewritten:
"(c) Local Government Grant Agreement. – An agreement between the State and one or more local governments shall contain the following provisions:
(1) A commitment on the part of the local government to match the funds allocated by the State, as provided in this subdivision. A local match may include cash, fee waivers, in-kind services, the donation of assets, the provision of infrastructure, or a combination of these.

If the 911 Board determines that the rates produce revenue that exceeds or is less than the amount needed, the 911 Board may adjust the rates. The rates must ensure full cost recovery for voice communications service providers and for primary PSAPs over a reasonable period of time. The 911 Board must set the service charge for prepaid wireless telecommunication service at the same rate as the monthly service charge for nonprepaid service. A change in the rate becomes effective only on July 1. The 911 Board must notify providers of a change in the rates at least 90 days before the change becomes effective. The 911 Board must notify the Department of Revenue of a change in the rate for prepaid wireless telecommunications service at least 90 days before the change becomes effective. The Department of Revenue must provide notice of a change in the rate for prepaid wireless telecommunications service at least 45 days before the change becomes effective only on the Department's Web site.

(e) Collection. A voice communications service provider has no obligation to take any legal action to enforce the collection of the service charge billed to a subscriber. The 911 Board may initiate a collection action, and reasonable costs and attorneys' fees associated with that collection action may be assessed against the subscriber. At the request of the 911 Board, but no more than annually, a voice communications service provider must report to the 911 Board the amount of the provider's uncollected service charges. The 911 Board may request, to the extent permitted by federal privacy laws, the name, address, and telephone number of a subscriber who refuses to pay the 911 service charge."

SECTION 4.(d) G.S. 62A-44(b)(2) reads as rewritten:
"(2) A percentage of the funds remitted by CMRS providers, all funds remitted by the Department of Revenue from prepaid wireless telecommunications service, and all funds remitted by all other voice communications service providers are allocated for monthly distributions to primary PSAPs pursuant to G.S. 62A-46 and grants to PSAPs pursuant to G.S. 62A-47."

SECTION 4.(e) G.S. 62A-46(c)(3) reads as rewritten:

"(3) Charges associated with the service supplier's 911 service and other service supplier recurring charges. The PSAP providing 911 service is responsible to the voice communications service provider for all 911 installation, service, equipment, operation, and maintenance charges owed to the voice communications service provider. A PSAP may contract with a voice communications service provider on terms agreed to by the PSAP and the provider."

SECTION 4.(f) G.S. 62A-48 reads as rewritten:

The 911 Board must give written notice of violation to any voice communications service provider or PSAP found by the 911 Board to be using monies from the 911 Fund for purposes not authorized by this Article. Upon receipt of notice, the voice communications service provider or PSAP must cease making any unauthorized expenditures. The voice communications service provider or PSAP may petition the 911 Board for a hearing on the question of whether the expenditures were unauthorized, and the 911 Board must grant the request within a reasonable period of time. If, after the hearing, the 911 Board concludes the expenditures were in fact unauthorized, the 911 Board may require the voice communications service provider or PSAP to refund the monies improperly spent within 90 days. Money received under this section must be credited to the 911 Fund. If a voice communications service provider or PSAP does not cease making unauthorized expenditures or refuses to refund improperly spent money, the 911 Board must suspend funding to the provider or PSAP until corrective action is taken."

SECTION 4.(g) G.S. 62A-51 reads as rewritten:

Each CMRS provider must provide its 10,000 number groups to a PSAP upon request. This information remains the property of the disclosing CMRS provider and must be used only in providing emergency response services to 911 calls. CMRS voice communications service provider connection information obtained by PSAP personnel for public safety purposes is not public information under Chapter 132 of the General Statutes. No person may disclose or use, for any purpose other than the 911 system, information contained in the database of the telephone network portion of a 911 system."

SECTION 4.(h) G.S. 62A-52 reads as rewritten:

All proprietary information submitted to the 911 Board or the State Auditor is confidential. Proprietary information submitted pursuant to this Article is not subject to disclosure under Chapter 132 of the General Statutes, and it may not be released to any person other than to the submitting CMRS voice communications service provider, the 911 Board, and the State Auditor without the express permission of the submitting CMRS voice communications service provider. Proprietary information is considered a trade secret under the Trade Secrets Protection Act, Article 24 of Chapter 66 of the General Statutes. General information collected by the 911 Board or the State Auditor may be released or published only in aggregate amounts that do not identify or allow identification of numbers of subscribers or revenues attributable to an individual CMRS voice communications service provider."

For purposes of this definition, the commercial production or growing of animals includes the rearing, feeding, training, caring, and managing of horses. Agricultural land includes woodland and wasteland that is a part of the farm unit, but the woodland and wasteland included in the unit must be appraised under the use-value schedules as woodland or wasteland. the assessor and shall have no bearing on the determination of whether the individual parcel of land meets one or more of the classes defined in G.S. 105-277.3(a). If the assessor is able to rebut the presumption, this shall not invalidate the determination that the applicant’s principal business is farming agricultural land, horticultural land, or forestland in the other county.

2. All of its members are, directly or indirectly, individuals who are actively engaged in farming agricultural land, horticultural land, or forestland or a relative of one of the individuals who is actively engaged. An individual is indirectly a member of a business entity that owns the land if the individual is a member of a business entity or a beneficiary of a trust that is part of the ownership structure of the business entity that owns the land.

3. It is not a corporation whose shares are publicly traded, and none of its members are corporations whose shares are publicly traded.

4. If it leases the land, all of its members are individuals and are relatives. Under this condition, “principal business” and “actively engaged” include leasing.

c. A trust that meets all of the following conditions:

1. It was created by an individual who owned the land and transferred the land to the trust.

2. All of its beneficiaries are, directly or indirectly, individuals who are the creator of the trust or a relative of the creator. An individual is indirectly a beneficiary of a trust that owns the land if the individual is a beneficiary of another trust or a member of a business entity that has a beneficial interest in the trust that owns the land.

§ 113-415.1. Local ordinances prohibiting regulating oil and gas exploration, development, and production activities invalid; petition to preempt local ordinance.

(a) It is the intent of the General Assembly to maintain a uniform system for the management of oil and gas exploration, development, and production activities, and the use of horizontal drilling and hydraulic fracturing for that purpose, and to place limitations upon the exercise by all units of local government in North Carolina of the power to regulate the management of oil and gas exploration, development, and production activities by means of special, local, or private acts or resolutions, ordinances, property restrictions, zoning regulations, or otherwise. Notwithstanding any authority granted to counties, municipalities, or other local authorities to adopt local ordinances, including, but not limited to, those imposing taxes, fees, or charges or regulating health, environment, or land use, any local ordinance that prohibits or has the effect of prohibiting all provisions of local ordinances, including those regulating land use, adopted by counties, municipalities, or other local authorities that regulate or have the effect of regulating oil and gas exploration, development, and production activities that the Mining and Energy Commission has preempted pursuant to this section, shall be invalid to the extent necessary to effectuate the purposes of this Article. To this end, all provisions of special, local, or private acts or resolutions are repealed that do the following:

(1) Prohibit the siting of wells for oil and gas exploration, development, and production within any county, city, or other political subdivision.
(2) Prohibit the use of horizontal drilling or hydraulic fracturing for the purpose of oil or gas exploration or development within any county, city, or other political subdivision.

(4) In any manner are in conflict or inconsistent with the provisions of this Article.

(b) No special, local, or private act or resolution enacted or taking effect hereafter may be construed to modify, amend, or repeal any portion of this Article, unless it expressly provides for such by specific references to the appropriate section of this Article. Further to this end, all provisions of local ordinances, including those regulating land use, adopted by counties, municipalities, or other local authorities that prohibit or have the effect of prohibiting oil and gas exploration, development, and production activities and use of horizontal drilling or hydraulic fracturing for that purpose within the jurisdiction of a local government are invalidated to the extent preempted by the Commission pursuant to this section.

(c) When oil and gas exploration, development, and production activities would be prevented from construction or operation by a county, municipal, or other local ordinance, the operator of the proposed activities may petition the Mining and Energy Commission to review the matter. After receipt of a petition, the Commission shall hold a hearing in accordance with the procedures in subsection (d) of this section and shall determine whether or to what extent to
preempt the local ordinance to allow for the proposed oil and gas exploration, development, and production activities.

(c1) If a local zoning or land-use ordinance imposes requirements, restrictions, or conditions that are generally applicable to development, including, but not limited to, setback, buffer, and stormwater requirements, and oil and gas exploration, development, and production activities would be regulated under the ordinance of general applicability, the operator of the proposed activities may petition the Oil and Gas Commission to review the matter. After receipt of a petition, the Commission shall hold a hearing in accordance with the procedures in subsection (d) of this section and shall determine whether or to what extent to preempt the local ordinance to allow for the regulation of oil and gas exploration, development, and production activities.

(d) When a petition described in subsection (c)(c1) of this section has been filed with the Oil and Gas Commission, the Commission shall hold a public hearing to consider the petition. The public hearing shall be held in the affected locality within 60 days after receipt of the petition by the Commission. The Commission shall give notice of the public hearing by both of the following means:

(1) Publication in a newspaper or newspapers having general circulation in the county or counties where the activities are to be conducted, once a week for three consecutive weeks, the first notice appearing at least 30 days prior to the scheduled date of the hearing.

(2) First-class mail to persons who have requested notice. The Commission shall maintain a mailing list of persons who request notice in advance of the hearing pursuant to this section. Notice by mail shall be complete upon deposit of a copy of the notice in a postage-paid wrapper addressed to the person to be notified at the address that appears on the mailing list maintained by the Commission, in a post office or official depository under the exclusive care and custody of the United States Postal Service.

(e) Any interested person may appear before the Oil and Gas Commission at the hearing to offer testimony. In addition to testimony before the Commission, any interested person may submit written evidence to the Commission for the Commission's consideration. At least 20 days shall be allowed for receipt of written comment following the hearing.

(f) A local zoning or land-use ordinance is presumed to be valid and enforceable to the extent the zoning or land-use ordinance imposes requirements, restrictions, or conditions that are generally applicable to development, including, but not limited to, setback, buffer, and stormwater requirements, unless the Oil and Gas Commission makes a finding of fact to the contrary. The Commission shall determine whether or to what extent to preempt local ordinances so as to allow for the establishment and operation of the facility no later than 60 days after conclusion of the hearing. The Commission shall preempt a local ordinance only if the Commission makes all of the following findings:

(1) That there is a local ordinance that would prohibit or have the effect of prohibiting oil and gas exploration, development, and production activities, or use of horizontal drilling or hydraulic fracturing for that purpose.

(2) That all legally required State and federal permits or approvals have been issued by the appropriate State and federal agencies or that all State and federal permit requirements have been satisfied and that the permits or approvals have been denied or withheld only because of the local ordinance.

(3) That local citizens and elected officials have had adequate opportunity to participate in the permitting process.

(4) That the oil and gas exploration, development, and production activities, and use of horizontal drilling or hydraulic fracturing for that purpose, will not pose an unreasonable health or environmental risk to the surrounding...
locality and that the operator has taken or consented to take reasonable measures to avoid or manage foreseeable risks and to comply to the maximum feasible extent with applicable local ordinances.

(g) If the Oil and Gas Mining and Energy Commission does not make all of the findings under subsection (f) of this section, the Commission shall not preempt the challenged local ordinance. The Commission's decision shall be in writing and shall identify the evidence submitted to the Commission plus any additional evidence used in arriving at the decision.

(h) The decision of the Oil and Gas Mining and Energy Commission shall be final unless a party to the action files a written appeal under Article 4 of Chapter 150B of the General Statutes, as modified by this section, within 30 days of the date of the decision. The record on appeal shall consist of all materials and information submitted to or considered by the Commission, the Commission's written decision, a complete transcript of the hearing, all written material presented to the Commission regarding the location of the oil and gas exploration, development, and production activities, the specific findings required by subsection (f) of this section, and any minority positions on the specific findings required by subsection (f) of this section. The scope of judicial review shall be as set forth in G.S. 150B-51, except as this subsection provides regarding the record on appeal.

(i) If the court reverses or modifies the decision of the Oil and Gas Mining and Energy Commission, the judge shall set out in writing, which writing shall become part of the record, the reasons for the reversal or modification.

(j) In computing any period of time prescribed or allowed by this procedure, the provisions of Rule 6(a) of the Rules of Civil Procedure, G.S. 1A-1, shall apply."

SECTION 56.2.(b) G.S. 130A-309.205 reads as rewritten:

Interest shall not accrue for the period a taxpayer is making timely payments under a payment plan. The tax collector is authorized to issue forms and develop procedures to implement a payment plan authorized under this section.

Notwithstanding G.S. 105-365.1(b), for parcels that have been transferred in a tax year for which errors requiring reappraisals under this act resulted in an underpayment of taxes, the following apply:

(1) The taxes for each tax year prior to and in the fiscal year in which the transfer occurred shall be collected from the owner of record as of January 1 of each tax year for which unpaid taxes exist. Only the remedies available in G.S. 105-367 and G.S. 105-368 may be used to collect against the owner of record as of January 1 of each tax year for which unpaid taxes exist.

(2) Notwithstanding G.S. 105-355(a), there shall be no lien on the real property for underpaid taxes that arose in a year in which the property is owned by a person other than the current owner as of January 1 of that year. The current owner shall not be held personally responsible for such underpaid taxes.

Interest on the refund shall be calculated at a rate of five percent (5%) per annum from the date the owner asserting the defense paid the underpaid taxes until the date the refund is issued."

SECTION 2. G.S. 105-321 is amended by adding a new subsection to read:

"(g) Minimal Refunds. – The governing body of a taxing unit that collects its own taxes may, by resolution, direct the taxing unit not to mail a refund for an overpayment of tax if the refund is less than fifteen dollars ($15.00). time of the settlement and shall implement a system by which payment of the refund may be made to a taxpayer who comes into the office of the taxing unit seeking the refund. Unless the taxpayer requests the minimal refund in person at the office of the taxing unit before the end of the fiscal year in which the refund is due, the taxing unit must implement a system to apply the minimal refund as a credit against the tax liability of the taxpayer for taxes due to the taxing unit for the next succeeding year. An overpayment of tax bears interest at the rate set under G.S. 105-241.21 from the date the interest begins to accrue until a refund is paid or applied in accordance with this section. Interest accrues from the later of the date the tax was paid and the date the tax would have been considered delinquent under G.S. 105-360. A resolution adopted pursuant to this subsection must be adopted on or before June 15 preceding the first taxable year to which it applies and remains in effect until amended or repealed by resolution of the taxing unit.

Session Law 2015-272  
H.B. 698

AN ACT DIRECTING THE COMMISSION FOR PUBLIC HEALTH TO ADOPT RULES TO ADD A SCREENING TEST FOR SEVERE COMBINED IMMUNODEFICIENCY AND OTHER T-CELL LYMPHOPENIAS TO THE NEWBORN SCREENING PROGRAM.

Whereas, severe combined immunodeficiency (SCID), often known as "bubble boy disease," is a primary immune deficiency caused by several different genetic defects, most of which are hereditary; and

Whereas, children born with SCID lack immunity against bacteria, viruses, and fungi and are prone to repeated and persistent infections that would not cause serious illness in a person or infant with a normal immune system; and

Whereas, unless treated early, a child will mostly likely die from opportunistic infections as an infant; and

Whereas, it has been known for the past 15 years that early recognition of SCID through newborn screening is critical to successful management of patients with SCID; and

Whereas, Baby Carlie Nugent of Harrisburg died in 2000 at the age of 7 months from complications of SCID following a bone marrow transplant because her condition was not diagnosed until she was more than 6 months old; and
Whereas, early screening for SCID prior to 3.5 months of age could have saved her life; and

Whereas, development and implementation of a screening test for T-Cell lymphopenia has been accomplished, which led to the unanimous recommendation by the United States Secretary of Health and Human Service's Advisory Committee on Heritable Disorders of Newborns and Children in January 2010 to add SCID to the list of conditions routinely screened for at birth; and

Whereas, as of November 2014, there are 26 states screening for SCID, and the North Carolina Newborn Screening Advisory Committee unanimously approved adding SCID to this State's newborn screening panel in January 2011, yet SCID screening still has not started in this State; and

Whereas, the leading center for treatment of SCID in the United States is located in North Carolina at the Duke University Medical Center; and

Whereas, that Center demonstrated in 1999 that, if a bone marrow transplant could be performed before a baby is 3.5 months of age, there is a 94% survival rate, compared with a 70% survival rate if the infant is transplanted after that age; and

Whereas, infants who do not receive a bone marrow transplant are likely to die before the age of two; and

Whereas, in addition to saving lives, the early diagnosis of SCID also saves money, considering the cost of testing a SCID newborn who is not diagnosed until there is a serious infection can range from five hundred thousand dollars ($500,000) to well over four million five hundred thousand dollars ($4,500,000), while the cost of transplanting a SCID infant who is not sick is usually less than one hundred thousand dollars ($100,000); Now, therefore,

The General Assembly of North Carolina enacts:

SECTION 1. The Commission for Public Health shall amend rules adopted pursuant to G.S. 130A-125 to implement the Newborn Screening Program established under said section to add to the newborn screening panel a screening test for severe combined immunodeficiency (SCID) and other T-Cell lymphopenias detectable as a result of SCID.

SECTION 2. This act is effective when it becomes law.

Became law upon approval of the Governor at 2:15 p.m. on the 19th day of October, 2015.

SECTION 2. Article 56A of Chapter 58 of the General Statutes is amended by adding a new section to read:

"§ 58-56A-10. Civil penalties for violations; administrative procedure.

(a) Whenever the Commissioner has reason to believe that a pharmacy benefits manager has violated any of the provisions of this Article with such frequency as to indicate a general business practice, the Commissioner may, after notice and opportunity for a hearing, proceed under the appropriate subsections of this section.

(b) If, under subsection (a) of this section, the Commissioner finds a violation of this Article, the Commissioner may order the payment of a monetary penalty as provided in subsection (c) of this section or petition the Superior Court of Wake County for an order directing payment of restitution as provided in subsections (d) and (e) of this section, or both. (c) If the Commissioner orders the payment of a monetary penalty pursuant to subsection (b) of this section, the penalty shall not be less than one hundred dollars ($100.00) nor more than one thousand dollars ($1,000) per day for each prescription drug resulting from the pharmacy benefit manager’s failure to comply with G.S. 58-56A-5. In determining the amount of the penalty, the Commissioner shall consider the degree and extent of harm caused by the violation, the amount of money that inured to the benefit of the violator as a result of the violation, whether the violation was committed willfully, and the prior record of the violator in complying or failing to comply with laws, rules, or orders applicable to the violator. The clear proceeds of the penalty shall be remitted to the Civil Penalty and Forfeiture Fund in accordance with G.S. 115C-457.2. Payment of the civil penalty under this section shall be in addition to payment of any other penalty for a violation of the criminal laws of this State.

The petition may be made at any time and also in any appeal of the Commissioner’s order.

(e) Upon petition of the Commissioner the court may order the pharmacy benefits manager who committed a violation specified in subsection (b) of this section to make restitution to the Department for extraordinary administrative expenses, including expenses under subsection (f) of this section, incurred in the investigation, hearing, and any appeals associated with the violation in such amount that would reimburse the agency for the expenses. The petition may be made at any time and also in any appeal of the Commissioner’s order.

(f) The Commissioner may contract with consultants and other professionals with relevant expertise as necessary and appropriate to conduct investigation, hearing, and appeals activities as provided in this section. Such contracts shall not be subject to G.S. 114-2.3, G.S. 147-17, or Articles 3, 3C, and 8 of Chapter 143 of the General Statutes, together with rules and procedures adopted under those Articles concerning procurement, contracting, and contract review.

(g) Nothing in this section prevents the Commissioner from negotiating a mutually acceptable agreement with any pharmacy benefits manager as to any civil penalty or restitution.

(h) Unless otherwise specifically provided for, all administrative proceedings under this Article are governed by Chapter 150B of the General Statutes. Appeals of the Commissioner’s orders under this section shall be governed by G.S. 58-2-75.”

The General Assembly of North Carolina enacts:

SECTION 1. Article 1 of Chapter 50 of the General Statutes is amended by adding a new section to read:

"§ 50-13.01. Purposes.

It is the policy of the State of North Carolina to:

(1) Encourage focused, good faith, and child-centered parenting agreements to reduce needless litigation over child custody matters and to promote the best interest of the child.

(2) Encourage parents to take responsibility for their child by setting the expectation that parenthood will be a significant and ongoing responsibility.

(3) Encourage programs and court practices that reflect the active and ongoing participation of both parents in the child's life and contact with both parents when such is in the child's best interest, regardless of the parents' present marital status, subject to laws regarding abuse, neglect, and dependency.

(4) Encourage both parents to share equitably in the rights and responsibilities of raising their child, even after dissolution of marriage or unwed relationship.

(5) Encourage each parent to establish and maintain a healthy relationship with the other parent when such is determined to be in the best interest of the child, taking into account mental illness, substance abuse, domestic violence, or any other factor the court deems appropriate."

SECTION 2. G.S. 50-13.2(a) reads as rewritten:

"§ 50-13.2. Who entitled to custody; terms of custody; visitation rights of grandparents; taking child out of State; consideration of parent's military service.

(a) An order for custody of a minor child entered pursuant to this section shall award the custody of such child to such person, agency, organization or institution as will best promote the interest and welfare of the child. In making the determination, the court shall consider all relevant factors including acts of domestic violence between the parties, the safety of the child, and the safety of either party from domestic violence by the other party and shall make findings accordingly. An order for custody must include written findings of fact which reflect the consideration of each of these factors and that support the determination of what is in the best interest of the child. Between the mother and father, the parents, whether
natural or adoptive, no presumption shall apply as to who will better promote the interest and welfare of the child. Joint custody to the parents shall be considered upon the request of either parent."

(2) Special Allocation Provisions. – In determining the use of the proceeds of public improvement bonds and notes, including premium thereon, if any, set forth in subdivision (1) of this subsection, the following special allocation provisions apply:

a. The proceeds of public improvement bonds and notes, including premium thereon, if any, for Statewide capital repairs and renovations for The University of North Carolina, as provided in subdivision (1) of this subsection, shall be used for projects that are eligible to receive funds from the Repairs and Renovations Reserve under G.S. 143C-4-3(b). Any items purchased with such proceeds and installed or replaced as part of a renovation or rehabilitation must have a useful life of at least 10 years or must extend the life of the facility by at least 10 years once renovated or rehabilitated. Such proceeds (i) shall be prioritized to constituent institutions not otherwise specified as receiving proceeds under subdivision (1) of this subsection and (ii) shall not be used to increase any amount to a constituent institution otherwise specified as receiving proceeds under subdivision (1) of this subsection.

b. The proceeds of public improvement bonds and notes, including premium thereon, if any, for NC Community Colleges, as provided in subdivision (1) of this subsection, shall be used for new construction or rehabilitation of existing facilities and repairs and renovations. Any items purchased with such proceeds and installed or replaced as part of a renovation or rehabilitation must have a useful life of at least 10 years or must extend the life of the facility by at least 10 years once renovated or rehabilitated. In order to receive the proceeds under this sub-subdivision for projects for new
construction, the community college receiving the proceeds shall provide local matching funds from county funds, other non-State funds, or a combination of these sources for such proceeds. The amount of matching funds shall be (i) one dollar ($1.00) of local matching funds for every three dollars ($3.00) of such proceeds for a community college with a main campus located in a development tier one area, as defined in G.S. 143B-437.08, (ii) one dollar ($1.00) of local matching funds for every two dollars ($2.00) of such proceeds for a community college with a main campus located in a development tier two area, as defined in G.S. 143B-437.08, and (iii) one dollar ($1.00) of local matching funds for every one dollar ($1.00) of such proceeds for a community college with a main campus located in a development tier three area, as defined in G.S. 143B-437.08. Community colleges are not required to match bond proceeds allocated in this section for rehabilitation of existing facilities and repairs and renovations.

c. The proceeds of public improvement bonds and notes, including premium thereon, if any, for the Department of Environment and Natural Resources for Statewide Children With Disabilities and Veterans With Disabilities Local Parks (Matching Grants), as provided in subdivision (1) of this subsection, shall be allocated to the Parks and Recreation Trust Fund established in G.S. 113-44.15 and shall be used exclusively for grants to local government units or public authorities, as defined in G.S. 159-7, for construction of special facilities or adaptation of existing facilities that meet the unique needs of children with physical and developmental disabilities and veterans with physical and developmental disabilities and enable them to participate in recreational and sporting activities, regardless of their abilities. In order to receive such proceeds under this sub-subdivision, a local government unit or public authority shall provide matching funds in the amount of one dollar ($1.00) of local funds for every four dollars ($4.00) of such proceeds. Grants made using such proceeds under this sub-subdivision shall not exceed five hundred thousand dollars ($500,000) per project.

d. The proceeds of public improvement bonds and notes, including premium thereon, if any, for the Department of Environmental Quality for Statewide Water/Sewer Loans and Grants, as provided in subdivision (1) of this subsection, shall be allocated to the Water Infrastructure Fund established in G.S. 159G-22. One hundred million dollars ($100,000,000) shall be used for grants, and the remainder shall be used for low-interest loans. The proceeds for loans and the proceeds for grants shall be allocated in equal proportion to the Drinking Water Reserve and the Wastewater Reserve and shall be subject to the following:

1. If the availability of loan funds exceeds project demand, the limits contained in G.S. 159G-36 applicable to a loan may be exceeded for the purpose of ensuring that all available loan funds are utilized for projects prioritized pursuant to G.S. 159G-23.

2. Loan and grant applications for projects shall be funded first if both of the following criteria are met: (i) the project is required to be completed due to an EPA administrative order or consent decree and (ii) the application for the project is
3. A grant application to be funded from the Wastewater Reserve and required to be prioritized under sub-subdivision 2. of this sub-subdivision shall be awarded a grant equal to fifty percent (50%) of the project costs that are reasonably necessary to comply with the EPA administrative order or consent decree, notwithstanding limits otherwise applicable pursuant to G.S. 159G-36; provided that, the cumulative amount of all grants received by an applicant under this sub-subdivision does not exceed one-third of the amount of bond proceeds for grants allocated to the Wastewater Reserve.

4. A loan application to be funded from the Wastewater Reserve and required to be prioritized under sub-subdivision 2. of this sub-subdivision shall receive a loan equal to the amount sufficient to cover all project costs that are reasonably necessary to comply with the EPA administrative order or consent decree minus the amount of any grant awarded under sub-subdivision 3. of this sub-subdivision; provided that, the cumulative amount of all loans received by an applicant under this sub-subdivision does not exceed fifteen million dollars ($15,000,000).

e. The proceeds of public improvement bonds and notes, including premium thereon, if any, for National Guard, as provided in subdivision (1) of this subsection, shall be used by the Adjutant General of the North Carolina National Guard for capital improvements, as defined in G.S. 143C-1-1(d)(5), for readiness centers located in Guilford, Burke, and Wilkes Counties.

(3) Reallocation. – For public improvement bonds authorized by this section, the General Assembly may at this session or at any subsequent session increase or decrease the allocations of the proceeds of public improvement bonds and notes, including premium thereon, if any, for projects set forth in subdivision (1) of this subsection or reallocate any amounts among agencies or projects not listed in this subsection but listed in the six-year capital improvement plan developed pursuant to G.S. 143C-8-5, so long as the aggregate amount of the allocations does not exceed two billion dollars ($2,000,000,000).

SECTION 1.(g) Allocation and Tracking of Proceeds. –

(1) Public improvement bonds. – The proceeds of public improvement bonds and notes, including premium thereon, if any, except the proceeds of bonds the issuance of which has been anticipated by bond anticipation notes or the proceeds of refunding bonds or notes, shall be placed by the State Treasurer in a special fund to be designated "Public Improvement Bonds Fund," which may include such appropriate special accounts therein as may be determined.
by the State Treasurer and shall be disbursed as provided in this section. Monies in the Public Improvement Bonds Fund shall be allocated and expended as provided in this section.

Any additional monies that may be received by means of a grant or grants from the United States of America or any agency or department thereof or from any other source for deposit to the Public Improvement Bonds Fund may be placed in the Public Improvement Bonds Fund or in a separate account or fund and shall be disbursed, to the extent permitted by the terms of the grant or grants, without regard to any limitations imposed by this section.

Monies in the Public Improvement Bonds Fund or any separate account established under this section may be invested from time to time by the State Treasurer in the same manner permitted for investment of monies belonging to the State or held in the State treasury, except with respect to grant money to the extent otherwise directed by the terms of the grant. Investment earnings, except investment earnings with respect to grant monies to the extent otherwise directed or restricted by the terms of the grant, may be (i) credited to the Public Improvement Bonds Fund, (ii) used to pay debt service on the bonds authorized by this section, (iii) used to satisfy compliance with applicable requirements of the federal tax law, or (iv) transferred to the General Fund of the State.

The proceeds of public improvement bonds and notes, including premium thereon, if any, may be used with any other monies made available by the General Assembly for funding the projects authorized by this section, including the proceeds of any other State bond issues, whether heretofore made available or that may be made available at the session of the General Assembly at which this section is ratified or any subsequent sessions. The proceeds of public improvement bonds and notes, including premium thereon, if any, shall be expended and disbursed under the direction and supervision of the Director of the Budget. The funds provided by this section shall be disbursed for the purposes provided in this section upon warrants drawn on the State Treasurer by the State Controller, which warrants shall not be drawn until requisition has been approved by the Director of the Budget and which requisition shall be approved only after full compliance with the State Budget Act, Chapter 143C of the General Statutes.

(2) Tracking of bond proceeds. – The State Treasurer or the State Treasurer's designee is hereby authorized and directed to set up a comprehensive system of tracking the proceeds of the public improvement bonds and notes, including premium thereon, if any, to the extent necessary to enable the State Treasurer or the State Treasurer's designee to properly account for the use of such proceeds for compliance with applicable requirements of the federal tax law or otherwise. All recipients of such proceeds shall comply with any tracking system implemented by the State Treasurer or the State Treasurer's designee for this purpose. The State Treasurer may withhold such proceeds from any State agency or department not complying with this subdivision.

(3) Costs. – Allocations to the costs of a capital improvement or undertaking in each case may include allocations to pay the costs set forth in sub-subdivisions c. through g. of subdivision (2) of subsection (d) of this section in connection with the issuance of bonds for that capital improvement or undertaking.

SECTION 1.(i) Election. – The question of the issuance of the bonds authorized by this section shall be submitted to the qualified voters of the State at the time of the election in 2016 when voters of this State are given an opportunity to express their preference for the
person to be the presidential candidate of their political party. Any other primary, election, or referendum validly called or scheduled by law at the time the election on the bond question provided for in this subsection is held may be held as called or scheduled. Notice of the election shall be given in the manner and at the times required by G.S. 163-33(8). The election and the registration of voters therefor shall be held under and in accordance with the general laws of the State. Absentee ballots shall be authorized in the election and shall be available 50 days prior to the date on which the election is to be held.

Ballots, voting systems authorized by Article 14A of Chapter 163 of the General Statutes, or both may be used in accordance with rules prescribed by the State Board of Elections. The bond question to be used in the ballots or voting systems shall be in substantially the following form:

"[ ] FOR [ ] AGAINST

The issuance of two billion dollars ($2,000,000,000) State of North Carolina Public Improvement Bonds constituting general obligation bonds of the State secured by a pledge of the faith and credit and taxing power of the State for the purpose of providing funds, with any other available funds, to fund capital improvements and new facilities for the State, including, without limitation, the construction and furnishing of new facilities and the renovation and rehabilitation of existing facilities for, without limitation, the University of North Carolina System, the North Carolina Community College System, water and sewer systems, the State's National Guard, the Department of Agriculture and Consumer Services, attractions and parks, and the Department of Public Safety."

If a majority of those voting on the bond question in the election vote in favor of the issuance of the bonds described in the question, those bonds may be issued as provided in this section. If a majority of those voting on a bond question in the election do not vote in favor of the issuance of the bonds described in the question, those bonds shall not be issued.

The results of the election shall be canvassed and declared as provided by law for elections for State officers; the results of the election shall be certified by the State Board of Elections to the Secretary of State in the manner and at the time provided by the general election laws of the State.

SECTION 1.(j) Issuance of Bonds and Notes. –

(1) Terms and conditions. – Bonds or notes may bear such date or dates, may be serial or term bonds or notes, or any combination thereof, may mature in such amounts and at such time or times, not exceeding 40 years from their date or dates, may be payable at such place or places, either within or without the United States of America, in such coin or currency of the United States of America as at the time of payment is legal tender for payment of public and private debts, may bear interest at such rate or rates, which may vary from time to time, and may be made redeemable before maturity, at the option of the State or otherwise as may be provided by the State, at such price or prices, including a price less than the face amount of the bonds or notes, and under such terms and conditions, all as may be determined by the State Treasurer by and with the consent of the Council of State.

(2) Signatures; form and denomination; registration. – Bonds or notes may be issued as certificated or uncertificated obligations. If issued as certificated obligations, bonds or notes shall be signed on behalf of the State by the Governor or shall bear the Governor's facsimile signature, shall be signed by the State Treasurer or shall bear the State Treasurer's facsimile signature, and shall bear the Great Seal of the State of North Carolina or a facsimile thereof shall be impressed or imprinted thereon. If bonds or notes bear the facsimile signatures of the Governor and the State Treasurer, the bonds or notes shall also bear a manual signature, which may be that of a bond registrar, trustee, paying agent, or designated assistant of the State Treasurer. Should any officer whose signature or facsimile signature appears on bonds or notes
cease to be such officer before the delivery of the bonds or notes, the
signature or facsimile signature shall nevertheless have the same validity for
all purposes as if the officer had remained in office until delivery, and bonds
or notes may bear the facsimile signatures of persons who at the actual time
of the execution of the bonds or notes shall be the proper officers to sign any
bond or note, although at the date of the bond or note such persons may not
have been such officers. The form and denomination of bonds or notes,
including the provisions with respect to registration of the bonds or notes
and any system for their registration, shall be as the State Treasurer may
determine in conformity with this section; provided, however, that nothing in
this section shall prohibit the State Treasurer from proceeding, with respect
to the issuance and form of the bonds or notes, under the provisions of
Chapter 159E of the General Statutes, the Registered Public Obligations Act,
as well as under this section.

(3) Manner of sale; expenses. – Subject to the consent of the Council of State,
the State Treasurer shall determine the manner in which bonds or notes shall
be offered for sale, whether at public or private sale, whether within or
without the United States of America, and whether by publishing notices in
certain newspapers and financial journals, mailing notices, inviting bids by
correspondence, negotiating contracts of purchase, or otherwise, and the
State Treasurer is authorized to sell bonds or notes at one time or from time
to time at such rate or rates of interest, which may vary from time to time,
and at such price or prices, including a price less than the face amount of the
bonds or the notes, as the State Treasurer may determine. All expenses
incurred in preparation, sale, and issuance of bonds or notes shall be paid by
the State Treasurer from the proceeds of bonds or notes or other available
monies.

(4) Notes; repayment. –

a. Subject to the consent of the Council of State, the State Treasurer is
hereby authorized to borrow money and to execute and issue notes of
the State for the same, but only in the following circumstances and
under the following conditions:

1. For anticipating the sale of bonds to the issuance of which the
Council of State shall have given consent, if the State
Treasurer shall deem it advisable to postpone the issuance of
the bonds.

2. For the payment of interest on or any installment of principal
of any bonds then outstanding, if there shall not be sufficient
funds in the State treasury with which to pay the interest or
installment of principal as they respectively become due.

3. For the renewal of any loan evidenced by notes herein
authorized.

4. For the purposes authorized in this section.

5. For refunding bonds or notes as herein authorized.

b. Funds derived from the sale of bonds or notes may be used in the
payment of any bond anticipation notes issued under this section.
Funds provided by the General Assembly for the payment of interest
on or principal of bonds shall be used in paying the interest on or
principal of any notes and any renewals thereof, the proceeds of
which shall have been used in paying interest on or principal of the
bonds.

(5) Refunding bonds and notes. – By and with the consent of the Council of
State, the State Treasurer is authorized to issue and sell refunding bonds and
notes pursuant to the provisions of the State Refunding Bond Act for the purpose of refunding bonds or notes issued pursuant to this section. The refunding bonds and notes may be combined with any other issues of State bonds and notes similarly secured.

(6) Tax exemption. – Bonds and notes shall be exempt from all State, county, and municipal taxation or assessment, direct or indirect, general or special, whether imposed for the purpose of general revenue or otherwise, excluding inheritance and gift taxes, income taxes on the gain from the transfer of bonds and notes, and franchise taxes. The interest on bonds and notes shall not be subject to taxation as to income.

(7) Investment eligibility. – Bonds and notes are hereby made securities in which all public officers, agencies, and public bodies of the State and its political subdivisions; all insurance companies, trust companies, investment companies, banks, savings banks, savings and loan associations, credit unions, pension or retirement funds, and other financial institutions engaged in business in the State; and executors, administrators, trustees, and other fiduciaries may properly and legally invest funds, including capital in their control or belonging to them. Bonds and notes are hereby made securities that may properly and legally be deposited with and received by any officer or agency of the State or political subdivision of the State for any purpose for which the deposit of bonds, notes, or obligations of the State or any political subdivision of the State is now or may hereafter be authorized by law.

(8) Faith and credit. – The faith and credit and taxing power of the State are hereby pledged for the payment of the principal of and the interest on bonds and notes. In addition to the State's right to amend any provision of this section to the extent it does not impair any contractual right of a bond owner, the State expressly reserves the right to amend any provision of this section with respect to the making and repayment of loans, the disposition of any repayments of loans, and any intercept provisions relating to the failure of a local government unit to repay a loan, the bonds not being secured in any respect by loans, any repayments thereof, or any intercept provisions with respect thereto.

SECTION 1.(k) Variable Interest Rates. – In fixing the details of bonds and notes, the State Treasurer may provide that any of the bonds or notes may:

(1) Be made payable from time to time on demand or tender for purchase by the owner thereof, provided a credit facility agreement supports the bonds or notes, unless the State Treasurer specifically determines that a credit facility agreement is not required, upon a finding and determination by the State Treasurer, that the absence of a credit facility agreement will not materially or adversely affect the financial position of the State and the marketing of the bonds or notes at a reasonable interest cost to the State;

(2) Be additionally supported by a credit facility agreement;

(3) Be made subject to redemption or a mandatory tender for purchase prior to maturity;

(4) Bear interest at a rate or rates that may vary for such period or periods of time, all as may be provided in the proceedings providing for the issuance of the bonds or notes, including, without limitation, such variations as may be permitted pursuant to a par formula; and

(5) Be made the subject of a remarketing agreement whereby an attempt is made to remarket bonds or notes to new purchasers prior to their presentment for payment to the provider of the credit facility agreement or to the State.
If the aggregate principal amount repayable by the State under a credit facility agreement is in excess of the aggregate principal amount of bonds or notes secured by the credit facility agreement, whether as a result of the inclusion in the credit facility agreement of a provision for the payment of interest for a limited period of time or the payment of a redemption premium or for any other reason, then the amount of authorized but unissued bonds or notes during the term of such credit facility agreement shall not be less than the amount of such excess, unless the payment of such excess is otherwise provided for by agreement of the State executed by the State Treasurer.

SECTION 1.(l) Interpretation of Section. –
(1) Additional method. – The foregoing subsections of this section shall be deemed to provide an additional and alternative method for the doing of the things authorized thereby and shall be regarded as supplemental and additional to powers conferred by other laws and shall not be regarded as in derogation of any powers now existing.
(2) Statutory references. – References in this section to specific sections or Chapters of the General Statutes or to specific acts are intended to be references to these sections, Chapters, or acts as they may be amended from time to time by the General Assembly.
(3) Broad construction. – The General Assembly specifically has chosen to combine what otherwise might be considered differing projects to be financed into one bond bill and bond question because the General Assembly finds that such differing projects, when taken together, constitute an interrelated, united, and single plan for the State's infrastructure as stated aforesaid. Accordingly, this section, being necessary for the health, welfare, and advancement of the people of the State, shall be broadly construed to affect the purposes thereof.
(4) Inconsistent provisions. – Insofar as the provisions of this section are inconsistent with the provisions of any general laws, or parts thereof, the provisions of this section shall be controlling.
(5) Severability. – If any provision of this section or the application thereof to any person or circumstance is held invalid, such invalidity shall not affect other provisions or applications of the section that can be given effect without the invalid provision or application, and to this end, the provisions of this section are declared to be severable.

SECTION 2. Other than community colleges, each entity receiving the proceeds of public improvement bonds and notes, including premium thereon, if any, issued pursuant to and for projects listed in Section 1 of this act shall report by January 1, 2017, and quarterly thereafter, to the Joint Legislative Oversight Committee on Capital Improvements, the House of Representatives Appropriations Committee, and the Senate Committee on Appropriations/Base Budget on the projects funded from public improvement general obligation bonds authorized by Section 1 of this act. Community colleges receiving the proceeds of public improvement bonds and notes, including premium thereon, if any, issued pursuant to and for projects listed in Section 1 of this act shall report by January 1, 2017, and quarterly thereafter, to the North Carolina Community Colleges System Office on the projects funded from public improvement general obligation bonds authorized by Section 1 of this act, and the System Office shall combine the reports and submit them to the Joint Legislative Oversight Committee on Capital Improvements, the House of Representatives Appropriations Committee, and the Senate Committee on Appropriations/Base Budget. Each report shall include the total project costs, the amount to be funded from the bonds, the expenditures to date from the bonds and other sources, and the percentage of each project completed.

SECTION 3. The State Treasurer shall not issue bonds or notes otherwise authorized by Section 1 of this act in an amount or year where the issuance of the bonds or
notes would violate the Debt Affordability Advisory Committee's recommendations on debt capacities required under G.S. 142-101.

SECTION 4.(a) The portion of funds estimated to be needed for escalation of costs for projects, other than for NC Community Colleges, for DEQ Statewide Water/Sewer Loans and Grants, and for State parks, funded in whole or in part with the proceeds of public improvement bonds and notes, including premium thereon, if any, issued pursuant to Section 1 of this act, shall remain with the Office of State Budget and Management and shall be disbursed only for the following purposes:

(1) To address unforeseen contingencies related to the specific project for which the funds were made available.

(2) To address inflation costs related to that specific project.

SECTION 4.(b) Any funds retained by the Office of State Budget and Management pursuant to subsection (a) of this section at the time a project is completed shall be retained by the Office of State Budget and Management until reallocated for other purposes by the General Assembly. The Office of State Budget and Management shall report to the Joint Legislative Oversight Committee on Capital Improvements on any funds retained pursuant to this subsection within 90 days of a project's completion.

SECTION 5. This act is effective when it becomes law.

In the General Assembly read three times and ratified this the 30th day of September, 2015.

Became law upon approval of the Governor at 10:30 a.m. on the 21st day of October, 2015.

(2) Company. – An entity which has written, issued, or reinsured life insurance contracts, accident and health insurance contracts, annuity contracts, pure endowment contracts, or deposit-type contracts (i) in this State and has at least one such policy in force or on claim or (ii) in any state and is required to hold a certificate of authority to write life insurance, accident and health
insurance, annuity contract, pure endowment, or deposit-type contracts in this State.

(3) Deposit-type contract. – A contract that does not incorporate mortality or morbidity risks and as may be specified in the valuation manual.

(4) Policyholder behavior. – Any action a policyholder, contract holder, or any other person with the right to elect options, such as a certificate holder, may take under a policy or contract subject to this section, including, but not limited to, lapse, withdrawal, transfer, deposit, premium payment, loan, annuitization, or benefit elections prescribed by the policy or contract but excluding events of mortality or morbidity that result in benefits prescribed in their essential aspects by the terms of the policy or contract.

(5) Principle-based valuation. – A reserve valuation that uses one or more methods or one or more assumptions determined by the insurer and is required to comply with subsection (n) of this section as specified in the valuation manual.

(6) Qualified actuary. – An individual who is qualified to sign the applicable statement of actuarial opinion in accordance with the American Academy of Actuaries qualification standards for actuaries signing such statements and who meets the requirements specified in the valuation manual.

(7) Reserves. – Reserve liabilities.

(8) Tail risk. – A risk that occurs either where the frequency of low probability events is higher than expected under a normal probability distribution or where there are observed events of very significant size or magnitude.

(9) Valuation manual. – The manual of valuation instructions adopted by the NAIC as specified in this section or as subsequently amended.

(b) This subsection applies to policies and contracts issued prior to the operative date of the valuation manual. Each year the Commissioner shall value or cause to be valued the reserve liabilities ("reserves") reserves for all outstanding life insurance policies, annuity contracts, and pure endowment contracts, accident and health insurance contracts, and deposit-type contracts of every life insurance company doing business in this State. In the case of an alien company, the valuation shall be limited to its United States business. The Commissioner may certify the amount of each company's reserves, specifying the mortality or morbidity tables, withdrawal rates, and other assumptions regarding when, and the degree to which, policyholders exercise contract options, such as full or partial withdrawal, rate or rates of interest, and methods, such as net level premium method or other, used in the Commissioner's calculation of the company's reserves. Group methods and approximate averages for fractions of a year or otherwise may be used by the Commissioner in calculating the company's reserves, and the Commissioner may accept the valuation made by the company upon evidence of its correctness that the Commissioner requires. For foreign or alien insurance companies, the Commissioner may accept any valuation made or caused to be made by the insurance regulator of any state or other jurisdiction if (i) that valuation complies with the minimum standard provided in this section and (ii) that regulator accepts as legally sufficient and valid the Commissioner's certificate of valuation when that certificate states that the valuation has been made in a specified manner according to which the aggregate reserves would be at least as great as if they had been computed in the manner prescribed by the law of that state or jurisdiction section.

(b1) The provisions set forth in subsections (c), (d), (d1), (e), (f), (g), (h), and (k) of this section shall apply to all policies and contracts, as appropriate, subject to this section issued on or after the effective date of this section and prior to the operative date of the valuation manual. The provisions set forth in subsections (m) and (n) of this section shall not apply to policies issued prior to the operative date of the valuation manual.

(b2) This subsection applies to policies and contracts issued on or after the operative date of the valuation manual. The Commissioner shall annually value, or cause to be valued, the
reserves for all outstanding life insurance contracts, annuity contracts, pure endowment contracts, accident and health insurance contracts, and deposit-type contracts of every company issued on or after the operative date of the valuation manual. In lieu of the valuation of the reserves required of a foreign or alien company, the Commissioner may accept a valuation made, or caused to be made, by the insurance supervisory official of any state or other jurisdiction when that valuation complies with the minimum standard provided in this section.

(b3) The provisions set forth in subsections (m) and (n) of this section shall apply to all policies and contracts issued on or after the operative date of the valuation manual.

(c) (1) Except as otherwise provided in subdivisions (3) and (4) of this subsection, or in subsection (k) of this section, the minimum standard for the valuation of all such policies and contracts issued before the effective date of this section shall be that provided by the laws in effect immediately before that date, except that the minimum standard for the valuation of annuities and pure endowments purchased under group annuity and pure endowment contracts issued before that date shall be that provided by the laws in effect immediately before that date but replacing the interest rates specified in such laws by an interest rate of five percent (5%) per annum, and five and one-half percent (5 ½%) interest for single premium life insurance policies.

(2) Except as otherwise provided in subdivisions (3) and (4) of this subsection, or in subsection (k) of this section, the minimum standards for the valuation of all such policies and contracts issued on or after the effective date of this section shall be the Commissioner's reserve valuation methods defined in subsections (d), (d-1), and (g), and (k) of this section, five percent (5%) interest for group annuity and pure endowment contracts and three and one-half percent (3 ½%) interest for all other policies and contracts, or, in the case of policies and contracts other than annuity and pure endowment contracts, issued on or after July 1, 1975, four percent (4%) interest for such policies issued prior to April 19, 1979, and four and one-half percent (4 ½%) interest for such policies issued on or after April 19, 1979, and the following tables:

(3) Except as provided in subdivision (4) of this subsection, the minimum standard for the valuation of all individual annuity and pure endowment contracts issued on or after the operative date of this subdivision (3), as defined herein, and for all annuities and pure endowments purchased on or after such operative date under group annuity and pure endowment contracts, shall be the Commissioner's reserve valuation methods defined in subsections (d) and (d-1) of this section and the following tables and interest rates:

After July 1, 1975, any company may file with the Commissioner a written notice of its election to comply with the provisions of this subdivision (3) after a specified date before January 1, 1979, which shall be the operative date of this subdivision for such company, provided, a company may elect a different operative date for individual annuity and pure endowment contracts from that elected for group annuity and pure endowment contracts. If a company makes no such election, the operative date of this subdivision for such company shall be January 1, 1979.

(4) a. Applicability of This Subdivision. This subdivision. The interest rates used in determining the minimum standard for the valuation of:

1. All life insurance policies issued in a particular calendar year, on or after the operative date of subdivision (e)(4) of G.S. 58-58-55,
2. All individual annuity and pure endowment contracts issued in a particular calendar year on or after January 1, 1982.

3. All annuities and pure endowments purchased in a particular calendar year on or after January 1, 1982, under group annuity and pure endowment contracts, and

4. The net increase, if any, in a particular calendar year after January 1, 1982, in amounts held under guaranteed interest contracts shall be the calendar year statutory valuation interest rates as defined in this subdivision.

(d) Except as otherwise provided in subsections (d-1) and (d1), (g), and (k) of this section reserves according to the Commissioner's reserve valuation method, for the life insurance and endowment benefits of policies providing for a uniform amount of insurance and requiring the payment of uniform premiums, shall be the excess, if any, of the present value, at the date of valuation, of such future guaranteed benefits provided for by such policies, over the then present value of any future modified net premiums therefor. The modified net premiums for any such policy shall be such uniform percentage of the respective contract premiums for such benefits that the present value, at the date of issue of the policy, of all such modified net premiums shall be equal to the sum of the then present value of such benefits provided for by the policy and the excess of (1) and (2), as follows:

(1) A net level annual premium equal to the present value, at the date of issue, of such benefits provided for after the first policy year, divided by the present value, at the date of issue, of an annuity of one per annum payable on the first and each subsequent anniversary of such policy on which a premium falls due; provided, however, that such net level annual premium shall not exceed the net level annual premium on the 19-year premium whole life plan for insurance of the same amount at an age one year higher than the age at issue of such policy.

(2) A net one year term premium for such benefits provided for in the first policy year.

Provided that for any life insurance policy issued on or after January 1, 1985, for which the contract premium in the first policy year exceeds that of the second year and for which no comparable additional benefits are provided in the first year for such excess and which provides an endowment benefit or a cash surrender value of a combination thereof in an amount greater than such excess premium, the reserve according to the Commissioner's reserve valuation method as of any policy anniversary occurring on or before the assumed ending date defined herein as the first policy anniversary on which the sum of any endowment benefit and any cash surrender value then available is greater than such excess premium shall, except as otherwise provided in subsection (g), be the greater of the reserve as of such policy anniversary calculated as described in the first paragraph of this subsection and the reserve as of such policy anniversary calculated as described in that paragraph, but with (i) the value defined in subparagraph (1) of that paragraph being reduced by fifteen percent (15%) of the amount of such excess first year premium, (ii) all present values of benefits and premiums being determined without reference to premiums or benefits provided for by the policy after the assumed ending date, (iii) the policy being assumed to mature on such date as an endowment, and (iv) the cash surrender value provided on such date being considered as an endowment benefit. In making the above comparison the mortality and interest bases stated in subdivisions (2) and (4) of subsection (c) shall be used.

Reserves according to the Commissioner's reserve valuation method for: (i) life insurance policies providing for a varying amount of insurance or requiring the payment of varying premiums; (ii) group annuity and pure endowment contracts purchased under a retirement plan
or plan of deferred compensation, established or maintained by an employer (including a partnership or sole proprietorship) or by an employee organization, or by both, other than a plan providing individual retirement accounts or individual retirement annuities by all other annuity and pure endowment contracts, shall be calculated by a method consistent with the principles of this subsection except that any extra premiums charged because of impairments or special hazards shall be disregarded in the determination of modified net premiums.

(d1) This subsection shall apply to all annuity and pure endowment contracts other than group annuity and pure endowment contracts purchased under a retirement plan or plan of deferred compensation, established or maintained by an employer (including a partnership or sole proprietorship) or by an employee organization, or by both, other than a plan providing individual retirement accounts or individual retirement annuities under section 408 of the Internal Revenue Code, as now or hereafter amended.

Reserves according to the Commissioner's annuity reserve method for benefits under annuity or pure endowment contracts, excluding any disability and accidental death benefits in such contracts, shall be the greatest of the respective excesses of the present values, at the date of valuation, of the future guaranteed benefits, including guaranteed nonforfeiture benefits, provided for by such contracts at the end of each respective contract year, over the present value, at the date of valuation, of any future valuation considerations derived from future gross considerations, required by the terms of such contract, that become payable prior to the end of such respective contract year. The future guaranteed benefits shall be determined by using the mortality table, if any, and the interest rate, or rates, specified in such contracts for determining guaranteed benefits. The valuation considerations are the portions of the respective gross considerations applied under the terms of such contracts to determine nonforfeiture values.

(e) In no event shall a company's aggregate reserves for all life insurance policies, excluding disability and accidental death benefits, issued on or after the effective date of this section, be less than the aggregate reserves calculated in accordance with the methods set forth in subsections (d), (d1), (g) and (h) of this section and the mortality table or tables and rate or rates of interest used in calculating nonforfeiture benefits for such policies. In no event shall the aggregate reserves for all policies, contracts, and benefits be less than the aggregate reserves determined by the qualified appointed actuary to be necessary to render the opinion required by subsection (i) or subsection (j1) of this section.

(f) Reserves for all policies and contracts issued before the effective date of this section may be calculated, at the option of the company, according to any standards that produce greater aggregate reserves for those policies and contracts than the minimum reserves required by the laws in effect immediately before that date.

Reserves for any category of policies, contracts or benefits as established by the Commissioner, issued on or after the effective date of this section may be calculated, at the option of the company, according to any standards that produce greater aggregate reserves for such category than those calculated according to the minimum standard herein provided, but the rate or rates of interest used for policies and contracts, other than annuity and pure endowment contracts, shall not be higher than the corresponding rate or rates of interest used in calculating any nonforfeiture benefits provided for therein in the policies or contracts.

Any such company that adopts any standard of valuation producing greater aggregate reserves than those calculated according to the minimum standard herein provided may, with the approval of the Commissioner, adopt any lower standard of valuation, but not lower than the minimum herein provided in this section. Provided, however, that for the purposes of this section, the holding of additional reserves previously determined by a qualified appointed actuary to be necessary to render the opinion required by subsection (e)(i) or (j1) of this section shall not be deemed to be the adoption of a higher standard of valuation.
(g) If in any contract year the gross premium charged by any life insurance company on any policy or contract is less than the valuation net premium for the policy or contract calculated by the method used in calculating the reserve thereon but using the minimum valuation standards of mortality and rate of interest, the minimum reserve required for such policy or contract shall be the greater of either the reserve calculated according to the mortality table, rate of interest, and method actually used for such policy or contract, or the reserve calculated by the method actually used for such policy or contract but using the minimum valuation standards of mortality and rate of interest and replacing the valuation net premium by the actual gross premium in each contract year for which the valuation net premium exceeds the actual gross premium. The minimum valuation standards of mortality and rate of interest referred to in this subsection are those standards stated in subdivisions (1), (2) and (4) of subsection (c).

Provided that for any life insurance policy issued on or after January 1, 1985, for which the gross premium in the first policy year exceeds that of the second year and for which no comparable additional benefit is provided in the first year for such excess and which provides an endowment benefit or a cash surrender value or a combination thereof in an amount greater than such excess premium, the foregoing provisions of this subsection (g) shall be applied as if the method actually used in calculating the reserve for such policy were the method described in subsection (d), ignoring the second paragraph of subsection (d). The minimum reserve at each policy anniversary of such a policy shall be the greater of the minimum reserve calculated in accordance with subsection (d), including the second paragraph of that subsection, and the minimum reserve calculated in accordance with this subsection (g).

(h) In the case of any plan of life insurance which provides for future premium determination, the amounts of which are to be determined by the insurance company based on then estimates of future experience, or in the case of any plan of life insurance or annuity which is of such a nature that the minimum reserves cannot be determined by the methods described in subsections (d), (d-1), (d1) and (g), the reserves which are held under any such plan must:

1. Be appropriate in relation to the benefits and the pattern of premiums for that plan, and
2. Be computed by a method which is consistent with the principles of this Standard Valuation Law, as determined by regulations promulgated by the Commissioner.

(i) Prior to the operative date of the valuation manual as specified in G.S. 58-58-51, every life insurance company doing business in this State shall annually submit the opinion of a qualified actuary as to whether the reserves and related actuarial items held in support of the policies and contracts specified by the Commissioner by rule are computed appropriately, are based on assumptions that satisfy contractual provisions, are consistent with previously reported amounts, and comply with applicable laws of this State. The Commissioner by rule shall define the specifics of this opinion and add any other items deemed to be necessary to its scope. Every life insurance company, except as exempted by or pursuant to rule, shall also annually include in the opinion required by this subsection, an opinion of the same qualified actuary as to whether the reserves and related actuarial items held in support of the policies and contracts specified by the Commissioner by rule, when considered in light of the assets held by the company with respect to the reserves and related actuarial items, including but not limited to the investment earnings on the assets and the considerations anticipated to be received and retained under the policies and contracts, make adequate provision for the company's obligations under the policies and contracts, including but not limited to the benefits under and expenses associated with the policies and contracts. The Commissioner may provide by rule for a transition period for establishing any higher reserves that the qualified actuary may deem to be necessary in order to render the opinion required by this subsection.

(j) Each opinion required by subsection (i) of this section shall be governed by the following provisions:
For the purposes of this section, “qualified actuary” means a member in good standing of the American Academy of Actuaries who meets the requirement set forth in such rules.

On or after the operative date of the valuation manual, every company with outstanding life insurance contracts, annuity contracts, pure endowment contracts, accident and health insurance contracts, or deposit-type contracts in this State and subject to regulation by the Commissioner shall annually submit the opinion of the appointed actuary as to whether the reserves and related actuarial items held in support of the policies and contracts are computed appropriately, are based on assumptions that satisfy contractual provisions, are consistent with previously reported amounts, and comply with applicable laws of this State. The valuation manual shall prescribe the specifics of this opinion, including any items deemed to be necessary to its scope. Every company with outstanding life insurance contracts, annuity contracts, pure endowment contracts, accident and health insurance contracts, or deposit-type contracts in this State and subject to regulation by the Commissioner, except as exempted in the valuation manual, shall also annually include in the opinion required by this subsection an opinion of the same appointed actuary as to whether the reserves and related actuarial items held in support of the policies and contracts specified in the valuation manual, when considered in light of the assets held by the company with respect to the reserves and related actuarial items, including, but not limited to, the investment earnings on the assets and the considerations anticipated to be received and retained under the policies and contracts, make adequate provision for the company's obligations under the policies and contracts, including, but not limited to, the benefits under and expenses associated with the policies and contracts.

Each opinion required by subsection (j1) of this section shall be governed by the following provisions:

1. A memorandum, in form and substance as specified in the valuation manual and acceptable to the Commissioner, shall be prepared to support each actuarial opinion.

2. If the company fails to provide a supporting memorandum at the request of the Commissioner within a period specified in the valuation manual, or the Commissioner determines that the supporting memorandum provided by the company fails to meet the standards prescribed by the valuation manual or is otherwise unacceptable to the Commissioner, the Commissioner may engage a qualified actuary at the expense of the company to review the opinion and the basis for the opinion and prepare such supporting memorandum as is required by the Commissioner.

3. The opinion shall be in form and substance as specified in the valuation manual and acceptable to the Commissioner.

4. The opinion shall be submitted with the annual statement reflecting the valuation of such reserve liabilities for each year ending on or after the operative date of the valuation manual.

5. The opinion shall apply to all policies and contracts subject to subsection (j1) of this section plus other actuarial liabilities as specified in the valuation manual.

6. The opinion shall be based on standards adopted from time to time by the Actuarial Standards Board or its successor and on such additional standards as may be prescribed in the valuation manual.

7. In the case of an opinion required to be submitted by a foreign or alien company, the Commissioner may accept the opinion filed by that company with the insurance supervisory official of another state if the Commissioner determines that the opinion reasonably meets the requirements applicable to a company domiciled in this State.
(8) Except in cases of fraud or willful misconduct, the appointed actuary shall not be liable for damages to any person (other than the company and the Commissioner) for any act, error, omission, decision, or conduct with respect to the appointed actuary's opinion.

(9) Disciplinary action by the Commissioner against the company or the appointed actuary shall be defined in rules by the Commissioner.

(k) The Commissioner shall adopt rules containing the minimum standards applicable to the valuation of accident and health insurance contracts issued prior to the operative date of the valuation manual. The Commissioner may also adopt rules for the purpose of recognizing new annuity mortality tables for use in determining reserve liabilities for annuities and may adopt rules that govern minimum valuation standards for reserves of life insurance companies. In adopting these rules, the Commissioner may consider model laws and regulations promulgated and amended from time to time by the NAIC.

(l) The Commissioner may adopt rules for life insurers for the following matters:
   (1) Reserves for contracts issued by insurers.
   (2) Optional smoker-nonsmoker mortality tables permitted for use in determining minimum reserve liabilities and nonforfeiture benefits.
   (3) Optional blended gender mortality tables permitted for use in determining nonforfeiture benefits for individual life policies.
   (4) Optional tables acceptable for use in determining reserves and minimum cash surrender values and amounts of paid-up nonforfeiture benefits.
   (5) Assumptions for policyholder withdrawal rates for use in determining minimum reserve liabilities.

In adopting these rules, the Commissioner may consider model laws and regulations promulgated and amended from time to time by the NAIC.

(m) The valuation manual shall apply as described in this subsection.
   (1) For policies issued on or after the operative date of the valuation manual, the standard prescribed in the valuation manual is the minimum standard of valuation required under subsections (b2) and (b3) of this section, except as provided under subdivision (5) or (7) of this subsection.
   (2) The operative date of the valuation manual is specified in G.S. 58-58.51(b).
   (3) Unless a change in the valuation manual specifies a later effective date, changes to the valuation manual shall be effective on January 1 of the year following the date when the change to the valuation manual has been adopted by the NAIC by an affirmative vote representing each of the following:
      a. At least three-fourths of the members of the NAIC voting but not less than a majority of the total membership.
      b. Members of the NAIC representing jurisdictions totaling more than seventy-five percent (75%) of the direct premiums written as reported in the following annual statements most recently available prior to the vote described in this subdivision: life, accident and health annual statements; health annual statements; and fraternal annual statements.
   (4) The valuation manual must specify all of the following:
      a. Minimum valuation standards for and definitions of the policies or contracts subject to subsections (b2) and (b3) of this section. Such minimum valuation standards shall be as follows:
         1. The Commissioner's reserve valuation method for life insurance contracts subject to subsections (b2) and (b3) of this section.
2. The Commissioner's annuity reserve valuation method for annuity contracts subject to subsections (b2) and (b3) of this section.

3. Minimum reserves for all other policies or contracts subject to subsections (b2) and (b3) of this section.

b. The policies or contracts or types of policies or contracts that are subject to the requirements of a principle-based valuation as described in subsection (n) of this section and the minimum valuation standards consistent with those requirements.

c. For policies and contracts subject to a principle-based valuation under subsection (n) of this section, each of the following:
   1. Requirements for the format of reports to the Commissioner under sub-subdivision (2)c. of subsection (n) of this section. Such reports shall include information necessary to determine if the valuation is appropriate and in compliance with this section.
   2. Assumptions shall be prescribed for risks over which the company does not have significant control or influence.
   3. Procedures for corporate governance and oversight of the actuarial function and a process for appropriate waiver or modification of such procedures.

d. For policies not subject to a principle-based valuation under subsection (n) of this section, the minimum valuation standard shall either:
   1. Be consistent with the minimum standard of valuation prior to the operative date of the valuation manual; or
   2. Develop reserves that quantify the benefits and guarantees, and the funding, associated with the contracts and their risks at a level of conservatism that reflects conditions that include unfavorable events that have a reasonable probability of occurring.

e. Other requirements, including, but not limited to, those relating to reserve methods, models for measuring risk, generation of economic scenarios, assumptions, margins, use of company experience, risk measurement, disclosure, certifications, reports, actuarial opinions and memorandums, transition rules, and internal controls.

f. The data and form of the data required under subsection (o) of this section, to whom the data must be submitted, and may specify other requirements, including data analyses and reporting of analyses.

(5) In the absence of a specific valuation requirement, or if a specific valuation requirement in the valuation manual is not, in the opinion of the Commissioner, in compliance with this section, then the company shall, with respect to such requirements, comply with minimum valuation standards prescribed by the Commissioner by rule.

(6) The Commissioner may engage a qualified actuary, at the expense of the company, to perform an actuarial examination of the company and opine on the appropriateness of any reserve assumption or method used by the company, or to review and opine on a company's compliance with any requirement set forth in this section. The Commissioner may rely upon the opinion, regarding provisions contained in this section, of a qualified actuary engaged by the insurance regulator of another state, district, or territory of the United States. As used in this subdivision, the term "engage" includes employment and contracting.
(7) The Commissioner may require a company to change any assumption or method that, in the opinion of the Commissioner, is necessary in order to comply with the requirements of the valuation manual or this section; and the company shall adjust the reserves as required by the Commissioner. The Commissioner may take other disciplinary action as specified in rules adopted by the Commissioner.

(n) The requirements of this subsection shall apply to any principle-based valuation of policies issued on or after the operative date of the valuation manual.

(1) A company using a principle-based valuation for one or more policies or contracts subject to this subsection as specified in the valuation manual must establish, for those policies and contracts, reserves that meet all of the following:

a. Quantify the benefits and guarantees, and the funding, associated with the contracts and their risks at a level of conservatism that reflects conditions that include unfavorable events that have a reasonable probability of occurring during the lifetime of the contracts. For policies or contracts with significant tail risk, the reserves shall reflect conditions appropriately adverse to quantify the tail risk.

b. Incorporate assumptions, risk analysis methods, financial models, and management techniques that are consistent with, but not necessarily identical to, those utilized within the company's overall risk assessment process, while recognizing potential differences in financial reporting structures and any prescribed assumptions or methods.

c. Incorporate assumptions that are derived in one of the following manners:
   1. The assumption is prescribed in the valuation manual.
   2. For assumptions that are not prescribed, the assumptions shall (i) be established utilizing the company's available experience, to the extent it is relevant and statistically credible; or (ii) to the extent that company data is not available, relevant, or statistically credible, be established utilizing other relevant, statistically credible experience.

d. Provide margins for uncertainty, including adverse deviation and estimation error, such that the greater the uncertainty, the larger the margin and resulting reserve.

(2) A company using a principle-based valuation for one or more policies or contracts subject to this subsection as specified in the valuation manual shall do the following:

a. Establish procedures for corporate governance and oversight of the actuarial valuation function consistent with those described in the valuation manual.

b. Provide to the Commissioner and the board of directors an annual certification of the effectiveness of the internal controls with respect to the principle-based valuation. Such controls shall be designed to assure that all material risks inherent in the liabilities and associated assets subject to such valuation are included in the valuation and that valuations are made in accordance with the valuation manual. The certification shall be based on the controls in place as of the end of the preceding calendar year.
c. Develop, and file with the Commissioner upon request, a principle-based valuation report that complies with standards prescribed in the valuation manual.

(o) A company shall submit mortality, morbidity, policyholder behavior, or expense experience and other data as prescribed in the valuation manual.

(p) The confidentiality of documents, materials, and other information provided to the Commissioner under this section shall be maintained as described in this subsection.

(1) For purposes of this subsection, “confidential information” shall include all of the following:

   a. A memorandum in support of an opinion submitted under subsection (i) or (i1) of this section and any other documents, materials, and other information, including, but not limited to, all working papers, and copies thereof, created, produced, or obtained by or disclosed to the Commissioner or any other person in connection with such memorandum.

   b. All documents, materials, and other information, including, but not limited to, all working papers, and copies thereof, created, produced, or obtained by or disclosed to the Commissioner or any other person in the course of an examination made under subdivision (6) of subsection (m) of this section; provided, however, that if an examination report or other material prepared in connection with an examination made under the Examination Law (G.S. 58-2-131 through G.S. 58-2-134) is not held as private and confidential information under the Examination Law, an examination report or other material prepared in connection with an examination made under subdivision (6) of subsection (m) of this section shall not be “confidential information” to the same extent as if such examination report or other material had been prepared under the Examination Law.

   c. Any reports, documents, materials, and other information developed by a company in support of, or in connection with, an annual certification by the company under subdivision (2)b. of subsection (n) of this section evaluating the effectiveness of the company's internal controls with respect to a principle-based valuation and any other documents, materials, and other information, including, but not limited to, all working papers, and copies thereof, created, produced, or obtained by or disclosed to the Commissioner or any other person in connection with such reports, documents, materials, and other information.

   d. Any principle-based valuation report developed under sub-subdivision (2)c. of subsection (n) of this section and any other documents, materials, and other information, including, but not limited to, all working papers, and copies thereof, created, produced, or obtained by or disclosed to the Commissioner or any other person in connection with such report.

   e. Any documents, materials, data, and other information submitted by a company under subsection (o) of this section (collectively, "experience data") and any other documents, materials, data, and other information, including, but not limited to, all working papers, and copies thereof, created or produced in connection with such experience data, in each case that includes any potentially company-identifying or personally identifiable information, that is provided to or obtained by the Commissioner (together with any
"experience data," the "experience materials") and any other documents, materials, data, and other information, including but not limited to, all working papers, and copies thereof, created, produced, or obtained by or disclosed to the Commissioner or any other person in connection with such experience materials.

(2) Except as provided in this subsection, a company’s confidential information is confidential by law and privileged, shall not be subject to or considered public record under G.S. 58-2-100 or Chapter 132 of the General Statutes, shall not be subject to subpoena, and shall not be subject to discovery or admissible in evidence in any private civil action. However, the Commissioner is authorized to use the confidential information in the furtherance of any regulatory or legal action brought as a part of the Commissioner's official duties.

(3) Neither the Commissioner nor any person who received confidential information while acting under the authority of the Commissioner shall be permitted or required to testify in any private civil action concerning any confidential information.

(4) In order to assist in the performance of the Commissioner's duties, the Commissioner may share confidential information (i) with other state, federal, and international regulatory agencies and with the NAIC and its affiliates and subsidiaries, and (ii) in the case of confidential information specified in sub-subdivisions (1)a. and (1)d. of this subsection only, with the Actuarial Board for Counseling and Discipline or its successor upon request stating that the confidential information is required for the purpose of professional disciplinary proceedings and with state, federal, and international law enforcement officials; in the case of (i) and (ii), provided that such recipient agrees, and has the legal authority to agree, to maintain the confidentiality and privileged status of such documents, materials, data, and other information in the same manner and to the same extent as required for the Commissioner.

(5) The Commissioner may receive documents, materials, data, and other information, including otherwise confidential and privileged documents, materials, data, or information, from the NAIC and its affiliates and subsidiaries, from regulatory or law enforcement officials of other foreign or domestic jurisdictions and from the Actuarial Board for Counseling and Discipline or its successor and shall maintain as confidential or privileged any document, material, data, or other information received with notice or the understanding that it is confidential or privileged under the laws of the jurisdiction that is the source of the document, material, or other information.

(6) The Commissioner may enter into agreements governing the sharing and use of information consistent with this subsection.

(7) No waiver of any applicable privilege or claim of confidentiality in the confidential information shall occur as a result of disclosure to the Commissioner under this subsection or as a result of sharing as authorized in subdivision (4) of this subsection.

(8) A privilege established under the law of any state or jurisdiction that is substantially similar to the privilege established under this subsection shall be available and enforced in any proceeding in, and in any court of, this State.

(9) In this subsection, "regulatory agency," "law enforcement agency," and the "NAIC" include, but are not limited to, their employees, agents, consultants, and contractors.

SECTION 2. G.S. 58-58-55 reads as rewritten:

... (e) (1) This subdivision (1) of subsection (e) shall not apply to policies issued on or after the operative date of subdivision (4) of subsection (e) as defined therein. Except as provided in the third paragraph of this subdivision, the adjusted premiums for any policy shall be calculated on an annual basis and shall be such uniform percentage of the respective premiums specified in the policy for each policy year, excluding any extra premiums charged because of impairments or special hazards, that the present value, at the date of issue of the policy, of all such adjusted premiums shall be equal to the sum of (i) the then present value of the future guaranteed benefits provided for by the policy; (ii) two percent (2%) of the amount of insurance, if the insurance be uniform in amount, or of the equivalent uniform amount, as hereinafter defined, if the amount of insurance varies with duration of the policy; (iii) forty percent (40%) of the adjusted premium for the first policy year; (iv) twenty-five percent (25%) of either the adjusted premium for the first policy year or the adjusted premium for a whole life policy of the same uniform or equivalent uniform amount with uniform premiums for the whole of life issued at the same age for the same amount of insurance, whichever is less. Provided, however, that in applying the percentages specified in (iii) and (iv) above, no adjusted premium shall be deemed to exceed four percent (4%) of the amount of insurance or uniform amount equivalent thereto. The date of
issue of a policy for the purpose of this subsection shall be the date as of which the rated age of the insured is determined.

In the case of a policy providing an amount of insurance varying with duration of the policy, the equivalent uniform amount thereof for the purpose of this section shall be deemed to be the uniform amount of insurance provided by an otherwise similar policy containing the same endowment benefit or benefits, if any, issued at the same age and for the same term, the amount of which does not vary with duration and the benefits under which have the same present value at the date of issue as the benefits under the policy, provided, however, that in the case of a policy providing a varying amount of insurance issued on the life of a child under age 10, the equivalent uniform amount may be computed as though the amount of insurance provided by the policy prior to the attainment of age 10 were the amount provided by such policy at age 10.

The adjusted premiums for any policy providing term insurance benefits by rider or supplemental policy provision shall be equal to (i) the adjusted premiums for an otherwise similar policy issued at the same age without such term insurance benefits, increased, during the period for which premiums for such term insurance benefits are payable, by (ii) the adjusted premiums for such term insurance, the foregoing items (i) and (ii) being calculated separately and as specified in the first two paragraphs of this subsection except that, for the purposes of (ii), (iii) and (iv) of the first such paragraph, the amount of insurance or equivalent uniform amount of insurance used in the calculation of the adjusted premiums referred to in (ii) of this paragraph shall be equal to the excess of the corresponding amount determined for the entire policy over the amount used in the calculation of the adjusted premiums in (i).

Except as otherwise provided in subdivisions (2) and (3) of this subsection, all adjusted premiums and present values referred to in this section shall for all policies of ordinary insurance be calculated on the basis of the Commissioner's 1941 Standard Ordinary Mortality Table, provided that for any category of ordinary insurance issued on female risks, adjusted premiums and present values may be calculated according to an age not more than three years younger than the actual age of the insured, and such calculations for all policies of industrial insurance shall be made on the basis of the 1941 Standard Industrial Mortality Table. All calculations shall be made on the basis of the rate of interest, not exceeding three and one-half percent (3 1/2%) per annum, specified in the policy for calculating cash surrender values and paid-up nonforfeiture benefits. Provided, however, that in calculating the present value of any paid-up term insurance with accompanying pure endowment, if any, offered as a nonforfeiture benefit, the rates of mortality assumed may not be more than one hundred and thirty percent (130%) of the rates of mortality according to such applicable table.

Provided, further, that for insurance issued on a substandard basis, the calculation of any such adjusted premiums and present values may be based on such other table of mortality as may be specified by the company and approved by the Commissioner.

(4) a. This subdivision shall apply to all policies issued on or after the operative date of this subdivision (4) of subsection (e) as defined herein. Except as provided in paragraph g of this subdivision, the adjusted premiums for any policy shall be calculated on an annual basis and shall be such uniform percentage of the respective
premiums specified in the policy for each policy year, excluding amounts payable as extra premiums to cover impairments or special hazards and also excluding any uniform annual contract charge or policy fee specified in the policy in a statement of the method to be used in calculating the cash surrender values and paid-up nonforfeiture benefits, that the present value, at the date of issue of the policy, of all adjusted premiums shall be equal to the sum of (i) the then present value of the future guaranteed benefits provided for by the policy; (ii) one percent (1%) of either the amount of insurance, if the insurance be uniform in amount, or the average amount of insurance at the beginning of each of the first 10 policy years; and (iii) one hundred twenty-five percent (125%) of the nonforfeiture net level premium as hereinafter defined. Provided, however, that in applying the percentage specified in (iii) above no nonforfeiture net level premium shall be deemed to exceed four percent (4%) of either the amount of insurance, if the insurance be uniform in amount, or the average amount of insurance at the beginning of each of the first 10 policy years. The date of issue of a policy for the purpose of this subdivision shall be the date as of which the rated age of the insured is determined.

h. All adjusted premiums and present values referred to in this section shall for all policies of ordinary insurance be calculated on the basis of (i) the Commissioner's 1980 Standard Ordinary Mortality Table or (ii) at the election of the company for any one or more specified plans of life insurance, the Commissioner's 1980 Standard Ordinary Mortality Table with Ten-Year Select Mortality Factors; shall for all policies of industrial insurance be calculated on the basis of the Commissioner's 1961 Standard Industrial Mortality Table; and shall for all policies issued in a particular calendar year be calculated on the basis of a rate of interest not exceeding the nonforfeiture interest rate as defined in this subdivision for policies issued in that calendar year. Provided, however, that:

6. Any policies issued prior to the operative date of the valuation manual, which is defined in G.S. 58-58-51, any Commissioners Standard ordinary mortality tables, adopted after 1980 by the NAIC, that are approved by regulation promulgated by the Commissioner for use in determining the minimum nonforfeiture standard may be substituted for the Commissioner's 1980 Standard Ordinary Mortality Table with or without Ten-Year Select Mortality Factors or for the Commissioner's 1980 Extended Term Insurance Table. For policies issued on or after the operative date of the valuation manual, the valuation manual shall provide the Commissioners Standard mortality table for use in determining the minimum nonforfeiture standard that may be substituted for the Commissioners 1980 Standard Ordinary Mortality Table with or without Ten-Year Select Mortality Factors or for the Commissioners 1980 Extended Term Insurance Table. If the Commissioner approves by regulation any Commissioners Standard ordinary mortality table adopted by the NAIC for use in determining the minimum

7. For policies issued on or after the operative date of the valuation manual, the valuation manual shall provide the Commissioners Standard mortality table for use in determining the minimum nonforfeiture standard that may be substituted for the Commissioners 1961 Industrial Extended Term Insurance Table. If the Commissioner approves by regulation any Commissioners Standard industrial mortality table adopted by the NAIC for use in determining the minimum nonforfeiture standard for policies issued on or after the operative date of the valuation manual, then that minimum nonforfeiture standard supersedes the minimum nonforfeiture standard provided by the valuation manual.

i. The For policies issued prior to the operative date of the valuation manual, the nonforfeiture interest rate per annum for any policy issued in a particular calendar year shall be equal to one hundred and twenty-five percent (125%) of the calendar year statutory valuation interest rate for such policy as defined in the Standard Valuation Law, rounded to the nearer one quarter of one percent (1/4 of 1%), but not less than four percent (4%). "Part 7D. Environmental Audit Privilege and Limited Immunity.

§ 8-58.50. Purpose.
(a) In order to encourage owners and operators of facilities and persons conducting activities regulated under those portions of the General Statutes set forth in G.S. 8-58.52, or conducting activities regulated under other environmental laws, to conduct voluntary internal environmental audits of their compliance programs and management systems and to assess and improve compliance with statutes, an environmental audit privilege is recognized to protect the confidentiality of communications relating to voluntary internal environmental audits.

(b) Nothing in this Part shall be construed to protect owners and operators of facilities and regulated persons from a criminal investigation or prosecution carried out by any appropriate governmental entity.

(c) Any privilege granted by this Part shall apply only to those communications, oral or written, pertaining to and made in connection with the environmental audit and shall not apply to the facts relating to the violation itself.

The following definitions apply in this Part:

(1) "Department" means the Department of Environment and Natural Resources.

(2) "Enforcement agencies" means the Department, any other agency of the State, and units of local government responsible for enforcement of environmental laws.

(3) "Environmental audit" means a voluntary, internal evaluation or review of one or more facilities or an activity at one or more facilities regulated under federal, State, regional, or local environmental law, or of compliance programs or management systems related to the facility or activity if designed to identify and prevent noncompliance and to improve compliance with these laws. An environmental audit may be conducted by the owner or operator, the parent corporation of the owner or operator or by their officers or employees, or by independent contractors. An environmental audit must be a discrete activity with a specified beginning date and scheduled ending date reflecting the auditor's bona fide intended completion schedule.

(4) "Environmental audit report" means a document marked or identified as such with a completion date existing either individually or as a compilation prepared in connection with an environmental audit. An environmental audit report may include field notes and records of observations, findings, opinions, suggestions, recommendations, conclusions, drafts, memoranda, drawings, photographs, computer-generated or electronically recorded information, maps, charts, graphs, and surveys, provided the supporting information is collected or developed for the primary purpose and in the course of an environmental audit. Provided, however, all of the following documents are exempt from the privilege established by this Part:

(1) Information obtained by observation of an enforcement agency.
(2) Information obtained from a source independent of the environmental audit.
(3) Documents, communication, data, reports, or other information required to be collected, maintained, otherwise made available, or reported to an enforcement agency or any other entity by environmental laws, permits, orders, consent agreements, or as otherwise provided by law.

(6) Information that is knowingly misrepresented or misstated or that is knowingly deleted or withheld from an environmental audit report, whether or not included in a subsequent environmental audit report.
(7) Information in instances where the material shows evidence of noncompliance with environmental laws, permits, orders, consent agreements, and the owner or operator failed to either promptly take corrective action or eliminate any violation of law identified during the environmental audit within a reasonable period of time.

(b) If an environmental audit report or any part of an environmental audit report is subject to the privilege provided for in subsection (a) of this section, no person who conducted or participated in the audit or who significantly reviewed the audit report may be compelled to
testify regarding the audit report or a privileged part of the audit report except as provided for in G.S. 8-58.53(d), 8-58.54, or 8-58.56.

(c) Nothing in this Part shall be construed to restrict a party in a proceeding before the Industrial Commission from obtaining or discovering any evidence necessary or appropriate for the proof of any issue pending in an action before the Commission, regardless of whether evidence is privileged pursuant to this Part. Further, nothing in this Part shall be construed to prevent the admissibility of evidence that is otherwise relevant and admissible in a proceeding before the Industrial Commission, regardless of whether the evidence is privileged pursuant to this Part. Provided, however, the Commission, upon motion made by a party to the proceeding, may issue appropriate protective orders preventing disclosure of information outside of the Commission's proceeding.

(d) Nothing in this Part shall be construed to circumvent the employee protection provisions provided by federal or State law.

(e) The privilege created by this Part does not apply to criminal investigations or proceedings. Where an audit report is obtained, reviewed, or used in a criminal proceeding, the privilege created by this Part shall continue to apply and is not waived in civil and administrative proceedings and is not discoverable or admissible in civil or administrative proceedings even if disclosed during a criminal proceeding.

§ 8-58.54. Waiver of privilege.

(a) The privilege established under G.S. 8-58.53 does not apply to the extent that it is expressly waived in writing by the owner or operator of a facility at which an environmental audit was conducted and who prepared or caused to be prepared the audit report as a result of the audit.

(b) The audit report and information generated by the audit may be disclosed without waiving the privilege established under G.S. 8-58.53 to all of the following persons:

(1) A person employed by the owner or operator or the parent corporation of the audited facility.

(2) A legal representative of the owner or operator or parent corporation.

(3) An independent contractor retained by the owner or operator or parent corporation to conduct an audit on or to address an issue or issues raised by the audit.

(c) Disclosure of an audit report or information generated by the audit under all of the following circumstances shall not constitute a waiver of the privilege established under G.S. 8-58.53:

(1) Disclosure made under the terms of a confidentiality agreement between the owner or operator of the facility audited and a potential purchaser of the business or facility audited.

(2) Disclosure made under the terms of a confidentiality agreement between governmental officials and the owner or operator of the facility audited.

(3) Disclosure made under the terms of a confidentiality agreement between a customer, lending institution, or insurance company with an existing or proposed relationship with the facility.

§ 8-58.55. Notification of audit.

In order to assert the privilege established under G.S. 8-58.53, the owner or operator of the facility conducting the environmental audit shall, upon inspection of the facility by an enforcement agency, or no later than 10 working days after completion of an agency's inspection, notify the enforcement agency of the existence of any audit relevant to the subject of the agency's inspection, as well as the beginning date and completion date of that audit. Any environmental audit report shall include a signed certification from the owner or operator of the facility that documents the date the audit began and the completion date of the audit.

§ 8-58.56. Revocation of privilege in civil and administrative proceedings.

In a civil or administrative proceeding, an enforcement agency may seek by motion a declaratory ruling on the issue of whether an environmental audit report is privileged. The court
shall revoke the privilege established under G.S. 8-58.53 for an audit report if the factors set forth in this section apply. In a civil proceeding, the court, after an in camera review, shall revoke the privilege established under G.S. 8-58.53 if the court determines that disclosure of the environmental audit report was sought after the effective date of this Part and either of the following apply:

(1) The privilege is asserted for purposes of deception or evasion.

(2) The material shows evidence of significant noncompliance with applicable environmental laws; the owner or operator of the facility has not promptly initiated and pursued with diligence appropriate action to achieve compliance with these environmental laws or has not made reasonable efforts to complete any necessary permit application; and, as a result, the owner or operator of the facility did not or will not achieve compliance with applicable environmental laws or did not or will not complete the necessary permit application within a reasonable period of time.

"§ 8-58.57. Privilege in criminal proceedings.

The privilege established under G.S. 8-58.53 is not applicable in any criminal proceeding.

"§ 8-58.58. Burden of proof.

A party asserting the privilege established under G.S. 8-58.53 has the burden of proving that (i) the materials claimed as privileged constitute an environmental audit report as defined by this Part, and (ii) compliance has been achieved or will be achieved within a reasonable period of time. A party seeking disclosure under G.S. 8-58.56 has the burden of proving the condition for disclosure set forth in that section.

"§ 8-58.59. Stipulations; declaratory rulings.

The parties to a proceeding may at any time stipulate to entry of an order directing that specific information contained in an environmental audit report is or is not subject to the privilege. In the absence of an ongoing proceeding, where the parties are not in agreement, an enforcement agency may seek a declaratory ruling from a court on the issue of whether the materials are privileged under G.S. 8-58.53 and whether the privilege, if existing, should be revoked pursuant to G.S. 8-58.56.

"§ 8-58.60. Construction of Part.

Nothing in this Part limits, waives, or abrogates any of the following:

(1) The scope or nature of any statutory or common law privilege, including the work-product privilege or the attorney-client privilege.

(2) Any existing ability or authority under State law to challenge privilege.

(3) An enforcement agency's ability to obtain or use documents or information that the agency otherwise has the authority to obtain under State law adopted pursuant to federally delegated programs.

"§ 8-58.61. Voluntary disclosure; limited immunity from civil and administrative penalties and fines.

(a) An owner or operator of a facility is immune from imposition of civil and administrative penalties and fines for a violation of environmental laws voluntarily disclosed subject to the requirements and criteria set forth in this section. Provided, however, that waiver of penalties and fines shall not be granted until the applicable enforcement agency has certified that the violation was corrected within a reasonable period of time. If compliance is not certified by the enforcement agency, the enforcement agency shall retain discretion to assess penalties and fines for the violation.

(b) If a person or entity makes a voluntary disclosure of a violation of environmental laws discovered through performance of an environmental audit, that person has the burden of proving (i) that the disclosure is voluntary by establishing the elements set forth in subsection (c) of this section and (ii) that the person is therefore entitled to immunity from any administrative or civil penalties associated with the issues disclosed. Nothing in this section may be construed to provide immunity from criminal penalties.
(c) For purposes of this section, disclosure is voluntary if all of the following criteria are met:

(1) The disclosure is made within 14 days following a reasonable investigation of the violation's discovery through the environmental audit.

(2) The disclosure is made to an enforcement agency having regulatory authority over the violation disclosed.

(3) The person or entity making the disclosure initiates an action to resolve the violation identified in the disclosure in a diligent manner.

(4) The person or entity making the disclosure cooperates with the applicable enforcement agency in connection with investigation of the issues identified in the disclosure.

(5) The person or entity making the disclosure diligently pursues compliance and promptly corrects the noncompliance within a reasonable period of time.

(d) A disclosure is not voluntary for purposes of this section if any of the following factors apply:

(1) Specific permit conditions require monitoring or sampling records and reports or assessment plans and management plans to be maintained or submitted to the enforcement agency pursuant to an established schedule.

(2) Environmental laws or specific permit conditions require notification of releases to the environment.

(3) The violation was committed intentionally, willfully, or through criminal negligence by the person or entity making the disclosure.

(4) The violation was not corrected in a diligent manner.

(5) The violation posed or poses a significant threat to public health, safety, and welfare; the environment; and natural resources.

(6) The violation occurred within one year of a similar prior violation at the same facility, and immunity from civil and administrative penalties was granted by the applicable enforcement agency for the prior violation.

(7) The violation has resulted in a substantial economic benefit to the owner or operator of the facility.

(8) The violation is a violation of the specific terms of a judicial or administrative order.

(e) If a person meets the burden of proving that the disclosure is voluntary, the burden shifts to the enforcement agency to prove that the disclosure was not voluntary, based upon the factors set forth in this section. The person claiming immunity from civil or administrative penalties or fines under this section retains the ultimate burden of proving the violations were voluntarily disclosed.

(f) A voluntary disclosure made pursuant to this section is subject to disclosure pursuant to the Public Records Act in accordance with the provisions of Chapter 132 of the General Statutes.

§ 8-58.62 Additional limitations on exercise of privilege or immunity.

An owner or operator of a facility who makes a voluntary disclosure of a violation of environmental laws discovered through performance of an environmental audit shall only be entitled to exercise of the privilege or immunity established by this Part once in a two-year period, not more than twice in a five-year period, and not more than three times in a 10-year period.

§ 8-58.63 Preemption of local laws.

No local law, rule, ordinance, or permit condition may circumvent or limit the privilege established by this Part or the exercise of the privileges or the presumption and immunity established by this Part.”

SECTION 4.1.(b) No later than 30 days after this bill becomes law, the Department of Environment and Natural Resources shall submit Part 7D of Chapter 8 of the General Statutes, Environmental Audit Privilege and Limited Immunity, as enacted by this
section, to the United States Environmental Protection Agency and shall request the Agency's approval to implement the Part in concert with the State's legal authority to continue administering delegated, approved, or authorized federal environmental programs within the State.

SECTION 4.1.(c) No later than December 1, 2015, the Department shall report to the Environmental Review Commission on its activities conducted pursuant to subsection (b) of this section and shall report monthly thereafter until approval to implement Part 7D of Chapter 8 of the General Statutes, Environmental Audit Privilege and Limited Immunity, as enacted by this section, is received from the United States Environmental Protection Agency.

SECTION 4.1.(d) This section becomes effective upon the date approval to implement Part 7D of Chapter 8 of the General Statutes, Environmental Audit Privilege and Limited Immunity, as enacted by this section, is received from the United States Environmental Protection Agency.

STUDY COMPUTER EQUIPMENT, TELEVISION, AND ELECTRONICS RECYCLING PROGRAM

SECTION 4.2. The Department of Environment and Natural Resources shall, in consultation with the North Carolina League of Municipalities, the North Carolina Association of County Commissioners, the Consumer Electronics Association, the Retail Merchants Association, and representatives of the recycling and waste management industries, study North Carolina's recycling requirements for discarded computer equipment and televisions. In conducting this study, the Department shall consider (i) the changing waste stream, including the transition from televisions containing cathode ray tubes to flat screen televisions; (ii) the current status of North Carolina's recycling system, including cost and financing issues, and options that may be available to reduce costs and establish sufficient funding to cover necessary costs; (iii) opportunities for more efficient and effective recycling systems; and (iv) any other issue the Department deems relevant. The Department shall report its findings, including specific recommendations for legislative action, to the Environmental Review Commission on or before April 1, 2016.

(1) Issue rules limiting emissions from wood heaters to implement the federal regulations described in this subsection.

(2) Enforce against a manufacturer, distributor, or consumer the federal regulations described in this subsection."

SECTION 4.3.(b) G.S. 143-213 is amended by adding a new subdivision to read:

"(31) "Wood heater" means a fireplace, wood stove, pellet stove, wood-fired hydronic heater, wood-burning forced-air furnace, or masonry wood heater or other similar appliance designed for heating a residence or business or for
heating water for use by a residence through the combustion of wood or products substantially composed of wood.”

"§ 130A-310.66. Purpose."
It is the purpose of this Part to authorize the Department to approve the remediation of contaminated industrial sites based on site-specific remediation standards in circumstances where site-specific remediation standards are adequate to protect public health, safety, and welfare and the environment and are consistent with protection of current and anticipated future use of groundwater and surface water affected or potentially affected by the contamination.

"§ 130A-310.67. Applicability."
(a) This Part applies to contaminated industrial sites subject to remediation pursuant to any of the following programs or requirements:

(1) The Inactive Hazardous Sites Response Act of 1987 under Part 3 of Article 9 of Chapter 130A of the General Statutes, including voluntary actions under G.S. 130A-310.9 of that act, and rules promulgated pursuant to those statutes.

Animal waste management systems permitted under Part 1 or Part 1A of Article 21 of Chapter 143 of the General Statutes.

This Part shall apply only to sites where a discharge, spill, or release of contamination has been reported to the Department prior to March 1, 2011.

§ 130A-310.68. Remediation standards.

(b) Site-specific remediation standards shall be developed for each medium as provided in this subsection to achieve remediation that eliminates or reduces to protective levels any substantial present or probable future risk to human health, including sensitive subgroups, and the environment based upon the present or currently planned future use of the property comprising the site. Site-specific remediation standards shall be developed in accordance with all of the following:

(1) Remediation methods and technologies that result in emissions of air pollutants shall comply with applicable air quality standards adopted by the Commission.

(2) The site-specific remediation standard for surface waters shall be the water quality standards adopted by the Commission.

(3) The current and probable future use of groundwater shall be identified and protected. Site-specific sources of contaminants and potential receptors shall be identified. Potential receptors must be protected, controlled, or eliminated whether the receptors are located on or off the site where the source of contamination is located. Natural environmental conditions affecting the fate and transport of contaminants, such as natural attenuation, shall be determined by appropriate scientific methods.

(4) Permits for facilities located at sites covered by any of the programs or requirements set out in G.S. 130A-310.67(a) shall contain conditions to avoid exceedances of applicable groundwater standards adopted by the Commission pursuant to Article 21 of Chapter 143 of the General Statutes due to operation of the facility.

(5) Soil shall be remediated to levels that no longer constitute a continuing source of groundwater contamination in excess of the site-specific groundwater remediation standards approved under this Part.

(6) Soil shall be remediated to unrestricted use standards on residential property with the following exceptions:
   a. For mixed-use developments where the ground level uses are nonresidential and where all potential exposure to contaminated soil has been eliminated, the Department may allow soil to remain on the site in excess of unrestricted use standards.
   b. If soil remediation is impracticable because of the presence of preexisting structures or impracticability of removal, all areas of the real property at which a person may come into contact with soil shall be remediated to unrestricted use standards, and, on all other areas of the real property, engineering and institutional controls that are sufficient to protect public health, safety, and welfare and the environment shall be implemented and maintained.

(7) The potential for human inhalation of contaminants from the outdoor air and other site-specific indoor air exposure pathways shall be considered, if applicable.

(8) The site-specific remediation standard shall protect against human exposure to contamination through the consumption of contaminated fish or wildlife.
and through the ingestion of contaminants in surface water or groundwater supplies.

(9) For known or suspected carcinogens, site-specific remediation standards shall be established at exposures that represent an excess lifetime cancer risk of one in 1,000,000. The site-specific remediation standard may depart from the one-in-1,000,000 risk level based on the criteria set out in 40 Code of Federal Regulations § 300.430(c)(9)(July 1, 2003 Edition). The cumulative excess lifetime cancer risk to an exposed individual shall not be greater than one in 10,000 based on the sum of carcinogenic risk posed by each contaminant present.

(10) For systemic toxicants, site-specific remediation standards shall represent levels to which the human population, including sensitive subgroups, may be exposed without any adverse health effect during a lifetime or part of a lifetime. Site-specific remediation standards for systemic toxicants shall incorporate an adequate margin of safety and shall take into account cases where two or more systemic toxicants affect the same organ or organ system.

(11) The site-specific remediation standards for each medium shall be adequate to avoid foreseeable adverse effects to other media or the environment that are inconsistent with the risk-based approach under this Part.

§ 130A-310.71. Review and approval of proposed remedial action plans.

(a) The Department shall review and approve a proposed remedial action plan consistent with the remediation standards set out in G.S. 130A-310.68 and the procedures set out in this section. In its review of a proposed remedial action plan, the Department shall do all of the following:

(1) Determine whether site-specific remediation standards are appropriate for a particular contaminated site. In making this determination, the Department shall consider proximity of the contamination to water supply wells or other receptors; current and probable future reliance on the groundwater as a water supply; current and anticipated future land use; environmental impacts; and the feasibility of remediation to unrestricted use standards.

(2) Determine whether the party conducting the remediation has adequately demonstrated through modeling or other scientific means acceptable to the Department that no contamination will migrate to adjacent off-site property at levels above unrestricted use standards, except as may remain pursuant to a cleanup conducted pursuant to G.S. 130A-310.73A(a)(2).

(3) Determine whether the proposed remedial action plan meets the requirements of G.S. 130A-310.69.

(4) Determine whether the proposed remedial action plan meets the requirements of any other applicable remediation program except those pertaining to remediation standards.

(5) Establish the acceptable level or range of levels of risk to public health, safety, and welfare and to the environment.

(6) Establish, for each contaminant, the maximum allowable quantity, concentration, range, or other measures of contamination that will remain at the contaminated site at the conclusion of the contaminant-reduction phase of the remediation.

(7) Consider the technical performance, effectiveness, and reliability of the proposed remedial action plan in attaining and maintaining compliance with applicable remediation standards.
Consider the ability of the person who proposes to remediate the site to implement the proposed remedial action plan within a reasonable time and without jeopardizing public health, safety, or welfare or the environment.

Determine whether the proposed remedial action plan adequately provides for the imposition and maintenance of engineering and institutional controls and for sampling, monitoring, and reporting requirements necessary to protect public health, safety, and welfare and the environment. In making this determination, the Department may consider, in lieu of land-use restrictions authorized under G.S. 130A-310.69, reliance on other State or local land-use controls. Any land-use controls implemented shall adequately protect public health, safety, and welfare and the environment and provide adequate notice to current and future property owners of any residual contamination and the land-use controls in place.

Approve the circumstances under which no further remediation is required.

The person who proposes a remedial action plan has the burden of demonstrating with reasonable assurance that contamination from the site will not migrate to adjacent off-site property above unrestricted use levels, except as may remain pursuant to a cleanup conducted pursuant to G.S. 130A-310.73A(a)(2), and that the remedial action plan is protective of public health, safety, and welfare and the environment by virtue of its compliance with this Part. The demonstration shall (i) take into account actions proposed in the remedial action plan that will prevent contamination from migrating off the site; and (ii) use scientifically valid site-specific data.

The Department may require a person who proposes a remedial action plan to supply any additional information necessary for the Department to approve or disapprove the plan.

In making a determination on a proposed remedial action plan, the Department shall consider the information provided by the person who proposes the remedial action plan as well as information provided by local governments and adjoining landowners pursuant to G.S. 130A-310.70. The Department shall disapprove a proposed remedial action plan unless the Department finds that the plan is protective of public health, safety, and welfare and the environment and complies with the requirements of this Part. If the Department disapproves a proposed remedial action plan, the person who submitted the plan may seek review as provided in Article 3 of Chapter 150B of the General Statutes. If the Department fails to approve or disapprove a proposed remedial action plan within 120 days after a complete plan has been submitted, the person who submitted the plan may treat the plan as having been disapproved at the end of that time period.

If, pursuant to subdivision (9) of subsection (a) of this section, reliance on other State or local land-use controls is approved by the Department in lieu of land-use restrictions, a "Notice of Residual Contamination" shall be prepared and filed in the chain of title of each contaminated site or contaminated off-site property where any contamination has or will in the future exceed unrestricted use standards. The Notice shall identify the type of contamination on the site or property and the land-use controls that address the contamination and may be filed by the person who proposes to remediate the site. Provided, however, the Department may only approve imposition of land-use controls on contaminated off-site property with the written consent of the owner of the property in conformance with G.S. 130A-310.73A(a)(2).
standard or a background standard through the use of institutional controls alone, that result in an incompatible use of the property relative to surrounding land uses. When the remedial action plan has been fully implemented, the person conducting the remediation shall submit a final report to the Department, with notice to all local governments with taxing and land-use jurisdiction over the site, that demonstrates that the remedial action plan has been fully implemented, that any land-use restrictions have been certified on an annual basis, and that the remediation standards have been attained. The final report shall be accompanied by a request that the Department issue a determination that no further remediation beyond that specified in the approved remedial action plan is required.

(b) The person conducting the remediation has the burden of demonstrating that the remedial action plan has been fully implemented and that the remediation standards have been attained in compliance with the requirements of this Part. The Department may require a person who implements the remedial action plan to supply any additional information necessary for the Department to determine whether the remediation standards have been attained.

(c) The Department shall review the final report, and, upon determining that the person conducting the remediation has completed remediation to the approved remediation standard and met all the requirements of the approved remedial action plan, the Department shall issue a determination that no further remediation beyond that specified in the approved remedial action plan is required at the site. Once the Department has issued a no further action determination, the Department may require additional remedial action by the responsible party only upon finding any of the following:

1. Monitoring, testing, or analysis of the site subsequent to the issuance of the no further action determination indicates that the remediation standards and objectives were not achieved or are not being maintained.
2. One or more of the conditions, restrictions, or limitations imposed on the site as part of the remediation have been violated.
3. Site monitoring or operation and maintenance activities that are required as part of the remedial action plan or no further action determination for the site are not adequately funded or are not adequately implemented.
4. A contaminant or hazardous substance release is discovered at the site that was not the subject of the remedial investigation report or the remedial action plan.
5. A material change in the facts known to the Department at the time the written no further action determination was issued, or new facts, cause the Department to find that further assessment or remediation is necessary to prevent a significant risk to human health and safety or to the environment.
6. The no further action determination was based on fraud, misrepresentation, or intentional nondisclosure of information by the person conducting the remediation, or that person's agents, contractors, or affiliates.
7. Installation or use of wells would induce the flow of contaminated groundwater off the site, as defined in the remedial action plan.

(d) The Department shall issue a final decision on a request for a determination that remediation has been completed to approved standards and that no further remediation beyond that specified in the approved remedial action plan is required within 180 days after receipt of a complete final report. Failure of the Department to issue a final decision on a no further remediation determination within 180 days after receipt of a complete final report and request for a determination of no further remediation may be treated as a denial of the request for a no further remediation determination. The responsible person may seek review of a denial of a request for a release from further remediation as provided in Article 3 of Chapter 150B of the General Statutes.
§ 130A-310.73A. Remediation of sites with off-site migration of contaminants.

(a) Contaminated sites at which contamination has migrated to off-site properties may be remediated pursuant to this Part consistent with the remediation standards set out in G.S. 130A-310.68 if either of the following occur:

(1) The person who proposes to conduct the remediation pursuant to this Part Remediation of sites with off-site migration of contaminants.

(2) The person who proposes to conduct the remediation pursuant to this Part remediates the contaminated off-site property to unrestricted use standards.

(b) In order to inform owners of contaminated off-site property of the issues and liabilities associated with the contamination on their property, the Department, in consultation with the Consumer Protection Division of the North Carolina Department of Justice and the North Carolina Real Estate Commission, shall develop and make available a publication entitled "Contaminated Property: Issues and Liabilities" to provide information on the nature of risk-based remediation and how it differs from remediation to unrestricted use standards, potential health impacts that may arise from residual contamination, as well as identification of liabilities that arise from contaminated property and associated issues, including potential impacts to real estate transactions and real estate financing. The Department shall update the publication as necessary.

(c) If, after issuance of a no further action determination, the Department determines that additional remedial action is required for a contaminated off-site property pursuant to G.S. 130A-310.73(c), the responsible party shall be liable for the additional remediation deemed necessary.

(d) Nothing in this section shall be construed to preclude or impair any person from obtaining any and all other remedies allowed by law.

§ 130A-310.74. Compliance with other laws.

Where a site is covered by an agreement under the Brownfields Property Reuse Act of 1997, as codified as Part 5 of Article 9 of Chapter 130A of the General Statutes, any work performed by the prospective developer pursuant to that agreement is not required to comply with this Part, but any work not covered by such agreement and performed at the site by another person not a party to that agreement may be performed pursuant to this Part.

§ 130A-310.75. Use of registered environmental consultants.

The Department may approve the use of a registered environmental consultant to provide oversight for the assessment and remediation of a site under this Part based on the risk posed by the site and the availability of Department staff for oversight of remediation activities. If remediation under this Part is not undertaken voluntarily, the Department may not require the use of a registered environmental consultant to provide oversight for the assessment and remediation of a site under this Part.

§ 130A-310.76. Fees; permissible uses of fees.

(a) A person who undertakes remediation of environmental contamination under site specific remediation standards as provided in G.S. 130A-310.68 shall pay a fee to the Fund in an amount equal to four thousand five hundred dollars ($4,500) for each acre or portion of an acre of contamination, including any area that will become contaminated as a result of the
release; however, no person shall be required to pay more than one hundred twenty-five thousand dollars ($125,000) to the Fund for any individual site, regardless of its size. This one-time fee shall be payable at the time the person undertaking remediation submits the remedial action plan to the Department. The following fees, payable to the Risk-Based Remediation Fund established under G.S. 130A-310.76A, are applicable to activities under this Part:

(1) Application fee. – A person who proposes to conduct remediation pursuant to this Part shall pay an application fee due at the time a proposed remedial action plan is submitted to the Department for approval. The application fee shall not exceed five thousand dollars ($5,000) for each acre or portion of an acre of contamination, including any area that will become contaminated as a result of the release; however, no person shall be required to pay more than one hundred thousand dollars ($100,000) in fees attributable to this subdivision to the Fund, with the total amount owed calculated by the Department after evaluation of the factors set forth in subsection (a1) of this section and any rules promulgated thereunder:

(a1) The Department shall take all of the following factors into account prior to imposing a fee on a person pursuant to subsection (a) of this section and provide the person written documentation of the Department’s findings with respect to each factor at the time the fee is imposed:

(1) The size of the site subject to a proposed remedial action plan.
(2) Whether groundwater contamination from the site has migrated, or is likely to migrate, to off-site properties.
(3) The complexity of the work to be conducted at a site under a proposed remedial action plan.
(4) The resources that the Department will need to evaluate and oversee the work to be conducted at a site under a proposed remedial action plan and the resources the Department will need to monitor a site after completion of remediation. If such work, or any portion thereof, is to be performed by a registered environmental consultant in accordance with the provisions of G.S. 130A-310.75, the Department shall take this into account accordingly in imposing a reduced fee.

(b) Funds collected pursuant to subsection (a) of this section may be used only for the following purposes:

(1) To pay for administrative and operating expenses necessary to implement this Part, including the full cost of the Department’s activities associated with any human health or ecological risk assessments, groundwater modeling, financial assurance matters, or community outreach.
(2) To establish, administer, and maintain a system for the tracking of land-use restrictions recorded at sites that are remediated pursuant to this Part.

(c) The Department shall report to the Joint Legislative Commission on Governmental Operations, the Environmental Review Commission, and the Fiscal Research Division on or
before October 1 of each year on the amounts and sources of funds collected by year received pursuant to this Part, the amounts and sources of those funds paid into the Risk-Based Remediation Fund established under G.S. 130A-310.76A, the number of acres of contamination for which funds have been received pursuant to subsection (a) of this section, and a detailed annual accounting of how the funds collected pursuant to this Part have been utilized by the Department to advance the purposes of this Part.

(d) The Commission may adopt rules to implement the requirements of subsection (a1) of this section.

"§ 130A-310.76A. Risk-Based Remediation Fund.
There is established under the control and direction of the Department the Risk-Based Remediation Fund. This fund shall be a revolving fund consisting of fees collected pursuant to G.S. 130A-310.76 and other monies paid to it or recovered by or on behalf of the Department. The Risk-Based Remediation Fund shall be treated as a nonreverting special trust fund pursuant to G.S. 147-69.2 and G.S. 147-69.3, except that interest and other income received on the Fund balance shall be treated as set forth in G.S. 147-69.1(d).

"§ 143-215.104AA. Standards for petroleum releases from aboveground storage tanks and other sources.
(a) Legislative Findings and Intent. –
(1) The General Assembly finds the following:
   a. Risk-based corrective action gives the State flexibility in requiring different levels of cleanup based on scientific analysis of different site characteristics and allowing no action or no further action at sites that pose little risk to human health or the environment.
   b. A risk-based approach to the cleanup of environmental damage can adequately protect human health and the environment while preventing excessive or unproductive cleanup efforts, thereby assuring that limited resources are directed toward those sites that pose the greatest risk to human health and the environment.
   c. Risk-based corrective action has successfully been used to clean up contamination from petroleum underground storage tanks, as well as contamination at sites governed by other environmental programs.
(2) The General Assembly intends the following:
   a. To direct the Commission to adopt rules that will provide for risk-based assessment and cleanup of discharges and releases of petroleum from aboveground storage tanks and other sources. These rules are intended to combine groundwater standards that protect current and potential future uses of groundwater with risk-based analysis to determine the appropriate cleanup levels and actions.
   b. That these rules apply to all discharges or releases that are reported on or after the date the rules become effective in order to ascertain whether cleanup is necessary, and if so, the appropriate level of cleanup.
   c. That these rules may be applied to any discharge or release that has been reported at the time the rules become effective at the discretion of the Commission.
   d. That these rules, and decisions of the Commission and the Department in implementing these rules, facilitate the completion of more cleanups in a shorter period of time.
The Commission shall adopt rules to establish a risk-based approach for the cleanup of discharges and releases of petroleum from aboveground storage tanks and other sources. At a minimum, the rules shall address all of the following:

1. The circumstances where site-specific information should be considered.
2. Criteria for determining acceptable cleanup levels.
3. The acceptable level or range of levels of risk to human health and the environment. Rules that use the distance between a source area of a confirmed discharge or release to a water supply well or a private drinking water well, as those terms are defined under G.S. 87-85, shall include a determination whether a nearby well is likely to be affected by the discharge or release as a factor in determining levels of risk.
4. Remediaion standards and processes.
5. Requirements for financial assurance, where the Commission deems it necessary.
6. Appropriate fees to be applied to persons who undertake remediation of environmental contamination under site-specific remediation pursuant to this Part to pay for administrative and operating expenses necessary to implement this Part and rules adopted to implement this Part.

The Commission may require an owner, operator, or landowner to provide information necessary to determine the degree of risk to human health and the environment that is posed by a discharge or release of petroleum from an aboveground storage tank or other source.

If the Commission concludes that a discharge or release poses a degree of risk to human health or the environment that is no greater than the acceptable level of risk established by the Commission, the Commission shall notify an owner, operator, or landowner who provides the information required by subsection (c) of this section that no cleanup, further cleanup, or further action will be required unless the Commission later determines that the discharge or release poses an unacceptable level of risk or a potentially unacceptable level of risk to human health or the environment. If the Commission concludes that a discharge or release poses a degree of risk to human health or the environment that requires further cleanup, the Commission shall notify the owner, operator, or landowner who provides the information required by subsection (c) of this section of the cleanup method approved by the Commission. This section shall not be construed to prohibit an owner, operator, or landowner from selecting a cleanup method other than the cleanup method approved by the Commission so long as the Commission determines that the alternative cleanup method will address imminent threats to human health and the environment.

Remediation of sites with off-site migration shall be subject to the following provisions:

1. Contaminated sites at which contamination has migrated to off-site properties may be remediated pursuant to this Part if either of the following occur:
   a. The person who proposes to conduct the remediation pursuant to this Part remediates the contaminated off-site property to unrestricted use standards.
   b. The person who proposes to conduct the remediation pursuant to this Part (i) provides the owner of the contaminated off-site property with a copy of this Part and the publication produced by the Department pursuant to subdivision (2) of this subsection and (ii) obtains written consent from the owner of the contaminated off-site property for the person to remediate the contaminated off-site property using site-specific remediation standards pursuant to this Part. Provided that the site-specific remediation standards shall not allow concentrations of contaminants on the off-site property to increase.
above the levels present on the date the written consent is obtained.
Written consent from the owner of the off-site property shall be on a
form prescribed by the Department and include an affirmation that
the owner has received and read the publication and authorizes the
person to remediate the owner’s property using site-specific
remediation standards pursuant to this Part.

(2) In order to inform owners of contaminated off-site property of the issues and
liabilities associated with the contamination on their property, the
Department, in consultation with the Consumer Protection Division of the
North Carolina Department of Justice and the North Carolina Real Estate
Commission, shall develop and make available a publication entitled
"Contaminated Property: Issues and Liabilities" to provide information on
the nature of risk-based remediation and how it differs from remediation to
unrestricted use standards, potential health impacts that may arise from
residual contamination, as well as identification of liabilities that arise from
contaminated property and associated issues, including potential impacts to
real estate transactions and real estate financing. The Department shall
update the publication as necessary.

(3) If, after issuance of a no further action determination, the Department
determines that additional remedial action is required for a contaminated
off-site property, the responsible party shall be liable for the additional
remediation deemed necessary.

(4) Nothing in this subsection shall be construed to preclude or impair any
person from obtaining any and all other remedies allowed by law.

(f) This section shall not be construed to limit the authority of the Commission to
require investigation, initial response, and abatement of a discharge or release pending a
determination by the Commission under subsection (d) of this section as to whether cleanup,
further cleanup, or further action will be required. Notwithstanding any authority provided
under this section to the Commission and the Department allowing use of a risk-based approach
for the cleanup of discharges and releases of petroleum from aboveground storage tanks and
other sources, a responsible party shall, at a minimum, do all of the following:

(1) Perform initial abatement actions to (i) measure for the presence of a release
where contamination is most likely to be present and to confirm the precise
source of the release; (ii) determine the possible presence of free product and
to begin free product removal immediately; (iii) continue to monitor and
mitigate any additional fire, vapor, or explosion hazards posed by vapors or
by free product; and (iv) submit a report summarizing these initial abatement
actions within 20 days after a discharge or release. For purposes of this
subdivision, the term "free product" means a non-aqueous phase liquid
which may be present within the saturated zone or in surface water.

(2) Remove, or in situ remediate, contaminated soil or free product that would
act as a continuing source of contamination to groundwater. Actions
conducted in conformance with this subdivision shall require approval by the
Department.

(g) This section shall apply to discharges of petroleum from aboveground storage tanks
and other sources not otherwise governed by the provisions of G.S. 143-215.94V.

SECTION 4.7.(c) G.S. 130A-310.8 is amended by adding a new subsection to
read:
"§ 130A-310.8. Recordation of inactive hazardous substance or waste disposal sites.

(i) If a site subject to the requirements of this section is remediated pursuant to the
requirements of Part 8 of Article 9 of Chapter 130A of the General Statutes, a Notice of
Residual Contamination may be prepared and filed in accordance with G.S. 130A-310.71(a)(9), in lieu of a Notice prepared and filed pursuant to this section.”

**SECTION 4.7.(f)** G.S. 130A-310.10(a)(8a) is repealed.

**SECTION 4.8.(a)** No later than March 1, 2016, the Department of Environment and Natural Resources shall do all of the following:

(1) Develop internal processes to govern remediation of contaminated sites conducted under this Part that are consistent across all programs or requirements identified in subsection (a) of G.S. 130A-310.67.

(2) Develop a coordinated program and processes for remediation of contaminated sites conducted under this Part that are subject to more than one program or requirement identified in subsection (a) of G.S. 130A-310.67.

(3) Develop reforms to expand the role, and otherwise enhance the use of, registered environmental consultants approved to implement and oversee voluntary remedial actions pursuant to this Part.

(4) Examine the criteria for development of site-specific remediation standards pursuant to this Part, specifically distances between water bodies and other receptors to plumes of contamination that originate from the source, to ensure that such standards are protective of public health, safety, and welfare; the environment; and natural resources.

**SECTION 4.8.(b)** No later than April 1, 2016, the Department shall report to the Environmental Review Commission on its activities conducted pursuant to subsection (a) of this section, together with any pertinent findings or recommendations, including any legislative proposals that it deems advisable.

The Department shall also evaluate background standards for these contaminants where they naturally occur in groundwater in the State.

**SECTION 4.8A.(b)** The Department shall submit an interim report no later than November 1, 2015, and a final report no later than April 1, 2016, to the Environmental Review Commission and the Joint Legislative Oversight Committee on Health and Human Services on

MODIFY EFFECTIVE DATE FOR LIFE-OF-SITE PERMITS FOR SANITARY LANDFILLS AND TRANSFER STATIONS AND MAKE OTHER TECHNICAL, CLARIFYING, AND CONFORMING CHANGES

SECTION 4.9.(a) Section 14.20(a) of S.L. 2015-241 reads as rewritten:

"SECTION 14.20.(a) G.S. 130A-294 reads as rewritten:

§ 130A-294. Solid waste management program.

(a) The Department is authorized and directed to engage in research, conduct investigations and surveys, make inspections and establish a statewide solid waste management program. In establishing a program, the Department shall have authority to:

…

(4) a. Develop a permit system governing the establishment and operation of solid waste management facilities. A landfill with a disposal area of 1/2 acre or less for the on-site disposal of land clearing and inert debris is exempt from the permit requirement of this section and shall be governed by G.S. 130A-301.1. Demolition debris from the decommissioning of manufacturing buildings, including electric generating stations, that is disposed of on the same site as the decommissioned buildings, is exempt from the permit requirement of this section and rules adopted pursuant to this section and shall be governed by G.S. 130A-301.3. The Department shall not approve an application for a new permit, the renewal of a permit, or a substantial amendment to a permit for a sanitary landfill, excluding demolition landfills as defined in the rules of the Commission, except as provided in subdivisions (3) and (4) of subsection (b1) of this section. No permit shall be granted for a solid waste management facility having discharges that are point sources until the Department has referred the complete plans and specifications to the Commission and has received advice in writing that the plans and specifications are approved in accordance with the provisions of G.S. 143-215.1. In any case where the Department denies a permit for a solid waste management facility, it shall state in writing the reason for denial and shall also state its estimate of the changes in the applicant's proposed activities or plans that will be required for the applicant to obtain a permit.

…

(a2) Permits for sanitary landfills and transfer stations shall be issued for (i) a design and operation phase of five years or (ii) a design and operation phase of 10 years. A permit issued for a design and operation phase of 10 years shall be subject to a limited review within five years of the issuance date. The life-of-site of the facility unless revoked as otherwise provided under this Article or upon the expiration of any local government franchise required for the facility pursuant to subsection (b1) of this section. For purposes of this section, "life-of-site" means the period from the initial receipt of solid waste at the facility until the Department approves final closure of the facility. Permits issued pursuant to this subsection shall take into account the duration of any permits previously issued for the facility and the remaining capacity at the facility.

(a3) As used in this section, the following definitions apply:

(1) "New permit" means any of the following:

a. An application for a permit for a solid waste management facility that has not been previously permitted by the Department. The term
includes one site suitability review, the initial permit to construct, and one permit to operate.

b. An application that proposes to expand the permitted activity of the waste management facility through an increase of ten percent (10%) or more in (i) the population of the geographic area to be served by the sanitary landfill; (ii) the quantity of solid waste to be disposed of in the sanitary landfill; or (iii) the geographic area to be served by the sanitary landfill.

c. An application that includes a proposed expansion to the boundary of a waste disposal unit within a permitted solid waste management facility.

d. An application that includes a proposed change in the categories of solid waste to be disposed of in the sanitary landfill.

e. An application for a permit to be issued pursuant to G.S. 130A-294(a2), which is issued for a duration of less than a facility's life-of-site based upon permits previously issued to a facility.

(2) "Permit amendment" means any of the following:

a. An application for the five-year renewal of a permit for a permitted solid waste management facility or for a permit review of a permitted solid waste management facility. This sub-subdivision shall not apply to sanitary landfills or transfer stations.

b. Any application that proposes a change in ownership or corporate structure of a permitted solid waste management facility.

(3) "Permit modification" means any of the following:

a. An application for any change to the plans approved in a permit for a solid waste management facility that does not constitute a "permit amendment" or a "new permit."

b. An application for a five-year limited review of a 10-year permit, including review of the operations plan, closure plan, post-closure plan, financial assurance cost estimates, environmental monitoring plans, and any other applicable plans for the facility.

(b) The Commission shall adopt and the Department shall enforce rules to implement a comprehensive statewide solid waste management program. The rules shall be consistent with applicable State and federal law; and shall be designed to protect the public health, safety, and welfare; preserve the environment; and provide for the greatest possible conservation of cultural and natural resources. Rules for the establishment, location, operation, maintenance, use, discontinuance, recordation, post-closure care of solid waste management facilities also shall be based upon recognized public health practices and procedures, including applicable epidemiological research and studies; hydrogeological research and studies; sanitary engineering research and studies; and current technological development in equipment and methods. The rules shall not apply to the management of solid waste that is generated by an individual or individual family or household unit on the individual's property and is disposed of on the individual's property.

(b1) (1) For purposes of this subsection and subdivision (4) of subsection (a) of this section, a "substantial amendment" means either:

a. An increase of ten percent (10%) or more in:
   1. The population of the geographic area to be served by the sanitary landfill;
   2. The quantity of solid waste to be disposed of in the sanitary landfill; or
   3. The geographic area to be served by the sanitary landfill.
b. A change in the categories of solid waste to be disposed of in the sanitary landfill or any other change to the application for a permit or to the permit for a sanitary landfill that the Commission or the Department determines to be substantial.

(2) A person who intends to apply for a new permit, the renewal of a permit, or a substantial amendment to a permit for a sanitary landfill shall obtain, prior to applying for a permit, a franchise for the operation of the sanitary landfill from each local government having jurisdiction over any part of the land on which the sanitary landfill and its appurtenances are located or to be located. A local government may adopt a franchise ordinance under G.S. 153A-136 or G.S. 160A-319. A franchise granted for a sanitary landfill shall be granted for the life-of-site of the landfill and shall include all of the following:

a. A statement of the population to be served, including a description of the geographic area.

b. A description of the volume and characteristics of the waste stream.

c. A projection of the useful life of the sanitary landfill.

e. The procedures to be followed for governmental oversight and regulation of the fees and rates to be charged by facilities subject to the franchise for waste generated in the jurisdiction of the franchising entity.

f. A facility plan for the sanitary landfill that shall include the boundaries of the proposed facility, proposed development of the facility site in five-year operational phases, the boundaries of all waste disposal units, final elevations and capacity of all waste disposal units, the amount of waste to be received per day in tons, the total waste disposal capacity of the sanitary landfill in tons, a description of environmental controls, and a description of any other waste management activities to be conducted at the facility. In addition, the facility plan shall show the proposed location of soil borrow areas, leachate facilities, and all other facilities and infrastructure, including ingress and egress to the facility.

(4) An applicant for a new permit, the renewal of a permit, or a substantial amendment to a permit for a sanitary landfill shall request each local government having jurisdiction over any part of the land on which the sanitary landfill and its appurtenances are located or to be located to issue a determination as to whether the local government has in effect a franchise, zoning, subdivision, or land-use planning ordinance applicable to the sanitary landfill and whether the proposed sanitary landfill, or the existing sanitary landfill as it would be operated under the renewed or substantially amended permit, would be consistent with the applicable ordinances. The request to the local government shall be accompanied by a copy of the permit application and shall be delivered to the clerk of the local government personally or by certified mail. In order to serve as a basis for a determination that an application for a new permit, the renewal of a permit, or a substantial amendment to a permit for a sanitary landfill is consistent with a zoning, subdivision, or land-use planning ordinance, an ordinance or zoning classification applicable to the real property designated in the permit application shall have been in effect not less than 90 days prior to the date the request for a determination of consistency is delivered to the clerk of the local government. The determination shall be verified or supported by affidavit signed by the chief administrative officer, the chief administrative
officer's designee, clerk, or other official designated by the local government to make the determination and, if the local government states that the sanitary landfill as it would be operated under the new, renewed, or substantially amended new permit is inconsistent with a franchise, zoning, subdivision, or land-use planning ordinance, shall include a copy of the ordinance and the specific reasons for the determination of inconsistency. A copy of the determination shall be provided to the applicant when the determination is submitted to the Department. The Department shall not act upon an application for a permit under this section until it has received a determination from each local government requested to make a determination by the applicant; provided that if a local government fails to submit a determination to the Department as provided by this subsection within 15 days after receipt of the request, the Department shall proceed to consider the permit application without regard to a franchise, local zoning, subdivision, and land-use planning ordinances. Unless the local government makes a subsequent determination of consistency with all ordinances cited in the determination or the sanitary landfill as it would be operated under the new, renewed, or substantially amended new permit is determined by a court of competent jurisdiction to be consistent with the cited ordinances, the Department shall attach as a condition of the permit a requirement that the applicant, prior to construction or operation of the sanitary landfill under the permit, comply with all lawfully adopted local ordinances cited in the determination that apply to the sanitary landfill. This subsection shall not be construed to affect the validity of any lawfully adopted franchise, local zoning, subdivision, or land-use planning ordinance or to affect the responsibility of any person to comply with any lawfully adopted franchise, local zoning, subdivision, or land-use planning ordinance. This subsection shall not be construed to limit any opportunity a local government may have to comment on a permit application under any other law or rule. This subsection shall not apply to any facility with respect to which local ordinances are subject to review under either G.S. 104E-6.2 or G.S. 130A-293.

(5) As used in this subdivision, "coal-fired generating unit" and "investor-owned public utility" have the same meaning as in G.S. 143-215.107D(a).

Notwithstanding subdivisions (a)(4), (b1)(3), or (b1)(4) of this section, no franchise shall be required for a sanitary landfill used only to dispose of waste generated by a coal-fired generating unit that is owned or operated by an investor-owned utility subject to the requirements of G.S. 143-215.107D.

..."

The owner or professional engineer may submit additional information to the department to cure the deficiencies in the notice. The local health department shall make a final determination as to whether the notice of intent to construct is complete within 10 business days after the department receives the additional information from the owner or professional engineer. If the department fails to act within any time period set out in this subsection, the owner or professional engineer may treat the failure to act as a determination of completeness.

(d) Submission of Notice of Intent to Construct to Department for Certain Systems. – Prior to commencing in the construction, siting, or relocation of a wastewater system designed (i) for the collection, treatment, and disposal of industrial process wastewater or (ii) to treat greater than 3,000 gallons per day, the owner of a proposed wastewater system who wishes to utilize the engineered option permit, or a professional engineer authorized as the legal representative of the owner, shall provide to the Department a duplicate copy of the notice of intent to construct submitted to the local health department required pursuant to subsection (b) of this section.

b. Submit a signed and dated statement of responsibility to the owner of the wastewater system, prior to the commencement of work, that contains acknowledgement and awareness of the requirements in the professional engineer's statement of special inspections.

Where the professional engineer's designs, plans, and specifications call for the installation of a conventional wastewater system, such designs, plans, and specifications shall allow for the installation of an accepted system in lieu of a conventional system in accordance with the accepted system approval.

In addition to the requirements of this section, the owner, the professional engineer designing the proposed wastewater system, and any on-site wastewater system contractors employed to construct or install the wastewater system shall comply with applicable federal, State, and local laws, regulations, rules, and ordinances.

No Public Liability. – The Department, the Department's authorized agents, or local health departments shall have no liability for wastewater systems designed, constructed, and installed pursuant to an engineered option permit.

3. Special inspections. – The owner of the proposed wastewater system shall employ one or more approved special inspectors to conduct special inspections during the construction of the wastewater system. The professional engineer who designed the wastewater system, or the engineer's personnel, may function as an approved agency to conduct special inspections required by this subdivision. The professional engineer's personnel shall only operate as an approved agency for special inspections if the personnel can demonstrate competence and relevant experience or training. For purposes of this subdivision, experience or training shall be considered relevant when the documented experience or training is related in complexity to the same type of special inspection activities for projects of similar complexity and material qualities.

4. Inspection reports. – Approved special inspectors shall maintain and furnish all inspection records to the professional engineer who designed the wastewater system. The records shall indicate whether the work inspected was completed in conformance with the engineer's design and specifications. Any discrepancies identified between the completed work and the engineer's design shall be brought to the immediate attention of the on-site wastewater system contractor for correction. If discrepancies are not corrected, they
shall be brought to the attention of the professional engineer who designed the wastewater system prior to completion of work. A final inspection report documenting the required special inspections and the correction of any identified discrepancies shall be provided to the professional engineer and the owner of the wastewater system for review at the post-construction conference required pursuant to subsection (i) of this section.

(h) Local Authority. — This section shall not relieve the owner or operator of a wastewater system from complying with any and all modifications or additions to rules adopted by a local health department to protect public health pursuant to G.S. 130A-335(c) that are required at the time the owner or operator submits the notice of intent to construct pursuant to G.S. 130A-336.1(b). The local health department shall notify the owner or operator of the wastewater system of any issues of compliance related to such modifications or additions.

(i) Operations and Management. —

(1) The professional engineer designing the wastewater system shall establish a written operations and management program based on the size and complexity of the wastewater system and shall provide the program to the owner.

(2) The owner shall enter into a contract with a water pollution control system operator certified pursuant to Part 1 of Article 3 of Chapter 90A of the General Statutes and who is selected from the list of certified operators maintained by the Division of Water Resources in the Department of Environment and Natural Resources for operation and maintenance of the wastewater system in accordance with rules adopted by the Commission.

The post-construction conference shall include start-up of the wastewater system and any required verification of system design or system components.

(k) Required Documentation. —

(1) At the completion of the post-construction conference conducted pursuant to subsection (j) of this section, the professional engineer who designed the wastewater system shall deliver to the owner signed, sealed, and dated copies of the engineer’s report, which, for purposes of this subsection, shall include the following:

a. The evaluation of soil conditions and site features as prepared by either the licensed soil scientist or licensed geologist.

b. The drawings, specifications, plans, and reports of the wastewater system, including the statement of special inspections required pursuant to G.S. 130A-336.1(e)(3); the on-site wastewater system contractor's signed statement of responsibility required pursuant to G.S. 130A-336.1(e)(4); records of all special inspections; and the final inspection report documenting the correction of any identified discrepancies required pursuant to subsection (g) of this section.

(r) Reports. – The Department shall report to the Environmental Review Commission and the Joint Legislative Oversight Committee on Health and Human Services on or before January 1, 2017, and annually thereafter, on the implementation and effectiveness of this section. For the report due on or before January 1, 2017, the Department shall specifically study (i) whether the engineered option permit resulted in a reduction in the length of time improvement permits or authorizations to construct are pending; (ii) whether the engineered option permit resulted in increased system failures or other adverse impacts; (iii) if the engineered option permit resulted in new or increased environmental or public health impacts; (iv) an amount of errors and omissions insurance or other liability sufficient for covering professional engineers, licensed soil scientists, licensed geologists, and contractors who employ the engineered option permit; and (v) the fees charged by local health departments to
administer the engineered option permit pursuant to subsection (n) of this section. The Department may include recommendations, including any legislative proposals, in its reports to the Commission and Committee.”

SECTION 4.14.(d) G.S. 130A-338 reads as rewritten:

"§ 130A-338. Authorization for wastewater system construction required before other permits to be issued.

Where construction, location or relocation is proposed to be done upon a residence, place of business or place of public assembly, no permit required for electrical, plumbing, heating, air conditioning or other construction, location or relocation activity under any provision of general or special law shall be issued until an authorization for wastewater system construction has been issued under G.S. 130A-336. G.S. 130A-336, or authorization has been obtained under G.S. 130A-337(c), G.S. 130A-337(c), or a decision on the completeness of the notice of intent to construct is made by the local health department pursuant to G.S. 130A-336.1(c).”

SECTION 4.14.(e) G.S. 130A-339 reads as rewritten:

"§ 130A-339. Limitation on electrical service.

No person shall allow permanent electrical service to a residence, place of business or place of public assembly upon construction, location or relocation until the official electrical inspector with jurisdiction as provided in G.S. 143-143.2 certifies to the electrical supplier that the required improvement permit authorization for wastewater system construction and an operation permit or authorization under G.S. 130A-337(c) or the letter of confirmation authorization wastewater system operation under G.S. 130A-336.1(m) has been obtained. Temporary electrical service necessary for constructing a residence, place of business or place of public assembly can be provided upon compliance with G.S. 130A-338.”

SECTION 4.14.(f) The Commission for Public Health, in consultation with the Department of Health and Human Services, local health departments, and stakeholders representing the wastewater system industry, shall study the minimum on-site wastewater system inspection frequency established pursuant to Table V(a) in 15A NCAC 18A .1691 to evaluate the feasibility and desirability of eliminating duplicative inspections of on-site wastewater systems. In the conduct of its study, the Commission shall consider (i) the compliance history of wastewater systems, including whether operators' reports and laboratory reports are in compliance with Article 11 of Chapter 130A of the General Statutes and the rules adopted pursuant to that Article; (ii) alternative inspection frequencies, including the use of remote Web-based monitoring for alarm and compliance notification; (iii) whether the required verification visit conducted by local health departments shows a statistically significant justification for duplicative costs to the owner of the wastewater system; (iv) methods for notifications of changes to and expirations of operations contracts; and (v) methods for local health departments to provide certified operator management for sites that are not under contract with a water pollution control system operator certified pursuant to Part 1 of Article 3 of Chapter 90A of the General Statutes. The Commission shall report its findings and recommendations, including any legislative proposals, to the Environmental Review Commission and the Joint Legislative Oversight Committee on Health and Human Services on or before March 1, 2016.

SECTION 4.14.(g) G.S. 130A-336 reads as rewritten:

"§ 130A-336. Improvement permit and authorization for wastewater system construction required.

(a) Any proposed site for a residence, place of business, or place of public assembly in an area not served by an approved wastewater system shall be evaluated by either (i) the local health department in accordance with rules adopted pursuant to this Article or (ii) by a professional engineer, licensed soil scientist, or licensed geologist acting within the engineer's, soil scientist's, or geologist's scope of work, as applicable, and pursuant to the conditions of the engineered option permit in G.S. 130A-336.1. An improvement permit shall be issued in compliance with the rules adopted pursuant to this Article. An improvement permit issued by a local health department shall include:
(1) For permits that are valid without expiration, a plat, or, for permits that are valid for five years, a site plan.
(2) A description of the facility the proposed site is to serve.
(3) The proposed wastewater system and its location.
(4) The design wastewater flow and characteristics.
(5) The conditions for any site modifications.
(6) Any other information required by the rules of the Commission.

The Neither the improvement permit nor the authorization for wastewater system construction shall not be affected by change in ownership of the site for the wastewater system provided both the site for the wastewater system and the facility the system serves are unchanged and remain under the ownership or control of the person owning the facility. No person shall commence or assist in the construction, location, or relocation of a residence, place of business, or place of public assembly in an area not served by an approved wastewater system unless an improvement permit and an authorization for wastewater system construction are obtained from the local health department unless that person is acting in accordance with the conditions and criteria of an engineered option permit pursuant to G.S. 130A-336.1. This requirement shall not apply to a manufactured residence exhibited for sale or stored for later sale and intended to be located at another site after sale.

(b) The local health department shall issue an authorization for wastewater system construction authorizing work to proceed and the installation or repair of a wastewater system when it has determined after a field investigation that the system can be installed and operated in compliance with this Article and rules adopted pursuant to this Article. This authorization for wastewater system construction shall be valid for a period equal to the period of validity of the improvement permit and may be issued at the same time the improvement permit is issued. No person shall commence or assist in the installation, construction, or repair of a wastewater system unless an improvement permit and an authorization for wastewater system construction have been obtained from the Department or the local health department unless that person is acting in accordance with the conditions and criteria of an engineered option permit pursuant to G.S. 130A-336.1. No improvement permit or authorization for wastewater system construction shall be required for maintenance of a wastewater system. The Department and the local health department may impose conditions on the issuance of an improvement permit and an authorization for wastewater system construction.

(c) Unless the Commission otherwise provides by rule, plans, and specifications for all wastewater systems designed for the collection, treatment, and disposal of industrial process wastewater shall be reviewed and approved by the Department prior to the issuance of an authorization for wastewater system construction by the local health department.

(d) If a local health department repeatedly fails to issue or deny improvement permits for conventional or accepted septic tank systems within 60 days of days, or within 90 days for provisional or innovative systems, after receiving completed applications for the permits, then the Department of Environment and Natural Resources may withhold public health funding from that local health department.

SECTION 4.14.(h) The Commission for Public Health, in consultation with the Department of Health and Human Services, local health departments, stakeholders who represent the wastewater system industry, and other interested parties shall study the period of validity for improvement permits and authorizations for wastewater system construction and evaluate the costs and benefits of a range of periods of validity. In the conduct of this study, the Commission shall also evaluate the feasibility and desirability of conducting an abbreviated review and possible extension of a permit or authorization that is due to expire at a lower cost to the applicant. The Commission shall report its findings and recommendations, including any legislative proposals, to the Environmental Review Commission and the Joint Legislative Oversight Committee on Health and Human Services on or before April 1, 2016.
SECTION 4.14.(i) Any improvement permit or authorization for wastewater system construction that is in effect on the effective date of this act which is scheduled to expire on or before July 1, 2016, shall remain in effect until July 1, 2016.

SECTION 4.14.(j) G.S. 130A-342 reads as rewritten:

"§ 130A-342. Residential wastewater treatment systems.

(a) Individual residential wastewater treatment systems that are approved and listed in accordance with the standards adopted by the National Sanitation Foundation, Inc. for Class I residential wastewater treatment systems, as set out in Standard 40 of the National Sanitation Foundation, Inc., (as approved 13 January 2001) as amended, shall be permitted under rules adopted by the Commission. The Commission may establish standards in addition to those set by the National Sanitation Foundation, Inc.

(b) A permitted system with a design flow of less than 1,500 gallons per day shall be operated and maintained by a certified wastewater treatment facility operator by a person who is a Subsurface Water Pollution Control System Operator as certified by the Water Pollution Control System Operators Certification Commission and authorized by the manufacturer of the individual residential wastewater treatment system. The Commission may, in addition to the requirement for a certified Subsurface Water Pollution Control System Operator, establish additional standards for wastewater systems with a design flow of 1,500 gallons or greater per day.

(c) Each county, in which one or more residential wastewater treatment systems permitted pursuant to this section are in use, shall document the performance of each system and report the results to the Department annually."

SECTION 4.14.(k) This section is effective when this act becomes law. The Commission for Public Health shall adopt temporary rules pursuant to Sections 4.14(a) through 4.14(e), Section 4.14(g), and Section 4.14(j) of this act no later than June 1, 2016, and shall adopt permanent rules pursuant to Sections 4.14(a) through 4.14(e), Section 4.14(g), and Section 4.14(j) of this act no later than January 1, 2017. No person shall utilize the engineered permit option authorized pursuant to G.S. 130A-336.1, as enacted by Section 4.14(c) of this act, however, until such time as the rules adopted by the Commission pursuant to Section 4.14(c) of this act become effective.

"§ 90A-72. Certification required; applicability.

(a) Certification Required. – No person shall construct, install, or repair or offer to construct, install, or repair an on-site wastewater system permitted under Article 11 of Chapter 130A of the General Statutes without being certified as a contractor at the required level of certification for the specified system. No person shall conduct an inspection or offer to conduct an inspection of an on-site wastewater system as permitted under Article 11 of Chapter 130A of the General Statutes without being certified in accordance with the provisions of this Article.

(b) Applicability. – This Article does not apply to the following:

(1) A person who is employed by a certified contractor or inspector in connection with the construction, installation, repair, or inspection of an on-site wastewater system performed under the direct and personal supervision of the certified contractor or inspector in charge.

(2) A person who constructs, installs, or repairs an on-site wastewater system described as a single septic tank with a gravity-fed gravel trench dispersal media when located on land owned by that person and that is intended solely for use by that person and members of that person's immediate family who reside in the same dwelling.

(3) A person licensed under Article 1 of Chapter 87 of the General Statutes who constructs or installs an on-site wastewater system ancillary to the building

This subdivision shall not be construed to require a plumbing contractor to become certified as a contractor pursuant to this section to install or repair a grease trap, interceptor, or separator upstream from a septic tank or similar depository that complies with the requirements of the local health department.

(8) A person employed by the Department, a local health department, or a local health district, when conducting a regulatory inspection of an on-site wastewater system for purposes of determining compliance.

AMEND APPROVAL OF ON-SITE WASTEWATER SYSTEMS

SECTION 4.15.(a) G.S. 130A-343 reads as rewritten:

"§ 130A-343. Approval of on-site subsurface wastewater systems.

(a) Definitions. – As used in this section:

(1) "Accepted wastewater dispersal system" means any subsurface wastewater dispersal system, other than a conventional wastewater system, or any technology, device, or component of a wastewater system that: (i) has been previously approved as an innovative wastewater dispersal system by the Department; (ii) has been in general use in this State as an innovative wastewater dispersal system for more than five years; and (iii) has been approved by the Commission for general use or use in one or more specific applications. An accepted wastewater dispersal system may be approved for use in applications for which a conventional wastewater system is unsuitable. The Commission may impose any design, operation, maintenance, monitoring, and management requirements on the use of an accepted wastewater dispersal system that it determines to be appropriate.

(2) "Controlled demonstration Provisional wastewater system" means any wastewater system or any technology, device, or component of a wastewater system that, on the basis of (i) research, is approved by to the Department or (ii) approval of the wastewater system by a nationally recognized certification body for a period that exceeds one year for research, testing, or trial use under actual field conditions in this State pursuant to a protocol that has been approved by the Department.

(3) "Conventional wastewater system", "conventional sewage system", or "conventional septic tank system" means a subsurface wastewater system
that consists of a traditional septic or settling tank and a gravity-fed subsurface disposal dispersal field that uses washed natural stone or gravel or crushed stone of approved size and grade and piping to distribute effluent to soil in one or more nitrification trenches and that does not include any other appurtenance.

(4) "Experimental wastewater system" means any wastewater system or any technology, device, or component of a wastewater system that is approved by the Department for research, testing, or limited trial use under actual field conditions in this State pursuant to a protocol that has been approved by the Department.

(5) "Innovative wastewater system" means any wastewater system, other than a conventional wastewater system or a provisional wastewater system, or any technology, device, or component of a wastewater system that: (i) has been demonstrated to perform in a manner equal or superior to a conventional wastewater system; (ii) is constructed of materials whose physical and chemical properties provide the strength, durability, and chemical resistance to allow the system to withstand loads and conditions as required by rules adopted by the Commission; and (iii) has been approved by the Department for general use or for one or more specific applications. An innovative wastewater system may be approved for use in applications for which a conventional wastewater system is unsuitable. The Department may impose any design, operation, maintenance, monitoring, and management requirements on the use of an innovative wastewater system that it determines to be appropriate. A wastewater system approved by a nationally recognized certification body and in compliance with the ongoing verification program of such body may submit a sampling protocol for innovative system approval that reduces the data sets required for such approval by fifty percent (50%). Such an application shall include all of the data associated with the nationally recognized certification body's verification of the system's performance.

(6) "Nationally recognized certification body" means a third-party certification body for wastewater systems or system components that is accredited by an entity widely recognized in the United States such as the American National Standards Institute, the Standards Council of Canada, or the International Accreditation Service, Inc.

(b) Adoption of Rules Governing Approvals. – The Commission shall adopt rules for the approval and permitting of experimental, controlled demonstration, innovative, conventional, provisional, and accepted wastewater systems. The rules shall address the criteria to be considered prior to issuing a permit or approval for a system, requirements for preliminary design plans and specifications that must be submitted, methodology to be used, standards for monitoring and evaluating the system, research evaluation of the system, the plan of work for monitoring system performance and maintenance, and any additional matters the Commission determines are necessary for verification of the performance of a wastewater system or system component.

(c) Approved Systems. — Procedure for Modifications or Revocations. – The Department may modify, suspend, or revoke the approval of a wastewater system if the Department determines that the approval is based on false, incomplete, or misleading information or if the Department finds that modification, suspension, or revocation is necessary to protect public health, safety, or welfare. The Department shall provide a listing of all approved experimental, controlled demonstration, innovative, provisional, and accepted wastewater systems to the local health departments annually, and more frequently, when the Department makes a final agency decision related to the approval of a wastewater system or the Commission adopts rules related to the.
any modification or revocation of an approval of a wastewater system, system or system component.

(d) Evaluation Protocols. – The Department shall approve one or more nationally recognized protocols for the evaluation of on-site subsurface wastewater systems. Any protocol approved by the Department shall specify a minimum number of sites that must be evaluated and the duration of the evaluation period. At the request of a manufacturer of a wastewater system, the Department may approve an alternative protocol for use in the evaluation of the performance of the manufacturer’s wastewater system. A protocol for the evaluation of an on-site subsurface wastewater system approved by the Department pursuant to this section is a scientific standard within the meaning of G.S. 150B-2(8a).h.

(e) Experimental Systems. – A manufacturer of a wastewater system that is intended for on-site subsurface use may apply to the Department to have the system evaluated as an experimental wastewater system as provided in this subsection. The manufacturer shall submit a proposal for evaluation of the system to the Department. The proposal for evaluation shall include the design of the system, a description of any laboratory or field research or testing that will be used to evaluate the system, a description of the research or testing protocol, and the credentials of the independent laboratory, consultant, or other entity that will be conducting the research or testing on the system. The proposal may include an evaluation of research and testing conducted in other states to the extent that the research and testing involves soil types, climate, hydrology, and other relevant conditions that are comparable to conditions in this State and if the research or testing was conducted pursuant to a protocol acceptable to the Department. The manufacturer shall enter into a contract for an evaluation of the performance of the experimental wastewater system with an independent laboratory, consultant, or other entity that has expertise in the evaluation of wastewater systems and that is approved by the Department. The manufacturer may install up to 50 experimental systems pursuant to a protocol approved by the Department on sites that are suitable for a conventional wastewater system and that have a repair area of sufficient size to allow installation of a conventional wastewater system, an approved innovative wastewater system, or an accepted wastewater system if the experimental wastewater system fails to perform properly.

(f) Controlled Demonstration Provisional Systems. – A manufacturer of a wastewater system intended for on-site subsurface use may apply to the Department to have the system evaluated as a controlled demonstration wastewater system provisionally approved for use in this State. Any wastewater system approved based on its approval by a nationally recognized certification body must be designed and installed in a manner consistent with the system evaluated and approved by the nationally recognized certification body. The manufacturer shall submit a proposal for evaluation of the system to the Department. The proposal shall contain procedures for obtaining specified information necessary to achieve innovative status upon completion of the provisional status. The proposal for evaluation shall include the design of the system, a description of any laboratory or field research or testing that will be used to evaluate the system, a description of the research or testing protocol, and the credentials of the independent laboratory, consultant, or other entity that will be conducting the research or testing on the system. If the system was evaluated as an experimental wastewater system under subsection (c) of this section, the proposal shall include the results of the evaluation. The proposal may include an evaluation of research and testing conducted in other states to the extent that the research and testing involves soil types, climate, hydrology, and other relevant conditions that are comparable to conditions in this State and if the research or testing was conducted pursuant to a protocol acceptable to the Department. The manufacturer shall enter into a contract for an evaluation of the performance of the controlled demonstration wastewater system with an independent laboratory, consultant, or other entity that has expertise in the evaluation of wastewater systems and that is approved by the Department. The manufacturer may install up to 200 controlled demonstration provisional wastewater systems pursuant to a protocol approved by the Department on sites that are suitable for a conventional wastewater system and that have a repair area of sufficient size to
allow installation of a conventional wastewater system, an approved innovative wastewater system, or an accepted wastewater system if the controlled demonstration provisional wastewater system fails to perform properly. If the controlled demonstration provisional wastewater system is intended for use on sites that are not suitable, or that are provisionally suitable for a conventional wastewater system, the Department may approve the installation of the controlled demonstration provisional wastewater system if the Department determines that the manufacturer can provide an acceptable alternative method for collection, treatment, and disposal dispersal of the wastewater. The Department shall approve applications for provisional systems based on approval by a nationally recognized certification body within 90 days of receipt of a complete application. A manufacturer that chooses to remove its product from the nationally recognized standard during the provisional approval may continue its application in this State pursuant to requirements and procedures established by the Department.

(g) Innovative Systems. – A manufacturer of a wastewater system for on-site subsurface use that has been evaluated as an experimental wastewater system as provided in subsection (e) of this section or that has been evaluated as a controlled demonstration wastewater system as provided in subsection (f) of this section may apply to the Department to have the system approved as an innovative wastewater system as provided in this subsection. A manufacturer that choose to remove its product from the nationally recognized standard during the provisional approval may continue its application in this State pursuant to requirements and procedures established by the Department.

Within 30 days of receipt of the initial application, the Department shall either (i) notify the manufacturer of any items necessary to complete the application or (ii) notify the manufacturer that its application is complete. The Department shall publish a notice that the manufacturer has submitted an application under this subsection in the North Carolina Register and may provide additional notice to the public via the Internet or by other means. The Department shall receive public comment on the application for at least 30 days after the date the notice is published in the North Carolina Register. In making a determination under this subsection, the Department shall consider the data, findings, and recommendations submitted by the manufacturer and all public comment. The Department may also consider any other information that the Department
determines to be relevant. The Department shall determine: (i) whether the system performs in a manner equal or superior to a conventional wastewater system, in terms of structural integrity, treatment, and hydraulic performance; (ii) whether the system is constructed of materials whose physical and chemical properties provide the strength, durability, and chemical resistance to allow the system to withstand loads and conditions as required by rules adopted by the Commission; (iii) the circumstances in which use of the system is appropriate; and (iv) any conditions and limitations related to the use of the system. The Department shall make the determinations required by this subsection and approve or deny the application within 90 days after the Department receives a complete application from a manufacturer. If the Department fails to act on the application within 90 days, the manufacturer may treat the application as denied and challenge the denial by filing a contested case as provided in Article 3 of Chapter 150B of the General Statutes. If the Department approves an innovative wastewater system, the Department shall notify the manufacturer of the approval and specify the circumstances in which use of the system is appropriate and any conditions and limitations related to the use of the system.

(g1) Approval of Functionally Equivalent Trench Systems as Innovative Systems. – A manufacturer of a wastewater trench system may petition the Commission to have the wastewater trench system approved as an innovative wastewater system as provided in this subsection.

(1) The Commission shall approve a wastewater trench system as an innovative wastewater system if it finds that there is clear, convincing, and cogent evidence that the wastewater trench system is functionally equivalent to a wastewater trench system that is approved as an accepted wastewater system. A wastewater trench system shall be considered functionally equivalent to an accepted wastewater trench system if the performance characteristics of the wastewater trench system satisfy all of the following requirements:

a. The physical properties and chemical durability of the materials from which the wastewater trench system is constructed are equal to or superior to the physical properties and chemical durability of the materials from which the accepted wastewater trench system is constructed.

b. The permeable sidewall area and bottom infiltrative area of the wastewater trench system are equal to or greater than the permeable sidewall area and bottom infiltrative area of the accepted wastewater trench system at a field-installed size.

c. The wastewater trench system utilizes a similar method and manner of function for the conveyance and application of effluent as the accepted wastewater trench system.

d. The structural integrity of the wastewater trench system is equal to or superior to the structural integrity of the accepted wastewater trench system.

e. The wastewater trench system shall provide a field installed system storage volume equal to or greater than the field installed system storage volume of the accepted wastewater trench system.

(2) As part of its petition, the manufacturer shall provide to the Commission all of the following information:

a. Specifications of the wastewater trench system.

b. Data necessary to demonstrate that the wastewater trench system is functionally equivalent to a wastewater trench system that is approved as an accepted wastewater system.

c. A certified statement from an independent, third-party professional engineer or testing laboratory that, based on verified documentation,
the wastewater trench system is functionally equivalent to an accepted wastewater system.

(3) Approval of a wastewater trench system as an innovative wastewater system shall not be conditioned on the manufacturer of the wastewater trench system having operational systems installed in the State.

(4) The Commission shall authorize the use of a wastewater trench system as an innovative wastewater system in the same applications as the accepted wastewater trench system.

(5) The Commission shall not include conditions and limitations in the approval of a wastewater trench system as an innovative wastewater system that are not included in the approval of the accepted wastewater trench system.

(h) Accepted Wastewater Dispersal Systems. – A manufacturer of an innovative wastewater dispersal system that has been in general use in this State for more than minimum of five years may petition the Commission to have the system designated as an accepted wastewater system as provided in this subsection. The manufacturer shall provide the Commission with the data and findings of all prior evaluations of the performance of the system in this State and other states referenced in the petition, including disclosure of any conditions found to result in unacceptable structural integrity, treatment, or hydraulic performance. In addition, the manufacturer shall provide the Commission with information sufficient to enable the Commission to fully evaluate the performance of the system in this State for at least the five-year period immediately preceding the petition. The Commission shall designate a wastewater system as an accepted wastewater system only if it finds that there is clear, convincing, and cogent evidence (i) to confirm the findings made by the Department at the time the Department approved the system as an innovative wastewater system and (ii) that the system performs in a manner that is equal or superior to a conventional wastewater system under actual field conditions in this State. The Commission shall specify the circumstances in which use of the system is appropriate and any conditions and limitations related to the use of the system.

(i) Miscellaneous Provisions. – Nonproprietary Wastewater Systems. –

(1) In evaluating applications for approval under this section, the Department may consult with persons who have special training and experience related to on-site subsurface wastewater systems and may form a technical advisory committee for this purpose. However, the Department is responsible for making timely and appropriate determinations under this section.

(2) The Department may initiate a review of a nonproprietary wastewater system and approve the system for on-site subsurface use as an experimental wastewater system, a controlled demonstration wastewater system, as a provisional wastewater system or an innovative wastewater system without having received an application from a manufacturer. The Department may recommend that the Commission designate a nonproprietary wastewater system as an accepted wastewater system without having received a petition from a manufacturer.

(j) Warranty Required in Certain Circumstances. – The Department shall not approve a reduction of the total nitrification trench length for an innovative wastewater system or accepted wastewater system handling untreated septic tank effluent of more than twenty-five percent (25%) as compared to the total nitrification trench length required for a 36 inch wide conventional wastewater system unless the manufacturer of the innovative wastewater system or accepted wastewater system provides a performance warranty for the nitrification trench system to each owner or purchaser of the system for a warranty period of at least five years from the date on which the wastewater system is placed in operation. The warranty shall provide that the manufacturer shall provide all material and labor that may be necessary to provide a fully functional wastewater system. The Commission shall establish minimum terms and conditions for the warranty required by this subsection. This subsection shall not be
construed to require that a manufacturer warrant a wastewater system that is not properly sized to meet the design load required for a particular use, that is improperly installed, or that is improperly operated and maintained.

(j1) Clarification With Respect to Certain Dispersal Media. – In considering the application by a manufacturer of a wastewater system utilizing expanded polystyrene synthetic aggregate particles as a septic effluent dispersal medium for approval of the system under this section, neither the Commission nor the Department may condition, delay, or deny the approval based on the particle or bulk density of the expanded polystyrene material. With respect to approvals already issued by the Department or Commission that include conditions or requirements related to the particle or bulk density of expanded polystyrene material, the Commission or Department, as applicable, shall promptly reissue all such approvals with the conditions and requirements relating to the density of expanded polystyrene material permanently deleted while leaving all other terms and conditions of the approval intact.

(k) Fees. – The Department shall collect the following fees under this section:

(1) Review of an alternative protocol under subsection (d) of this section $1,000.00
(2) Review of an experimental system $2,000.00
(3) Review of a controlled demonstration or provisional system $3,000.00
(4) Review of an innovative system $3,000.00
(5) Review of an accepted system $3,000.00
(6) Review of a residential wastewater treatment system pursuant to G.S. 130A-342 $1,500.00
(7) Review of a component or device required of a system $100.00
(8) Modification to approved accepted, provisional, or innovative system $1,000.00

(l) On-Site Wastewater System Account. – The On-Site Wastewater System Account is established as a nonreverting account within the Department. Fees collected pursuant to this section shall be placed in the On-Site Wastewater System Account and shall be applied only to the costs of implementing this section.”

SECTION 4.15.(b) The Commission for Public Health shall review and amend its rules to implement Section 4.15(a) of this act.

SECTION 4.15.(c) Beginning January 1, 2016, and every quarter thereafter until all rules required pursuant to Sections 4.14 and 4.15 of this act are adopted or amended, the Commission for Public Health shall submit written reports as to its progress on adopting or amending rules as required by Sections 4.14 and 4.15 of this act to the Environmental Review Commission and the Joint Legislative Oversight Committee on Health and Human Services. The Commission shall supplement the written reports required by this subsection with additional written and oral reports as may be requested by the Environmental Review Commission and the Joint Legislative Oversight Committee on Health and Human Services. The Commission shall submit the written reports required by this subsection whether or not the General Assembly is in session at the time the report is due.

SECTION 4.15.(d) The Commission for Public Health, in consultation with the Department of Health and Human Services, local health departments, and stakeholders representing the wastewater system industry, shall study the costs and benefits of requiring treatment standards greater than those listed by nationally recognized standards, including the recorded advantage of such higher treatment standards for the protection of the public health and the environment. The Commission shall report its findings and recommendations, including any legislative proposals, to the Environmental Review Commission and the Joint Legislative Oversight Committee on Health and Human Services on or before March 1, 2016.

CONTESTED CASES FOR AIR PERMITS

SECTION 4.17.(a) G.S. 143-215.108 reads as rewritten:
§ 143-215.108. Control of sources of air pollution; permits required.

(e) A permit applicant, permittee, or third party applicant or permittee who is dissatisfied with a decision of the Commission on a permit application may commence a contested case by filing a petition under G.S. 150B-23 within 30 days after the Commission notifies the applicant or permittee of its decision. If the permit applicant, permittee, or third party applicant or permittee does not file a petition within the required time, the Commission's decision on the application is final and is not subject to review. The filing of a petition under this subsection will stay the Commission's decision until resolution of the contested case.

(e1) A person other than a permit applicant or permittee who is a person aggrieved by the Commission's decision on a permit application may commence a contested case by filing a petition under G.S. 150B-23 within 30 days after the Commission provides notice of its decision on a permit application, as provided in G.S. 150B-23(f), or by posting the decision on a publicly available Web site. The filing of a petition under this subsection does not stay the Commission's decision except as ordered by the administrative law judge under G.S. 150B-33(b).

...”

SECTION 4.17.(b) The Department of Environment and Natural Resources shall study whether the amendments to G.S. 143-215.108, as enacted by Section 4.17(a) of this act, should be expanded into other programs administered by the Department. The Department shall specifically consider whether these changes should be made to the water and solid waste permitting programs. No later than March 1, 2016, the Department shall report the results of this study, including any recommendations, to the Environmental Review Commission.

AMEND ISOLATED WETLANDS LAW

SECTION 4.18.(a) For the purposes of implementing Section .1300 of Subchapter 2H of Chapter 2 of Title 15A of the North Carolina Administrative Code (Discharges to Isolated Wetlands and Isolated Waters), the isolated wetlands provisions of Section .1300 shall apply only to Basin Wetlands and Bogs and no other wetland types as described in the North Carolina Wetland Assessment User Manual prepared by the North Carolina Wetland Functional Assessment Team, version 4.1 October 2010 that are not jurisdictional wetlands under the federal Clean Water Act. The isolated wetlands provisions of Section .1300 shall not apply to an isolated man-made ditch or pond constructed for stormwater management purposes or any other man-made isolated pond.

SECTION 4.18.(b) The Environmental Management Commission may adopt rules to amend Section .1300 of Subchapter 2H of Chapter 2 of Title 15A of the North Carolina Administrative Code consistent with subsection (a) of this section.

SECTION 4.18.(c) Section 54 of S.L. 2014-120 reads as rewritten:

"SECTION 54.(a) Until the effective date of the revised permanent rule that the Environmental Management Commission is required to adopt pursuant to Section 54(c) of this act, the Commission and the Department of Environment and Natural Resources shall implement 15A NCAC 02H .1305 (Review of Applications) as provided in Section 54(b) of this act.

"SECTION 54.(b) Notwithstanding 15A NCAC 02H .1305 (Review of Applications), all of the following shall apply to the implementation of 15A NCAC 02H .1305:

(1) The amount of impacts of isolated wetlands under 15A NCAC 02H .1305(d)(2) shall be less than or equal to one acre of isolated wetlands east of I-95 for the entire project and less than or equal to 1/3 acre of isolated wetlands west of I-95 for the entire project.

(2) Mitigation requirements for impacts to isolated wetlands shall only apply to the amount of impact that exceeds the threshold set out in subdivision (1) of this section. The mitigation ratio for impacts of greater than one acre..."
Session Laws-2015  S.L. 2015-286

exceeding the threshold for the entire project under 15A NCAC 02H .1305(g)(6) shall be 1:1 and may be located on the same parcel.

(3) For purposes of Section 54(b) of this section, “isolated wetlands” means a Basin Wetland or Bog as described in the North Carolina Wetland Assessment User Manual prepared by the North Carolina Wetland Functional Assessment Team, version 4.1 October, 2010, that are not jurisdictional wetlands under the federal Clean Water Act. An “isolated wetland” does not include an isolated man-made ditch or pond constructed for stormwater management purposes or any other man-made isolated pond.

(4) Impacts to isolated wetlands shall not be combined with the project impacts to 404 jurisdictional wetlands or streams for the purpose of determining when impact thresholds that trigger a mitigation requirement are met.

"SECTION 54.(c) The Environmental Management Commission shall adopt rules to amend 15A NCAC 02H .1300 through 15A NCAC 02H .1305 consistent with Section 54(b) of this act. Notwithstanding G.S. 150B-19(4), the rule adopted by the Commission pursuant to this subsection shall be substantively identical to the provisions of Section 54(b) of this act. Rules adopted pursuant to this subsection are not subject to Part 3 of Article 2A of Chapter 150B of the General Statutes. Rules adopted pursuant to this subsection shall become effective as provided in G.S. 150B-21.3(b1) as though 10 or more written objections had been received as provided by G.S. 150B-21.3(b2).

"SECTION 54.(d) The Department of Environment and Natural Resources shall study (i) how the term "isolated wetland" has been previously defined in State law and whether the term should be clarified in order to provide greater certainty in identifying isolated wetlands; (ii) the surface area thresholds for the regulation of mountain bog isolated wetlands, including whether mountain bog isolated wetlands should have surface area regulatory thresholds different from other types of isolated wetlands; and (iii) whether impacts to isolated wetlands should be combined with the project impacts to jurisdictional wetlands or streams for the purpose of determining when impact thresholds that trigger a mitigation requirement are met. The Department shall report its findings and recommendations to the Environmental Review Commission on or before November 1, 2014.

"SECTION 54.(e) This section is effective when it becomes law. Section 54(b) of this act expires on the date that rules adopted pursuant to Section 54(c) of this act become effective."

"SECTION 4.18.(d) No later than March 1, 2016, the Environmental Management Commission shall amend 15A NCAC 02H .1305 (Review of Applications) to establish a coastal region, piedmont region, and mountain region for purposes of regulating impacts to isolated wetlands. The amount of impacts of isolated wetlands under 15A NCAC 02H .1305(d)(2) shall be the following:

(1) Less than or equal to one acre of isolated wetlands for the entire project in the coastal region.
(2) Less than or equal to one-half acre of isolated wetlands for the entire project for the piedmont region.
(3) Less than or equal to one-third acre of isolated wetlands for the entire project for the mountain region.

In no event shall the regulatory requirements for impacts to isolated wetlands be more stringent than required under current law. When the rules required by this section become effective, subdivision (1) of Section 54(b) of S.L. 2014-120 is repealed.

STUDY COASTAL WATER QUALITY AND COASTAL STORMWATER REQUIREMENTS

SECTION 4.19. The Department of Environment and Natural Resources shall evaluate the water quality of surface waters in the Coastal Counties and the impact of stormwater on this water quality. The Department shall study and determine the maximum allowable built-upon area for the low density state stormwater option as directly related to the
length of grassed swale treatment length; therefore providing data for a property to achieve
increased built-upon area above current limits by providing a longer length of grassed swale
through which the stormwater must pass. If it is determined that increases in the percentage
of built-upon area can be allowed in this way without detriment to the water quality, the
Department shall submit recommendations to the General Assembly for the levels of increases
in built-upon area that can be supported with corresponding increases in the length of grassed
swale through which the stormwater shall pass. No later than April 1, 2016, the Department
shall report the results of its study, including recommendations, to the Environmental Review
Commission.

AMEND STORMWATER MANAGEMENT LAW

SECTION 4.20.(a) Section 3 of S.L. 2013-82 reads as rewritten:

"SECTION 3. The Environmental Management Commission shall adopt rules
implementing Section 2 of this act no later than July 1, 2016."

SECTION 4.20.(b) G.S. 143-214.7, as amended by S.L. 2015-149, reads as rewritten:

"§ 143-214.7. Stormwater runoff rules and programs.

... (b2) For purposes of implementing stormwater programs, "built-upon area" means
imperious surface and partially imperious surface to the extent that the partially imperious
surface does not allow water to infiltrate through the surface and into the subsoil. "Built-upon
area" does not include a slatted deck; the water area of a swimming pool; a surface of number
57 stone, as designated by the American Society for Testing and Materials, laid at least four
inches thick over a geotextile fabric; or a trail as defined in G.S. 113A-85 that is either unpaved
or paved as long as the pavement is porous with a hydraulic conductivity greater than 0.001
centimeters per second (1.41 inches per hour). For State stormwater programs and local
stormwater programs approved pursuant to subsection (d) of this section, all of the following
shall apply:

(1) The volume, velocity, and discharge rates of water associated with the
one-year, 24-hour storm and the difference in stormwater runoff from the
predevelopment and postdevelopment conditions for the one-year, 24-hour
storm shall be calculated using any acceptable engineering hydrologic and
hydrologic methods.

(2) Development may occur within the area that would otherwise be required to
be placed within a vegetative buffer required by the Commission pursuant to
G.S. 143-214.1 and G.S. 143-214.7 to protect classified shellfish waters,
outstanding resource waters, and high-quality waters provided the
stormwater runoff from the development is collected and treated from the
entire impervious area and discharged so that it passes through the
vegetative buffer and is managed so that it otherwise complies with all
applicable State and federal stormwater management requirements.

(3) The requirements that apply to development activities within one-half mile
of and draining to Class SA waters or within one-half mile of Class SA
waters and draining to unnamed freshwater tributaries shall not apply to
development activities and associated stormwater discharges that do not
occur within one-half mile of and draining to Class SA waters or are not
within one-half mile of Class SA waters and draining to unnamed freshwater
tributaries.

... (d) The Commission shall review each stormwater management program submitted by
a State agency or unit of local government and shall notify the State agency or unit of local
government that submitted the program that the program has been approved, approved with
modifications, or disapproved. The Commission shall approve a program only if it finds that
the standards of the program equal or exceed those of the model program adopted by the Commission pursuant to this section.

SECTION 4.20.(c) No later than March 1, 2016, a State agency or local government that implements a stormwater management program approved pursuant to subsection (d) of G.S. 143-214.7 shall submit its current stormwater management program or a revised stormwater management program to the Environmental Management Commission. No later than December 1, 2016, the Environmental Management Commission shall review and act on each of the submitted stormwater management programs in accordance with subsection (d) of G.S. 143-214.7, as amended by this section.

SECTION 4.20.(d) The Environmental Review Commission, with the assistance of the Department of Environment and Natural Resources, shall review the current status of State statutes, session laws, rules, and guidance documents related to the management of stormwater in the State. The Commission shall specifically examine whether State statutes, session laws, rules, and guidance documents related to the management of stormwater in the State should be recodified or reorganized in order to clarify State law for the management of stormwater. The Commission shall submit legislative recommendations, if any, to the 2016 Regular Session of the 2015 General Assembly.

SECTION 4.20A. Section 46 of S.L. 2014-120 reads as rewritten:
"SECTION 46.(a) Notwithstanding the requirements of Article 21 of Chapter 143 of the General Statutes and rules adopted pursuant to that Article, the addition of a cluster box unit to a single-family or duplex development permitted by a local government shall not require a modification to any stormwater permit for that development. This section shall only apply to single-family or duplex developments in which individual curbside mailboxes are replaced with cluster box units whereupon the associated built-upon area supporting the cluster box units shall be considered incidental and shall not be required in the calculation of built-upon area for the development for stormwater permitting purposes.

"SECTION 46.(b) This section is effective when this act becomes law and expires on December 31, 2015, or when regulations on cluster box design and placement by the United States Postal Service become effective and those regulations are adopted by local governments, whichever is earlier."

STUDY EXEMPTING LINEAR UTILITY PROJECTS FROM CERTAIN ENVIRONMENTAL REGULATIONS

SECTION 4.21. The Department of Environment and Natural Resources shall study whether and to what extent activities related to the construction, maintenance, and removal of linear utility projects should be exempt from certain environmental regulations. For purposes of this section, "linear utility project" means an electric power line, water line, sewage line, stormwater drainage line, telephone line, cable television line, data transmission line, communications-related line, or natural gas pipeline. For purposes of this section, "environmental regulation" means a regulation established or implemented by any of the following:

1. The Department of Environment and Natural Resources created pursuant to G.S. 143B-279.1.
2. The Environmental Management Commission created pursuant to G.S. 143B-282.
3. The Coastal Resources Commission established pursuant to G.S. 113A-104.
4. The Marine Fisheries Commission created pursuant to G.S. 143B-289.51.
5. The Wildlife Resources Commission created pursuant to G.S. 143-240.
6. The Commission for Public Health created pursuant to G.S. 130A-29.
7. The Sedimentation Control Commission created pursuant to G.S. 143B-298.
8. The North Carolina Mining and Energy Commission created pursuant to G.S. 143B-293.1.
(9) The North Carolina Oil and Gas Commission created pursuant to G.S. 143B-293.1.

No later than March 1, 2016, the Department shall report the results of this study, including any recommendations, to the Environmental Review Commission.

REPEAL DEPARTMENT OF ENVIRONMENT AND NATURAL RESOURCES IDLING RULES

SECTION 4.24. The Secretary of Environment and Natural Resources shall repeal 15A NCAC 02D .1010 (Heavy-Duty Vehicle Idling Restrictions) on or before March 1, 2016. Until the effective date of the repeal of the rule required pursuant to this section, the Secretary, the Department of Environment and Natural Resources, the Environmental Management Commission, or any other political subdivision of the State shall not implement or enforce 15A NCAC 02D .1010 (Heavy-Duty Vehicle Idling Restrictions).

AMBIENT AIR MONITORING

SECTION 4.25.(a) The Department of Environment and Natural Resources shall review its ambient air monitoring network and, in the next annual monitoring network plan submitted to the United States Environmental Protection Agency, shall request the removal of any ambient air monitors that are not required by applicable federal laws and regulations and that the Department has determined are not necessary to protect public health, safety, and welfare; the environment; and natural resources.

SECTION 4.25.(b) No later than September 1, 2016, the Department of Environment and Natural Resources shall discontinue all ambient air monitors not required by applicable federal laws and regulations if approval from the United States Environmental Protection Agency is not required for the discontinuance and the Department has determined that the monitors are not necessary to protect public health, safety, and welfare; the environment; and natural resources.

SECTION 4.25.(c) Nothing in this section is intended to prevent the Department from installing temporary ambient air monitors as part of an investigation of a suspected violation of air quality rules, standards, or limitations or in response to an emergency situation causing an imminent danger to human health and safety.

SECTION 4.25.(d) The Division of Air Quality, Department of Environment and Natural Resources, shall report to the Environmental Review Commission no later than November 1, 2016, on the status of the ambient air monitoring network and the Division's implementation of the requirements of this section.

DIVISION OF AIR QUALITY NOTICE REQUIREMENTS

SECTION 4.27. G.S. 143-215.110 reads as rewritten:

"§ 143-215.110. Special orders.

(a) Issuance. – The Commission is hereby empowered, after the effective date of standards and classifications adopted pursuant to G.S. 143-215.107, to issue (and from time to time to modify or revoke) a special order or other appropriate instrument, to any person whom it finds responsible for causing or contributing to any pollution of the air within the area for which standards have been established. Such an order or instrument may direct such person to take or refrain from taking such action, or to achieve such results, within a period of time specified by such special order, as the Commission deems necessary and feasible in order to alleviate or eliminate such pollution. The Commission is authorized to enter into consent special orders, assurances of voluntary compliance or other similar documents by agreement with the person responsible for pollution of the air, subject to the provisions of subsection (a1) of this section regarding proposed orders, and such consent order, when entered into by the Commission after public review, shall have the same force and effect as a special order of the Commission issued pursuant to hearing.

(a1) Public Notice and Review of Consent Orders."
(1) The Commission shall give notice of a proposed consent order to the proper State, interstate, and federal agencies, to interested persons, and to the public. The Commission may also provide any other data it considers appropriate to those notified. The Commission shall prescribe the form and content of the notice. The notice shall be given at least 45-30 days prior to any final action regarding the consent order. Public notice shall be given by publication of the notice one time in a newspaper having general circulation within the county in which the pollution originates for 30 days on the regulatory agency Web site.

(2) Any person who desires a public meeting on any proposed consent order may request one in writing to the Commission within 30 days following date of the notice of the proposed consent order. The Commission shall consider all such requests for meetings. If the Commission determines that there is significant public interest in holding a meeting, the Commission shall schedule a meeting and shall give notice of such meeting at least 30 days in advance to all persons to whom notice of the proposed consent order was given and to any other person requesting notice. At least 30 days prior to the date of meeting, the Commission shall also have a copy of the notice of the meeting published at least one time in a newspaper having general circulation within the county in which the pollution originates for 30 days on the regulatory agency Web site. The Commission shall prescribe the form and content of notices under this subsection.

PROHIBIT THE REQUIREMENT OF MITIGATION FOR IMPACTS TO INTERMITTENT STREAMS

SECTION 4.31.(a) Article 21 of Chapter 143 of the General Statutes is amended by adding a new section to read:

"§ 143-214.7C. Prohibit the requirement of mitigation for impacts to intermittent streams.

Except as required by federal law, the Department of Environment and Natural Resources shall not require mitigation for impacts to an intermittent stream. For purposes of this section, "intermittent stream" means a well-defined channel that has all of the following characteristics:

(1) It contains water for only part of the year, typically during winter and spring when the aquatic bed is below the water table.

(2) The flow of water in the intermittent stream may be heavily supplemented by stormwater runoff.

(3) It often lacks the biological and hydrological characteristics commonly associated with the conveyance of water."

SECTION 4.31.(b) The Department of Environment and Natural Resources and the Environmental Management Commission shall amend their rules so that the rules are consistent with the provisions of G.S. 143-214.7C, as enacted by subsection (a) of this section.

General Statutes, against animals under private ownership, by means including telephone, electronic mail, and Internet Web site. The Attorney General shall periodically publicize the hotline telephone number, electronic mail address, Internet Web site address, and any other means by which the Attorney General may receive reports of allegations of animal cruelty or violations of the Animal Welfare Act. Any individual who makes a report under this section shall disclose his or her name and telephone number and any other information the Attorney General may require.

When the Attorney General receives allegations involving activity that the Attorney General determines may involve violations of the Animal Welfare Act, the allegations shall be referred to the Department of Agriculture and Consumer Services. The Attorney General shall record the total number of reports received on the hotline and the number of reports received against any individual on the hotline.

(c) Notwithstanding other provisions of law, the Department of Justice is authorized to spend any federal, State, local, or private funds available for this purpose to administer the provisions of this section.

(d) Notwithstanding G.S. 147-33.72C and related provisions of law, in order to expedite the timely implementation of technology systems to record and manage public allegations and complaints received pursuant to this section, the Department of Justice is exempted from external agency project approval standards.

SECTION 4.38. The Department of Insurance, the Department of Public Safety, and the Building Code Council shall jointly study how flood elevations and building heights for structures are established and measured in the coastal region of the State. The Departments and the Council shall specifically consider how flood elevations and coastal building height requirements affect flood insurance rates and how height calculation methods might be made more consistent and uniform in order to provide flood insurance rate relief. In conducting this study, the Departments and the Council shall engage a broad group of stakeholders, including property owners, local governments, representatives of the surveying industry, and representatives of the development industry. No later than March 1, 2016, the Departments and the Council shall jointly submit the results of their study, including any legislative recommendations, to the 2015 General Assembly.

ALLOW ALTERNATE DISPOSAL OF BIODEGRADABLE AGRICULTURAL PLASTICS

SECTION 4.39. (a) G.S. 106-950 reads as rewritten:

"§ 106-950. Exempt fires; no permit fees.

(a) This Article shall not apply to any fires started, or caused to be started, within 100 feet of an occupied dwelling house if such fire shall be confined (i) within an enclosure from which burning material may not escape or (ii) within a protected area upon which a watch is being maintained and which is provided with adequate fire protection equipment.

(a1) Except in cases where the Commissioner has prohibited all open burning during periods of hazardous forest fire conditions or during air pollution episodes declared pursuant to Article 21B of Chapter 143 of the General Statutes, this Article shall not apply to, and no air quality permit shall be required for, the burning of polyethylene agricultural plastic used in connection with agricultural operations related to the growing, harvesting, or maintenance of crops, when all of the following conditions apply:

(1) The burning does not violate any State or federal ambient air quality standards."
(2) The burning is conducted between an hour after sunrise and an hour before sunset.

(3) The fire is set back at least 250 feet from any paved public roadway and at least 500 feet from any dwelling, group of dwellings, commercial or institutional establishment, or other occupied structure not located on the property on which the burning is conducted.

(4) The burning is conducted in a manner such that it does not constitute a public nuisance.

(5) The burning is conducted by any of the following means:
   a. By professionally manufactured equipment solely for the purpose of plastic mulch burning or incineration and approved by the Commissioner.
   b. By a fire that is enclosed in a noncombustible container.
   c. By a fire that is restricted to a pile no greater than eight feet in diameter built upon ground cleared of all combustible material.

(b) No charge shall be made for the granting of any permit required by this Article.

SECTION 4.39.(b) The Department of Agriculture and Consumer Services may adopt rules to implement the provisions of this section.

SECTION 4.39.(c) This section becomes effective January 1, 2015.

The General Assembly of North Carolina enacts:

SECTION 1. G.S. 15A-1201 reads as rewritten:

"§ 15A-1201. Right to trial by jury; waiver of jury trial; procedure for waiver.

(a) Right to Jury Trial. – In all criminal cases the defendant has the right to be tried by a jury of 12 whose verdict must be unanimous. In the district court the judge is the finder of fact in criminal cases, but the defendant has the right to appeal for trial de novo in superior court as provided in G.S. 15A-1431. In superior court all criminal trials in which the defendant enters a plea of not guilty must be tried before a jury, unless the defendant waives the right to a jury trial, as provided in subsection (b) of this section.

(b) Waiver of Right to Jury Trial. – A defendant accused of any criminal offense for which the State is not seeking a sentence of death in superior court may, knowingly and voluntarily, in writing or on the record in the court and with the consent of the trial judge, waive the right to trial by jury. When a defendant waives the right to trial by jury under this section, the jury is dispensed with as provided by law, and the whole matter of law and fact
fact, to include all factors referred to in G.S. 20-179 and subsections (a1) and (a3) of G.S. 15A-1340.16, shall be heard and judgment given by the court. If a motion for joinder of co-defendants is allowed, there shall be a jury trial unless all defendants waive the right to trial by jury, or the court, in its discretion, severs the case.

(c) A defendant seeking to waive the right to trial by jury under subsection (b) of this section shall give notice of intent to waive a jury trial by any of the following methods:

1. Stipulation, which may be conditioned on each party's consent to the trial judge, signed by both the State and the defendant and served on the counsel for any co-defendants.

2. Filing a written notice of intent to waive a jury trial with the court and serving on the State and counsel for any co-defendants within the earliest of (i) 10 working days after arraignment, (ii) 10 working days after service of a calendar setting under G.S. 7A-49.4(b), or (iii) 10 working days after the setting of a definite trial date under G.S. 7A-49.4(c).

3. Giving notice of intent to waive a jury trial on the record in open court by the earlier of (i) the time of arraignment or (ii) the calling of the calendar under G.S. 7A-49.4(b) or G.S. 7A-49.4(c).

(d) Judicial Consent to Jury Waiver. — Upon notice of waiver by the defense pursuant to subsection (c) of this section, the State shall schedule the matter to be heard in open court to determine whether the judge agrees to hear the case without a jury. The decision to grant or deny the defendant's request for a bench trial shall be made by the judge who will actually preside over the trial. Before consenting to a defendant's waiver of the right to a trial by jury, the trial judge shall do all of the following:

1. Address the defendant personally and determine whether the defendant fully understands and appreciates the consequences of the defendant's decision to waive the right to trial by jury.

2. Determine whether the State objects to the waiver and, if so, why. Consider the arguments presented by both the State and the defendant regarding the defendant's waiver of a jury trial.

(e) Revocation of Waiver. — Once waiver of a jury trial has been made and consented to by the trial judge pursuant to subsection (d) of this section, the defendant may revoke the waiver one time as of right within 10 business days of the defendant's initial notice pursuant to subsection (c) of this section if the defendant does so in open court with the State present or in writing to both the State and the judge. In all other circumstances, the defendant may only revoke the waiver of trial by jury upon the trial judge finding the revocation would not cause unreasonable hardship or delay to the State. Once a revocation has been granted pursuant to this subsection, the decision is final and binding.

(f) Suppression of Evidence. — In the event that a defendant who has waived the right to trial by jury pursuant to this section makes a motion to suppress evidence under Article 53 of this Chapter, the court shall make written findings of fact and conclusions of law:"

SECTION 2. G.S. 20-179 is amended by adding a new subsection to read:

The Commissioner shall not give written consent if the Commissioner finds that any of the grounds for denial, revocation, or suspension of a license or registration are applicable to the acquiring person.

§ 53-244.101. License and registration renewal.

(a) All licenses and registrations issued by the Commissioner under the provisions of this Article shall expire annually on the 31st day of December following issuance or on any other date that the Commissioner may determine. (b) A license or registration may be renewed on or after November 1 of each year by complying with the requirements of subsection (c) of this section.

(c) Licensees may apply to renew a mortgage loan originator, mortgage lender, mortgage broker, and mortgage servicer license, and registrants may apply to renew a mortgage origination support registrant registration. The application for renewal shall demonstrate that all of the following applicable requirements are met:

When required by the Commissioner, each person shall furnish to the Commissioner the person's consent to a criminal history record check and a set of the person's fingerprints in a form acceptable to the Commissioner or to the Nationwide Mortgage Licensing System and Registry. Refusal to consent to a criminal history record check shall constitute grounds for the Commissioner to deny renewal of the license of the person as well as the license of any other person by whom the person is employed, over which the person has control, or as to which the person is the current or proposed qualifying individual or current or proposed branch manager.

Except as provided in subsection (a1) of this section, each mortgage loan originator or transitional mortgage loan originator shall be covered by a surety bond through employment with a licensee in accordance with this section. All records shall be preserved for three years unless the Commissioner, by rule, prescribes otherwise for particular types of records.

No person shall make any false statement or knowingly and willfully make any omission of a material fact in connection with any information or reports filed with the Commissioner, a governmental agency, or the Nationwide Mortgage Licensing System and Registry or in connection with any oral or written communication with the Commissioner or another governmental agency. (c) Each mortgage broker licensee shall maintain and transact business from a principal place of business in this State. Within 20 days of receiving notice of the order, the person subject to the order may request in writing a hearing before the Commissioner. Upon receipt of such a request, the Commissioner shall calendar a hearing within 15 days. The General Assembly of North Carolina enacts:

SECTION 1. Chapter 106 of the General Statutes is amended by adding a new Article to read:

"Article 50E.

"Industrial Hemp.

"§ 106-568.50. Legislative findings and purpose.

The General Assembly finds and declares that it is in the best interest of the citizens of North Carolina to promote and encourage the development of an industrial hemp industry in the State in order to expand employment, promote economic activity, and provide opportunities to small farmers for an environmentally sustainable and profitable use of crop lands that might otherwise be lost to agricultural production. The purposes of this Article are to establish an agricultural pilot program for the cultivation of industrial hemp in the State, to provide for reporting on the program by growers and processors for agricultural or other research, and to pursue any federal permits or waivers necessary to allow industrial hemp to be grown in the State.
The following definitions apply in this Article:

1. Certified seed. – Industrial hemp seed that has been certified as having a delta-9 tetrahydrocannabinol concentration less than that adopted by federal law in the Controlled Substances Act, 21 U.S.C. §§ 801 et seq.

2. Commercial use. – The use of industrial hemp as a raw ingredient in the production of hemp products.

3. Commission. – The North Carolina Industrial Hemp Commission created by this Article.

Hemp products. – All products made from industrial hemp, including, but not limited to, cloth, cordage, fiber, food, fuel, paint, paper, particleboard, plastics, seed, seed meal and seed oil for consumption, and certified seed for cultivation if the seeds originate from industrial hemp varieties.

7. Industrial hemp. – All parts and varieties of the plant Cannabis sativa (L.) cultivated or possessed by a grower licensed by the Commission, whether growing or not, that contain a delta-9 tetrahydrocannabinol concentration of no more than three-tenths of one percent (0.3%) on a dry weight basis.

8. Tetrahydrocannabinol or THC. – The natural or synthetic equivalents of the substances contained in the plant, or in the resinous extractives of, cannabis, or any synthetic substances, compounds, salts, or derivatives of the plant or chemicals and their isomers with similar chemical structure and pharmacological activity.

(a) Creation and Membership. – The North Carolina Industrial Hemp Commission is established and shall consist of five members as follows:

1. The Commissioner of Agriculture or the Commissioner's designee, who shall serve as vice-chair.

(b) Terms of Members. – Members of the Commission shall serve terms of four years, beginning effective July 1 of the year of appointment, and may be reappointed to a second four-year term. The terms of the remaining members shall expire on June 30 of any year that follows by two years a year evenly divisible by four.

(c) Chair. – The members of the Commission shall elect a chair. The chair shall serve a two-year term and may be reelected.

(g) Quorum. – Three members of the Commission shall constitute a quorum for the transaction of business.

(h) Staff. – The Commission is authorized and empowered to employ no more than two persons as staff to assist the Commission in the proper discharge of its duties and responsibilities. The chair of the Commission shall organize and direct the work of the Commission staff. Each licensee shall provide a complete and accurate legal description of the location of the industrial hemp farming operation, including GPS coordinates, and the license shall be issued for cultivation only in those locations identified in the application and shall include on its face the description of those areas. The Department shall provide administrative support to the Commission for the processing of applications and issuance of licenses.

(3) To support the Commission's activities, and to reimburse the Department for expenses associated with the issuance of cultivation licenses under subdivision (2) of this section, the Commission may charge the following fees:

   a. An initial, graduated license fee, to be paid by each cultivator, based upon the number of acres proposed for cultivation of industrial hemp, not to exceed ten thousand dollars ($10,000), with incentive provisions to encourage the participation of small acreage farmers.

   b. An annual fee that is the sum of two hundred fifty dollars ($250.00) and two dollars ($2.00) per acre of industrial hemp cultivated. In setting fees under this subdivision, the Commission may create fair and reasonable licensing preferences for license applicants from North Carolina counties that have been recognized as economically depressed or disadvantaged.

(4) To receive gifts, grants, federal funds, and any other funds both public and private needed to support the Commission's duties and programs.

(5) To establish procedures for reporting to the Commission by the growers and processors for agricultural or academic research and to collaborate and coordinate research efforts with the appropriate departments or programs of North Carolina State University and North Carolina A & T State University.
To study and investigate marketplace opportunities for hemp products to increase the job base in the State by means of employment related to the production of industrial hemp.

To study and investigate methods of industrial hemp cultivation that are best suited to soil conservation and restoration.

To propose to the Board of Agriculture for adoption reasonable rules and regulations necessary to carry out the purposes of this Article, which shall include, but are not limited to, rules for all of the following:

b. Supervision of the industrial hemp during its growth and harvest, including rules for verification of the type of seeds and plants used and grown by licensees.

d. Means and methods for assisting law enforcement agencies to efficiently ascertain information regarding the legitimate and lawful production of industrial hemp.

e. Strategies and programs for the promotion of industrial hemp products and markets, in conjunction with the North Carolina Department of Agriculture, the North Carolina Department of Commerce, the University of North Carolina system, and the community college system.

f. The fees authorized by subdivision (3) of this section. The Commission shall include in its rulemaking proposals the adoption by reference or otherwise the federal regulations in effect regarding industrial hemp and any subsequent amendments to those regulations. No North Carolina rule, regulation, or statute shall be construed to authorize any person to violate any federal law or regulation.

To undertake any additional studies relating to the production, distribution, or use of industrial hemp as requested by the General Assembly, the Governor, or the Commissioner of Agriculture.

§ 106-568.54. Limitations.

The Commission shall not meet or undertake any of its powers and duties under this Article until it has obtained funding from sources other than State funds of at least two hundred thousand dollars ($200,000) to support operations of the Commission. Funding from non-State sources for the Commission's activities may be returned to the donor or funder if not spent or encumbered within 12 months, upon request of the donor or funder. Non-State funds donated and carried over at the end of the fiscal year in which they are donated shall be retained and remain eligible for expenditure in the following fiscal year.

SECTION 2. G.S. 90-87(16) reads as rewritten:

This bill is intended to address a valid concern of our state’s businesses - how to discourage those bad actors who seek employment with the intent to engage in corporate espionage or act as an undercover investigator. This practice is unethical and unfair to employers, and is a particular problem for our agricultural industry. It needs to be stopped.

While I support the purpose of this bill, I believe it does not adequately protect or give clear guidance to honest employees who uncover criminal activity. I am concerned that subjecting these employees to potential civil penalties will create an environment that discourages them from reporting illegal activities.

Earlier this week, I was proud to sign Burt’s Law. It requires adult care home employees who witness sexual abuse of patients to report it to the proper authorities. I signed Burt’s Law because it protects a vulnerable population and gives clear direction to employees to report any abuse they witness. I don’t want to discourage good employees of any industry from reporting illegal activities to the proper authorities, which is why I am vetoing House Bill 405. In good conscience, I cannot sign Burt’s Law and then in the same week turnaround and sign contradictory legislation.

I encourage the General Assembly to reconsider this bill as soon as possible and add protections for those employees who report illegal activities directly and confidentially to the proper authorities. I stand ready to work with legislators during this process, and I am very optimistic that we can reach a solution that addresses the concerns of our North Carolina employers while still protecting honest employees.

Pat McCrory
May 29, 2015
I recognize that for many North Carolinians, including myself, opinions on same-sex marriage come from sincerely held religious beliefs that marriage is between a man and a woman. However, we are a nation and a state of laws. Whether it is the president, governor, mayor, a law enforcement officer, or magistrate, no public official who voluntarily swears to support and defend the Constitution and to discharge all duties of their office should be exempt from upholding that oath; therefore, I veto Senate Bill 2.

SECTION 2. This resolution is effective upon ratification.

In the General Assembly read three times and ratified this the 29th day of April, 2015.

Resolution 2015-6

A JOINT RESOLUTION HONORING THE MEMORY AND LIVES OF VICTIMS OF THE HOLOCAUST, INCLUDING THOSE WHO PERISHED IN AND THOSE WHO SURVIVED NAZI CONCENTRATION CAMPS, AND RECOGNIZING AND HONORING THE UNITED STATES ARMED FORCES WHOSE COURAGE AND BRAVERY LED TO THE LIBERATION OF THOSE CAMPS ON THIS SEVENTIETH ANNIVERSARY OF THE UNITED STATES ARMY'S LIBERATION OF THE INFAMOUS DACHAU CONCENTRATION CAMP.

Whereas, April 29, 2015, marks the 70th anniversary of the liberation of the infamous Nazi concentration camp at Dachau, Germany; and

Whereas, in 1933, Dachau became the first major concentration camp established by the Nazi regime, serving as a training center for SS concentration camp guards and incarcerating clergy, Jews, political opponents of the Nazis, and homosexuals and others labeled as "undesirable elements" by the Nazis; and

Whereas, prisoners were executed in Dachau and its many surrounding sub-camps, as well as being starved to death and worked to death; and

Whereas, Dachau included an "experimental station," which conducted medical experiments through the use of hypothermia, forced diseases, and other atrocities to observe and document their gruesome and agonizing effects on defenseless prisoners; and

Whereas, Dachau was one of a system of concentration camps and their sub-camps in which millions perished during World War II; and

Whereas, the estimates of prisoners who died or were executed at Dachau is nearly 50,000 persons; and

Whereas, prior to its liberation, Dachau held nearly 70,000 prisoners; and

Whereas, the United States Armed Forces, and particularly the United States Seventh Army's 42nd and 45th Infantry Divisions, with support of the 20th Armored Division, played the lead role in the liberation of Dachau and its surrounding camps; and

Whereas, on April 29, 1945, these divisions of the U.S. Army, which had fought their way through Europe and were proceeding to capture the German city of Munich, arrived at the concentration camp at Dachau on April 29, 1945, and seized control of that camp; and

Whereas, upon their arrival at Dachau, the United States Army discovered a string of approximately 40 railway cars sitting on a siding near the camp entrance, loaded with thousands of emaciated corpses of prisoners who had been moved from other concentration camps; and

Whereas, the Dachau concentration camp included a crematorium, gas chamber, and adjacent rooms piled high with naked and emaciated human corpses at the time the U.S. Army liberated the camp; and

Whereas, on the days prior to and following the liberation of Dachau, the U.S. Army liberated Jews and others who were on forced death marches or transports to and from Dachau and other concentration camps, including North Carolina residents Morris Glass, Abe Piasek, Harry Weiss, and others; and

Whereas, on the days following their liberation of Dachau, the U.S. Seventh Army took over administration of the Dachau camp, supplying food and medical supplies and establishing evacuation hospitals to assume the care and feeding of the prisoners; and
Whereas, a Dachau survivor gave U.S. Army Air Corps soldier David Walter Corsbie, Jr., an "ashcake" containing the ashes of an unknown number of individuals killed at Dachau and urged him to take them home as a reminder of the horrors of the Holocaust; and

Whereas, David Walter Corsbie hid the ashes in his Surry County home until shortly before his death in 1986, before transmitting them to his son Joe; and

Whereas, through the efforts of David Walter Corsbie's family and Holocaust survivors and their children, and The Holocaust Speakers Bureau in Chapel Hill and Durham's Beth El Synagogue, those ashes were given a proper burial at the Durham Hebrew Cemetery on May 25, 2014; and

Whereas, North Carolina is the home to many Holocaust survivors and veterans who were involved in the liberation of concentration camps during World War II and whose age and mortality are diminishing their ranks, including the recently deceased U.S. Army veteran liberators Robert Patton and Bud Parsons, North Carolinians who spoke at the State's commemoration of the annual "Days of Remembrance" program in 2011, presented by the North Carolina Council on the Holocaust; and

Whereas, North Carolina is the home of major military bases, including Fort Bragg, the Marine Corps Air Station Cherry Point, Marine Corps Air Station New River, Marine Corps Base Camp Lejeune, Seymour Johnson and Pope Air Force bases, and the Coast Guard station at Elizabeth City, as well as the North Carolina National Guard; and

Whereas, the North Carolina Veterans of Foreign Wars, American Legion, and Division of Veterans Affairs serve and bear witness to the courage of the United States Armed Forces involved in these liberation efforts; and

Whereas, the North Carolina Council on the Holocaust, established by the State in 1981, works tirelessly with Holocaust survivors to promote and provide Holocaust education for our teachers and students throughout the State and has worked tirelessly to organize this and various other recognitions to give meaning to the promise, "never again"; Now, therefore,

Be it resolved by the House of Representatives, the Senate concurring:

SECTION 1. The General Assembly of North Carolina honors the courage, memories, and sacrifices of victims of the Holocaust, including those who perished in and those who survived Nazi concentration camps, including Dachau.

SECTION 2. The General Assembly recognizes and honors the courage and bravery of United States Armed Forces whose mighty and heroic efforts led to the liberation of those camps.

SECTION 3. The General Assembly of North Carolina recognizes and honors those Holocaust survivors, together with military commanders and representatives of the liberators of the United States Armed Forces based in North Carolina and representatives of the American Legion, Veterans of Foreign Wars, and North Carolina Division of Veterans Affairs.

SECTION 4. The General Assembly of North Carolina expresses gratitude to those persons and entities hosting and participating in events this year commemorating the 70th anniversary of the liberation of Dachau and other concentration camps and applauds the efforts of the North Carolina Council on the Holocaust and its members and hereby reaffirms its support of and commitment to educational efforts to teach current and future generations about the Holocaust, to preserve the memory of those murdered, and to prevent future genocides.

SECTION 5. The Secretary of State shall transmit a certified copy of this resolution to the Secretary of the United States Army in recognition of its liberation of the Dachau concentration camp, and to the commanders of all military bases in North Carolina, the North Carolina Council on the Holocaust, the Holocaust Speakers Bureau in Chapel Hill, the Director of the United States Holocaust Memorial Museum, and the Director of the North Carolina Museum of History.

Whereas, on April 6, 2015, the Duke University men's basketball team won the 2015 National Collegiate Athletic Association (NCAA) Division I Championship by defeating the University of Wisconsin by a score of 68-63; and

Whereas, this championship gives Duke University its fifth Division I NCAA title for the men's basketball program, adding to the championships won in 1991, 1992, 2001, and 2010; and

Whereas, the Blue Devils have achieved an outstanding record during their NCAA tournament history, which includes being selected 13 times as a No. 1 seed and appearing in 39 tournaments with 11 championship game appearances, 16 Final Four appearances, 20 Elite Eight appearances, and 24 Sweet 16 appearances; and

Whereas, the Blue Devils finished the 2014-2015 season with a record of 35-4 and were ranked No. 1 by the USA Today Top 25 men's basketball coaches' poll; and

Whereas, much of the Blue Devils' success can be attributed to the leadership of head coach, Mike Krzyzewski, a Hall of Fame coach, who during his 35 seasons at Duke has led his teams to a record of 945-251; and

Whereas, Coach Krzyzewski along with his coaching staff of associate head coach Jeff Capel and assistant coaches Nate James and Jon Scheyer guided the Blue Devils to an 11-2 record against nationally ranked opponents, including a 6-1 mark against top 10 foes; and

Whereas, Coach Krzyzewski maintains the record for the most number of NCAA tournament wins, capturing his 88th NCAA win during the 2015 tournament, and with five championship titles he owns the second most championships in NCAA history; and

Whereas, Duke's historic run also saw Coach Krzyzewski become the first NCAA Division I men's basketball coach to amass 1,000 career victories with the monumental win coming by virtue of a 77-68 triumph over St. John's at Madison Square Garden on January 25, 2015; and

Whereas, many individual team members were recognized for their efforts during the year and throughout their college careers, including Jahil Okafa, who was a consensus first team All-America, National Freshman of the Year, and became the first freshman in ACC history to be named conference player of the year; and

1496
Whereas, senior co-captain Quinn Cook earned second team All-America and All-ACC honors after posting career-bests in scoring, field goal percentage, free throw percentage, three-point field goal percentage, and three-point field goals; and
Whereas, freshman Tyus Jones was named the Final Four Most Outstanding Player and was selected to the All-Tournament team along with teammates Grayson Allen and Justise Winslow. Tyus Jones was also the South Regional MOP with Justise Winslow and Matt Jones earning spots on the South Regional All-Tournament team; and
Whereas, each year Duke University is recognized as one the nation's best academic institutions and its basketball program continues to have one of the highest graduation rates for its athletes. In 2015, the Blue Devils placed five members (Grayson Allen, Tyus Jones, Amile Jefferson, Marshall Plumlee, and Justise Winslow) on the ACC All-Academic team for the first time in program history; and
Whereas, these accomplishments reflect favorably on the basketball tradition that began in 1906 when Duke alumnus Wilbur Wade "Cap" Card established the sport of basketball at Duke University (then Trinity College); and
Whereas, these extraordinary accomplishments bring great honor and distinction to the State of North Carolina and deserve recognition by the State; Now, therefore,

Be it resolved by the Senate, the House of Representatives concurring:

SECTION 1. The General Assembly expresses the appreciation and admiration of the people of North Carolina to Duke University's men's basketball team for winning the 2015 National Collegiate Athletic Association Division I Championship.
SECTION 2. Resolution 2015-9  S.J.R. 421

A JOINT RESOLUTION EXPRESSING GRATITUDE AND APPRECIATION TO THE MEN AND WOMEN OF THE UNITED STATES ARMED FORCES.

Whereas, the month of May is National Military Appreciation Month and honors, remembers, recognizes, and appreciates all military personnel; those men and women who have served throughout our history, and all who now serve in uniform and their families, as well as those Americans who have given their lives in defense of our freedoms we all enjoy today; and
Whereas, North Carolina is the home of six major Department of Defense (DOD)/Department of Homeland Security (DHS) installations: Coast Guard Station, Elizabeth City; Fort Bragg; Marine Corps Air Station Cherry Point; Marine Corps Air Station New River; Marine Corps Base Camp Lejeune; and Seymour Johnson Air Force Base, as well as the North Carolina National Guard and other DOD/DHS activities and organizations; and
Whereas, nearly 800,000 veterans live in North Carolina and, according to North Carolina Military Business Center's most recent data, North Carolina has the third-highest active duty military presence in the United States, with over 106,400 active duty personnel and close to 12,000 members of the North Carolina National Guard; and
Whereas, more than 540,000 individuals are either directly employed by the military or work in jobs providing goods or services that support the military's presence in North Carolina; and

Whereas, according to recent estimates, the impact of the military on State personal income was $30 billion and the impact on gross State product was $48 billion, which supported about 10% of the economic activity in North Carolina; and

Whereas, in 2014, businesses with defense-related contracts operated in 79 of North Carolina's 100 counties and contributed $2.49 billion in prime defense procurement contracts to the State; and

Whereas, North Carolina prides itself as being the nation's "Most Military-Friendly State"; and

Whereas, veterans, service members, their families, and their communities have shouldered a heavy burden exemplified by repeated combat deployments for their nation; and

Whereas, the support of the families of service members enhances the effectiveness and capabilities of the military; and

Whereas, North Carolina is committed to supporting and promoting the military within the State; and

Whereas, the continued long-term military presence in North Carolina is directly dependent on DOD/DHS's ability to operate not only its installations but also its training and other readiness functions critical to national defense; and

Whereas, it is therefore of paramount importance to the future of North Carolina to maintain the best possible relationship with all branches of the United States military and to promote practices that maintain North Carolina's preeminent position as the best location for military bases and training installations; and

Whereas, to those ends, it is critical for all North Carolinians, all North Carolina businesses, all sectors of North Carolina's economy, and especially all branches and agencies of North Carolina's State and local governments to be knowledgeable about not only the military's presence and contributions to our State but also of the military's special and unique requirements that are critical to carrying out its national defense mission; and

Whereas, North Carolina also seeks to promote the economic development, growth, and expansion of other industries within the State, such as the agriculture/agribusiness industry, the renewable energy industry, the tourism/outdoor recreation industry, and the fisheries industry; and

Whereas, North Carolina has a vested economic interest in the preservation and enhancement of land uses that are compatible with military activities; Now, therefore,

Be it resolved by the Senate, the House of Representatives concurring:

Resolution 2015-13 S.J.R. 720

A JOINT RESOLUTION HONORING THE VETERANS OF WORLD WAR II.

Whereas, World War II was a global conflict involving more than 30 countries which lasted from 1939 to 1945, with major battles across Europe, the Pacific Ocean, and the Middle East; and

Whereas, in 1941, the United States of America, seeking peaceful solutions to issues vital to U.S. national security interests, was engaged in diplomatic negotiations with envoys of the Empire of Japan to resolve these issues; and

Whereas, on Sunday, December 7, 1941, while these negotiations were in progress, military forces of the Empire of Japan executed a surprise attack at Pearl Harbor, Hawaii, then a Territory of the United States; and

Whereas, most of the U.S. Pacific Fleet was at anchor at Pearl Harbor on that day and was the main target of that surprise attack, within less than two hours Japanese warplanes sank or damaged eight battleships (including the USS Arizona), three light cruisers, three destroyers, and four other naval vessels, destroyed over 130 aircraft, and killed more than 2,400 Americans; and

Whereas, this act of aggression prompted President Franklin D. Roosevelt to address the U.S. Congress on December 8, 1941, to ask for a declaration of war and opened his remarks with these historic words: "Yesterday, December 7, 1941, a date which will live in infamy – the United States of America was suddenly and deliberately attacked by naval and air forces of the Empire of Japan"; and

Whereas, on December 11, 1941, in support of Japan's aggression, Nazi Germany also declared war on the U.S.; and

Whereas, because of Japan's "unprovoked and dastardly attack" on a U.S. Territory and U.S. Forces and Nazi Germany's declaration of war, the United States of America was entered into World War II; and

Whereas, more than 16 million courageous Americans of the "greatest generation" served with honor, distinction, and patriotism, fighting in every theater of operation during that war for the freedoms we enjoy today and playing a critical role in decisive battles around the world, with more than 405,000 making the supreme sacrifice; and

Whereas, over 360,000 North Carolinians served in that War, of which more than 6,300 were killed; and

Whereas, on May 7, 1945, Nazi Germany surrendered unconditionally to the U.S., marking that date V-E Day, leaving its ally, The Empire of Japan, to stand alone against the U.S. and its allies in the Pacific Theater; and

Whereas, on August 6, 1945, an American B-29 "Flying Fortress" named "Enola Gay" with North Carolina native, Colonel (Retired) Thomas W. Ferebee, a veteran of 60 bombing missions in the European Theater, serving as the lead bombardier, dropped the world's
first atomic bomb on the city of Hiroshima, Japan, which was followed by a second atomic bomb mission on Nagasaki, Japan, three days later; and

Whereas, on August 14, 1945, due largely to the effects of those atomic weapons, the Japanese government accepted the provisions of the Potsdam Declaration and agreed to an unconditional surrender marking that day as V-J Day, bringing an end to hostilities in the Pacific, thus ending World War II and saving an estimated one million or more U.S. casualties had the war continued and the allies been forced to invade Japan's home islands; and

Whereas, 2015 marks the 70th anniversary of the surrender of the Empire of Japan and the end of World War II; and

Whereas, with less than one million World War II veterans alive today in the United States, we must take the time to honor and remember and thank the men and women of "the greatest generation," who valiantly and with great honor defended our great Nation's freedoms against the forces of darkness and evil who would surely have denied us those freedoms; Now, therefore,

Be it resolved by the Senate, the House of Representatives concurring:

SECTION 1. The General Assembly wishes to express its deepest and most heartfelt appreciation to the veterans of World War II and their families for their remarkable contributions and service to the people of North Carolina, the United States of America, and the free world. They held high the torch of freedom and we should be ever mindful that the task of preserving that fragile freedom is now ours.

SECTION 2. The General Assembly wishes to honor the life and memory of those who died while serving during World War II.

SECTION 3. This resolution is effective upon ratification.

In the General Assembly read three times and ratified this the 19th day of August, 2015.

I have further found that citizens in this state may suffer imminent widespread damage within the meaning of N.C.G.S § 166A-19.3(3) and N.C.G.S. § 166A-19.21(b); and

WHEREAS, pursuant to N.C.G.S. § 166A-19.70(g) on the recommendation of the Commissioner of Agriculture, upon a finding that there is an imminent threat of severe economic loss of livestock or poultry, the Governor shall direct the Department of Public Safety to temporarily suspend weighing those vehicles used to transport livestock and poultry and feed for livestock and poultry; and

WHEREAS, 49 CFR § 390.23 allows the Governor of a state to suspend the rules and regulations under 49 CFR Parts 390-399 for up to 30 days if the Governor determines that an emergency condition exists; and

WHEREAS, under N.C.G.S. § 166A-19.70, the Governor may declare that the health, safety, or economic well-being of persons or property requires that the maximum hours of service for

1542
drivers prescribed by N.C.G.S. § 20-381 should be waived for persons transporting essential fuels, food, water, medical supplies, debris removal, feed for livestock and poultry, transporting livestock and poultry and for vehicles used in the restoration of utility services.

NOW, THEREFORE, pursuant to the authority vested in me as Governor by the Constitution and the laws of the State of North Carolina, IT IS ORDERED:

Section 1.

The Department of Public Safety in conjunction with the North Carolina Department of Transportation shall waive the maximum hours of service for drivers prescribed by the Department of Public Safety pursuant to N.C.G.S. § 20-381.

Section 2.

The Department of Public Safety in conjunction with the Department of Transportation shall waive certain size and weight restrictions and penalties arising under N.C.G.S. §§ 20-116, 20-118, and 20-119. This order also waives certain registration requirements and penalties arising under N.C.G.S. §§ 20-86.1, 20-382, 105-449.47, and 105-449.49 for vehicles transporting equipment and supplies for the restoration of utility services, carrying essentials, and for equipment for any debris removal. The Department of Public Safety shall suspend weighing pursuant to N.C.G.S. § 20-118.1 vehicles used to transport livestock and poultry and carrying livestock and poultry feed in the emergency area.

Section 3.

Notwithstanding the waivers set forth above, size and weight restrictions and penalties have not been waived under the following conditions:

a. When the vehicle weight exceeds the maximum gross weight criteria established by the manufacturer (GVWR) or 90,000 pounds gross weight, whichever is less.

b. When the tandem axle weight exceeds 42,000 pounds and the single axle weight exceeds 22,000 pounds.

c. When a vehicle and vehicle combination exceeds 12 feet in width and a total overall vehicle combination length of 75 feet from bumper to bumper.

d. Vehicles and vehicle combinations subject to exemptions or permits by authority of this Executive Order shall not be exempt from the requirement of having a yellow banner on the front and rear measuring a total length of 7 feet by 18 inches bearing the legend “Oversized Load” in 10 inch black letters 1.5 inches wide and red flags measuring 18 inches square to be displayed on all sides at the widest point of the load. In addition, when operating between sunset and sunrise, a certified escort shall be required for loads exceeding 8 feet 6 inches in width.

Section 4.

Vehicles referenced under Sections 2 and 3 shall be exempt from the following registration requirements:

a. The $50.00 fee listed in N.C.G.S. § 105-449.49 for a temporary trip permit is waived for the vehicles described above. No quarterly fuel tax is required because the exception in N.C.G.S. § 105-449.45(a)(1) applies.

b. The registration requirements under N.C.G.S. § 20-382.1 concerning intrastate and interstate for-hire authority is waived; however, vehicles shall maintain the required limits of insurance as required.

c. Non-participants in North Carolina’s International Registration Plan will be permitted into North Carolina in accordance with the exemptions identified by this Executive Order.
Section 5.
The size and weight exemption for vehicles will be allowed on all routes designated by the North Carolina Department of Transportation, except those routes designated as light traffic roads under N.C.G.S. § 20-118. This order shall not be in effect on bridges posted pursuant to N.C.G.S. § 136-72.

Section 6.
The waiver of regulations under Title 49 of the Code of Federal Regulations (Federal Motor Carrier Safety Regulations) does not apply to the CDL and Insurance Requirements. This waiver shall be in effect for 30 days or the duration of the emergency, whichever is less.

Section 7.
The North Carolina State Highway Patrol shall enforce the conditions set forth in Sections 1 through 6 of this Executive Order in a manner which will implement these provisions without endangering motorists in North Carolina.

Section 8.
Upon request by law enforcement officers, exempted vehicles must produce documentation sufficient to establish their loads are being used for bearing equipment and supplies for utility restoration, debris removal, carrying essentials in commerce, carrying feed for livestock and poultry, or transporting livestock and poultry in the State of North Carolina.

Section 9.
This Executive Order does not prohibit or restrict lawfully possessed firearms or ammunition or impose any limitation on the consumption, transportation, sale or purchase of alcoholic beverages as provided in N.C.G.S. § 166A-19.30(c).

Section 10.
Pursuant to N.C.G.S. § 166A-19.23, this declaration triggers the prohibition against excessive pricing as provided in N.C.G.S. §§ 75-37 and 75-38 in the declared emergency area.

Section 11.
This Executive Order is effective immediately and shall remain in effect for thirty (30) days or the duration of the emergency, whichever is less.

IN WITNESS WHEREOF, I have hereunto signed my name and affixed the Great Seal of the State of North Carolina at the Capitol in the City of Raleigh, this first day of October in the year of our Lord two thousand and fifteen, and of the Independence of the United States of America the two hundred and thirty-nine.

EXECUTIVE ORDER 82

NOTICE OF TERMINATION OF EXECUTIVE ORDER 80
AND AMENDMENT OF EXECUTIVE ORDER 81

WHEREAS, Executive Order No. 80, issued on October 1, 2015, declared a state of emergency in North Carolina due to the approach and potential impacts of Hurricane Joaquin; and

WHEREAS, Executive Order No. 81, issued on October 1, 2015, waived the maximum hours of service for drivers transporting supplies and equipment for utility restoration and essentials in commerce, and with the concurrence of the Council of State temporarily suspended size and weight restrictions on vehicles used for utility restoration and carrying essentials on the interstate and intrastate highways due to anticipated damage and impacts from Hurricane Joaquin. In addition, the order also directed the Department of Public Safety to suspend weighing equipment used for movement of crops, transporting livestock and poultry and feed for livestock and poultry.

NOW, THEREFORE, by the power vested in me as Governor by the Constitution and laws of North Carolina, IT IS ORDERED:

Section 1.

Pursuant to N.C.G.S § 166A-19.20(c) the state of emergency that was declared by Executive Order No. 80 is hereby terminated immediately.

Section 2.

Executive Order No. 81 will remain in effect until November 1, 2015. The order is amended to repeal the following clause:

WHEREAS, I have declared that a state of emergency as defined in N.C.G.S. §§ 166A-19.3(6) and 166A-19.3(19) exists in North Carolina due to the likely impact of Hurricane Joaquin; and

Replacing it with the following clause:

WHEREAS; although I have terminated Executive Order No. 80, issued on October 1, 2015, there continues to be a state of emergency as defined in N.C.G.S. §§ 166A-19.3(6) and 166A-19.3(19) for the purposes of responding to the flooding present in the region due to the historic levels of rainfall. The emergency area as defined in N.C.G.S. §§ 166A-19.3(7) and N.C.G.S. 166A-19.20(b) is the state of South Carolina and the eastern and southeastern regions of North Carolina; and
Section 3.
Section 10 of Executive Order No. 81 is rewritten to read as follows:

This order will not trigger the prohibitions against excessive pricing in the emergency area in North Carolina, notwithstanding the provisions of N.C.G.S. § 166A-19.23.

Section 4.
The remaining provisions in Executive Order No. 81 remain in effect until the order terminates on November 1, 2015.

IN WITNESS WHEREOF, I have hereunto signed my name and affixed the Great Seal of the State of North Carolina at the Capitol in the City of Raleigh, this ninth day of October in the year of our Lord two thousand and fifteen, and of the Independence of the United States of America the two hundred and thirty-nine.

C. Public School Funding Adjustments

15 Low Wealth Supplemental Funding (1800)  
($10,091,091)  
($10,091,091)  

Adjusts the supplemental allotment for school districts in low wealth communities to align funding availability with actual school district eligibility. This adjustment will not reduce funding to eligible districts. A related provision in this act adjusts the Low Wealth formula to provide the same amount of supplemental funding to school districts in certain low wealth counties as received in the 2012-2013 fiscal year. These local school administrative units have an average daily membership of more than 23,000 students and are in counties that also contain a base of the Armed Forces of the United States. $200.0 million will be available in this allotment.

16 Teacher Assistants (1800)  
$138,134,020  
$138,134,520  

Provides funding sufficient to maintain the FY 2014-15 level of support for this allotment. Additional funds are provided in the "Average Daily Membership" item that will have the impact of increasing overall support for Teacher Assistants due to increased student headcount. $377.1 million will be available in this allotment in FY 2015-16 and FY 2016-17.

17 Increased Funding for Classroom Teachers (1800)  
$26,898,708  

Increases funding to school districts for guaranteed Classroom Teachers positions in grade 1. Beginning in FY 2015-17, the teacher allotment ratio will be decreased by 1 student per teacher in grade 1 to provide 1 teacher per 16 students.

Total funding for guaranteed classroom teacher positions, inclusive of salary and benefits costs, will be $4.31 billion in FY 2016-17.

18 Textbooks and Digital Resources (1800)  
$21,600,000  
$31,030,037  

Increases General Fund support for textbooks and digital resources, bringing total funding for this allotment to $52.4 million in FY 2015-16 and $62.0 million in FY 2016-17.

19 School Connectivity Initiative (1800)  
$2,000,000  
$12,000,000  

Provides additional support for this initiative that brings broadband connectivity to all K-12 public school buildings in the State. New funds will allow enhancement of school-level internal Wi-Fi networks to provide high-quality, reliable connectivity to the classroom level. Total State funding for School Connectivity will total $21.9 million in FY 2015-16 and $31.0 million in FY 2016-17.

Suggestions for Use: Local legislation appears under the name of the particular county or municipality. Legislation that amends or repeals another session law appears under "Laws Amended or Repealed" and under the particular subject. General appropriations appear under "Appropriations". Specific appropriations or earmarks appear under the particular agency, entity, or subject. Committees, Commissions, Councils, and Boards appear as main entries. Numbers are alphabetized as spelled (i.e., 9 is listed alphabetically as "nine"). Session Law numbers (locators) are shown in standard citation format with the word "Section" replaced by the section symbol (§). Thus, "Session Law 145 Section 6A.10 subsection (a) through subsection (p)" would appear as "145§6A.10(a)-(p)", and "Session Law 145 Section 28.31 through Section 28.31A" would appear as "145§§28.31-28.31A". Noncontiguous Session Law sections are separated by a comma. Complete Session Law citations are separated by a semicolon.
